QUESTIONS AND ANSWERS. Miscellaneous.

SPRAY FOR TURNIP APHIDS.

Would you please let me know what the
mixture is for spraying turnips to kill
lice?

FARMER.

Ans.—The spray to use is "kerosene
emulsion." The formula for this mix-
ture is: Kerosene, 2 gallons; rain water,
1 gallon; soap, ½ pound. Cut the soap
into thin slices, boil it in the water
until all dissolved, then turn into it the
kerosene and agitate it thoroughly for
about five minutes. This gives the stock
emulsion, which must be diluted with
nine times its measure of warm water
before applying. It is necessary in ap-
plying that the spray comes in actual
contact with the insects, as they are
killed by the clogging of their
spiracles or breathing pores. Spraying
is, therefore, not a very hopeful remedy
for turnip lice because of the difficulty
experienced in getting the spray directly
on the bodies of the aphids which cluster
in the axils of and on the underside of
the leaves and thus escape the prepara-
tion.

TUBERCULOSIS IN HENS.

Will you kindly tell me what is wrong
with my hens; also the cure? They be-
come lame, and very white about the
head. Several of them have lived all
summer this way, but many of them
died. They have not been shut up at
all.

W. R.

Ans.—It is more than likely that these
hens are suffering from tuberculosis, as
lameness and emaciation are two of the
surest clinical symptoms of this disease.
Post-mortem indications are enlarged
liver, lighter in color, and showing gray
or yellowish tubercles and a much dis-
tended spleen, caused by the tuberculous
growths. There is no cure for this dis-
ease. Kill and burn all those showing
symptoms, and thoroughly disinfect the
premises where the hens are kept. Send
a specimen to the Bacteriological Lab-
oratory of the Ontario Agricultural Col-
lege for examination if you wish to be
absolutely certain of the disease. Use
lime freely on the droppings. Keep the
young birds separated from the older
fowl.

GOSSIP.

OFF FOR CLYDESDALES.

Barber Bros., of Gatineau Point, Que.,
well known as importers of the best in
type, quality and breeding that are for
sale by the Clydesdale breeders of Scot-
land, intend leaving for the land of the
"Heather" about October 1st, for the
purchase of their 1911 importation of
stallions and fillies. The many past im-
portations of this popular firm have
proven of a class that showed most care-
ful selection, and by their high-class
quality have found a ready sale. We
are assured that in this lot Barber Bros.
will have many prizewinners if they can
be got. Parties interested will be con-
sulting their own interests by awaiting
the arrival of the 1911 importation.
Full particulars will appear in these col-
umns later.

PERHAPS NOT.

An instructor in a church school where
much attention was paid to sacred his-
tory, dwelt particularly on the phrase,
"And Enoch was not, for God took him."
So many times was this repeated
in connection with the death of Enoch
that he thought even the dullest pupil
would answer correctly when asked in
examination: State in the exact lan-
guage of the Bible what is said of
Enoch's death.
But this was the answer he got:
"Enoch was not what God took him
for."

A SIMPLE TWIST OF THE WRIST.

"You know Jones, who was reputed so
rich? Well, he died the other day, and
the only thing he left was an old Dutch
clock."
"Well, there's one good thing about it;
it won't be much trouble to wind up his
estate."

PROUD OF THEIR SHARPLES Tubular Cream Separators

Ask those who are discarding disk-filled and other complicated cream
separators for Tubulars why they do it.

They will tell you how much more Tubulars make for them. There is
cash value in the fact that Tubulars have twice the skimming force of others,
and therefore skim faster and twice as clean.

They will tell you of the unequalled durability of Tubulars. A
regular, hand-driven Tubular recently finished work equal to 100 years'
service in a five to eight cow dairy—and the total cost for oil and
repairs was only \$1.15. Tubulars wear a lifetime.
Guaranteed forever by the oldest separator concern
on this continent.

Dairy Tubulars contain neither disks nor other
contraptions and are self oiling.

When you see why others are discarding less modern separa-
tors for Tubulars, you will realize that you, yourself, will finally
have a Tubular and had better get it now. You cannot
afford any other, for Tubulars repeatedly pay for themselves
by saving what others lose.

You can see a Tubular for the asking. If you do not know
our local representative,
ask us his name. Write
