MEDICINE HAT FAIR.

The Medicine Hat's Agricultural held on October 1st and 2nd. association's accommodations taxed to contain the exhibits brought out. In a good many respects this year's show was the greatest yet held. The display of livestock, especially horses was large and good. Agricultural products, however, made perhaps the most sensational exhibit. A good many are imbued with the idea that Medicine Hat is a livestock country only, visitors entertaining such notions, the exhibit of grains, roots, vegetables and dairy products would come as an agreeable surprise, these things were exhibited here in larger quantity and in better quality than we have seen in a good many fairs in the West this fall. While it is impossible to discuss all departments as fully as we would like a portion of the awards made is here appended.

HORSES.

GENERAL PURPOSE. Pair of geldings or mares.—1, Robert McCutcheon; 2, A. McGillivray.

Standard Bred.- J. Harman. Roadsters.—Pair of geldings or mares in harness.—J. Alcock.

Foal.—1 and 2, Jas Johnston.

AGRICULTURAL CLASS. Pair of geldings or mares in harness.-r. E. A. Bell, 2, Jas. Johnston.

Fully or gelding.—1, E. A. Bell; 2, H.

A horse, cow or steer-any domestic animal-is, in a sense, what the breeder makes it. An inherited tendency toward heavy milking or capacity for fattening may be intensified by judicious management on the part of the feeder until succeeding generations excel the parent stock. The feeder can change an unthrifty animal into one that proves profitable. This developing of characteristics is made possible by the modern science of feeding as understood by up-to-date farmers. Hence the first twelve months in the life of a calf become of vital importance as largely determining its future usefulness. Now, to rightly develop a calf with large appetite, it's necessary to strengthen digestion so that increasing ration may be met by increasing appetite and no derangement result from over-feeding. To do this, give regularly, twice a day, small doses of

in the grain ration. This is the prescription of Dr. Hess (M.D., D.V.S.) and contains bitter tonics, iron for the blood and proper nitrates to cleanse the system. It acts upon the digestive organs, correcting any tendency toward indigestion and enabling the animal to assimilate great quantities of food; hence compels rapid growth and perma-

nently fixes the feeding habit.

Dr. Hess Stock Food gives increased appetite for roughage and, by aiding digestion, prevents much loss of nutriment in the manure. Corrects all minor stock ailments and costs but a penny a day for a horse, cow, hog or steer. Its ingredients are endorsed by Professors Quitman, Winslow and Finley Dun, the greatest medical writers of the age.

Sold on a written guarantee. Sold on a written guarantee.

Sold on a written guarantee.

100 lbs. \$7.00; 25 lb. pail \$2.00

Smaller quantities at a slight advance. Puty paid.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our government recognizes Dr. Hess Stock Food as a medicinal compound, and this paper is back of the guarantee.

Free from the latt of the of cach month—Dr. Hess (M.D., D.V.S.) will prescribe for your alling animals. You can have his 95-page Veterinary Book any time for the asking. Mention this paper.
