Mr. Charles Hughes of Denver, the most famous of the great mining lawyers of America, is Heinze's leading lawyer. Charlie Hughes is in the prime of life, and is without doubt one of the most scholarly and accomplished men that the great west has produced. He is the great-est master at cross-examining a witness I have ever seen except Lord Charles Rus-sell, and in lucidity of argument and in clearness and simplicity in presentation of facts he seems to me fully the peer of the great English chief justice. No fallacy or sophism can survive the probing and dis-secting of this great American lawyer. In his hands the enemy's witnesses become

stern. He has not begun the war on the Anaconda people yet, for the fight is too

stern. He has not begin in ewar on the Anaconda people yet, for the fight is too keen and pressing in other parts of the field, and though he retains 18 high priced attorneys, he has not been able to use any of them yet for an attack on Ana-conda proper. But Heinze is now giving Marcus Daly more than enough to do. I have already told how Hefnzz secured the Nipper. It was one of those properties which he fancied when he began his policy of ex-pansion. The owners were only too glad to sell, and even Marcus Daly, who held 5-38 for the Daly-Hagin syndicate agreed to let that go at the rate at which the others sold, which was \$150,000 in explo-ration and development, and thereby opened up a five million dollar mine. Dury ing the process of development Daly far formed the agent that he had sent on the deed for that interest was never forth-coming. There was delay on the part of the way York, but somehow the deed for that interest was never forth-coming. There was delay on the part of the the Marcus Daly may for any difference of the sonicities interest to the signed in New York, but somehow the deed for that interest was never forth-coming. There was delay on the part of the Marcus Daly and when the signed in New York, but somehow the deed for the syndicites interest to the signed in New York, but somehow the deed for the syndicites interest to the signed in New York, but somehow the deed for that interest was never forth-coming. There was delay on the part of the Marcus Daly, and when there the Hagin or Mr. Daly, and when there the Hagin or Mr. Daly, and when the signed in New York, but somehow the deed for that interest was never forth-coming. There was delay on the part of the Marcus Daly and he did not believe the Sullivan as worth intrinsically the proverbial grami tas the field complacent of the Marcus Daly and when at the therefore, smiled complacent to the Marcus Daly and when the the Marcus Daly and when the the Marcus Daly and when the that interest was never forth-the the Marcus Daly and when the

deed for that interest was never forth coming. There was delay on the part of either Mr. Haggin or Mr. Daly, and when Heinze's money had opened up a five mil-lion dollar mine, there was no difficulty in resudicting the promise to sell in repudiating the promise to sell.

n repudiating the promise to sell. The Nipper lode is proven to be the the deed. It had to go to New York for

west extension of the Anaconda. Daly always thought the Anaconda lode went through the Odin, a claim to the south through the Odin the through an extended to the Odin the through the Odin the through the through the through the other through the Odin the through t always thought the Anaconda lode went through the Qdin, a claim to the south of the Nipper, and through an extraording in the Endocontants heard of it. Anaconda But while endocontant the Grandy ametter, provided Jay P. Graves gives a water supply on reasoniter here adole of anget threas, he neglected to accertain the truth. ress in the Camp. Republic, Oct. 7.—The Princess Maud wuze is now 68 ieet, being sunk from the 245-foot level. 'They are sinking through solid quartz, which has the live, sparkling look of the Republic's rich ore. Free gold is visible to the eye, scattered here and there over the white surface Under the glass the free gold shows up wonderfully well, and anything is possible in the mine. They are now sacking very rich ore, intending to ship. The superin-tendent feels rather comfortable over the with the government commissioner, administer justice, and do it well, accord-ing to the laws under which they are forced to work. These laws are what make the trouble at Cape Nome. Never did a mining excitement prove so thor-oughly the injustice of the United States mining regulations as this boom. By the did a mining excitement prove so thor-oughly the injustice of the United States mining regulations as this boom. By the flaw in the regulations which permits a endent feels rather comfortable over the tendent feels rather comfortable over the state of affairs. The Surprise is more than holding her own, the six-foot face averaging \$164 per ton, and work is being pushed rapidly. The Republic winze is carrying its usual satisfactory values, and the big No. 1 tunnel is going ahead with its usual rapid land is assigned to each miner actually washing for gold, but back of that, where tunnel is going ahead with its usual rapid speed.
President Phil Aspinnal, president of the Butte & Boston, has been here several days looking over the property, with a view to determine future developments.
S. W. Hall of Rossland, who is superintendent of the Guelph, Morning Glory and Strayhorse, spent several days looking over the several properties and the best and most expeditious manner for their development. Before leaving he evidently soutlined future work and developments.
A tunnel, with double shifts, is now being run on the Hillside claim, near the Mountain Lion, and it is expected that the ledge will be cut within the next 15 days.
