Install A Peerless Water System

And Have Fire Protection and City Conveniences Without City Taxes

Enjoy real comfort right where you are. Don't move to the city for city conveniences. Let the conveniences move to you. You can have water piped all over your house, barn and yard at a much smaller cost than if you lived in the city.

Peerless Water Supply System

Our system takes water right from your own well, creek or spring, filters and purifies it and brings it through your pipes with a force far greater than any city supply system ever could carry it to the individual property owner. It is as far superior to the elevated tank system as your up-to-date harvester is to the old-time cradle. It cannot overflow, leak, freeze or fall over. It's built *right* and *stays* right.

Just think of having hot and cold water right where you want it and when you want it by merely turning a faucet. Just think of the time, trouble and money a perfect water supply system would save you and your family in one year's time. And then let us tell you, without charging you one cent for the information, just how easily you can install our system without employing any outside help whatever.

The Peerless System consists of a pneumatic tank set in your cellar or buried in the ground and a pump to bring the water to the tank. The water is delivered under strong pressure from the tank to your kitchen, bathroom, yard and barn—in fact, wherever you want it. And there's always a ready supply on hand.

In addition to the conveniences which the Peerless System affords, it gives you fire protection and reduces insurance rates. This latter saving alone has in some cases paid for the entire system within two years.

Easy to Install and Easy to Operate

You don't have to be experienced in order to install our Peerless System. There's nothing complicated about it, and our instructions are so simple and thorough that you can't make a mistake. Our whole engineering department is at your service, and you'll not have to pay a cent for any help that we give you.

A little ten-year-old boy or girl can operate a Peerless System when it's once installed. It only requires about five minutes' attention each day. Think how much more time you put on your cistern pump and how much less satisfaction you get from it.

Your Money Back if Not Satisfied

You can't lose on the purchase of a Peerless Water Supply System. We will refund every cent you have paid on it if, after installing it and trying it out, you are not entirely satisfied.

We are the only concern in Canada in this line of business. We want to give the Canadian just as good water supply as he could get if he lived in any one of the biggest metropolitan cities in the world. And we can give it to him at a much smaller cost than he could get a similar system from any other foreign concern.

Write for free booklet today. It thoroughly describes the Peerless Water Supply Systems and tells how you can use either hand pump, electric power, gasoline engine or hot air engine, and the comparative cost of each.

We will make liberal discounts to first purchasers in any community in order to introduce our system. Once the friends of the first few purchasers see our system in operation, we will be kept busy supplying the demand at regular prices.

An inquiry will not place you under any obligations to purchase. Just fill out the coupon, mail today, and get an option on our special discount privilege.
