## QUESTIONS AND ANSWERS. Miscellaneous.

### COMPUTING TIME.

1. A commences to work for B on the 15th day of February, at noon, for one month. When will his time be in?
2. In reckoning time for a month, do you reckon from date to date, or 26 working days?
3. If the 24th of May was in, would man have to put it in extra?
4. How many days can a man claim in a year working on the farm?

**Ans.—**1. At the expiration of the 14th day of March. The law commonly disregards the fraction of the day. There are exceptions to this rule, but this case does not come under the exceptions. Morally, however, the man would be expected to work until noon of March 15th.  
2. From date to date.  
3. No.  
4. Ordinarily, and subject to the doing of "chores," sixty, including Sundays.

### FERTILIZER FOR CORN AFTER SOD.

I would like a little advice, through your paper, about growing corn on hard clay land, plowed out of pasture last October and top-dressed when in pasture. This land is well drained, but is not very rich. Would it be advisable to plant corn for silo on this land? Would it pay to buy fertilizer for it, and, if so, what kind would you advise us to buy?

**Ans.—**Corn is the ideal crop to follow sod, and a manured sod is the best preparation for corn. It is not necessary to buy commercial fertilizer for the corn, although a small dressing might prove profitable, if the supply of manure is limited. If our inquirer is accustomed to the use and home mixing of fertilizers, he might try the following: Nitrate of soda, 50 pounds; acid phosphate, 200 pounds; muriate of potash, 60 pounds, making a total of 310 pounds per acre, containing approximately 8 1-3 pounds of nitrogen, 28 pounds of available phosphoric acid and 30 pounds of potash; or about 2.7 per cent. of nitrogen, 9 per cent. available phosphoric acid, and 9.6 per cent. potash. The nitrogen content is really too low in this formula, but we have made it so purposely, on account of the extravagant price of commercial nitrogen at present. If a ready-mixed brand of fertilizer is used, one conforming approximately to the above percentage composition should be selected.

### PAYING EMPLOYEE'S PHYSICIAN AND NURSE.

I worked for a sawmill company for two months during the summer of 1907, at \$2 per day. Their custom was to take 50c. off every man per month for doctor. They kept one dollar back from me for two months. I got sick, I went to the doctor, and he told me I had the fever. He said, "You're not going to work?" I said, "I am going home." He said, "The best thing you can do." He gave me some medicine, rice, and I went home. In a few days, I got worse. My brother telephoned for the doctor to come. He paid him \$15 for his trip. A week later he telephoned again. This time he said he couldn't possibly come, and to get another doctor. This he did. The new doctor came four times to see me. His bill is \$64. The company's doctor said I never would get better without a trained nurse, so he telegraphed and got me one from Toronto. Who is legally entitled to pay this expense, the sawmill company, the doctor whom the company had employed or myself?

**Ans.—**We would say that the doctor ought not to bear the expense in question; but, as between the company and yourself, we are unable to speak without further information respecting the company's practice in the past respecting such cases, and also as to anything further that there might be in the way of an arrangement between them and their employees. It might be advisable for you to treat it as a matter of course that they intend to assume the expense until you hear from them to the contrary; but, in the event of their definitely declining to do so, and before paying the amount yourself, we think you ought to consult a solicitor personally.
