# Correspondence.

Black Brook, 29th Oct., 1881. MESSES ANSLOW Sirs: -It is now some months since I

had this pleasure, and would often avail myself of it but my absence seriously interferes with my doing so. I returned the other day here to find ousiness in our little town booming. I may now call it a town, as it has some 40 and two daughters, with a portion of to 50 buildings as dwelling houses, several stores, ice houses, lobster and smelt Factories. One of our largest stores is owned and occupied by that enterprising firm known as Messrs. A. & R. Loggie &

place; they are also brothers of the Chat-

ham Councillor; take this family as a

To give you an idea as to what extent

whole they are a wonderful family.

this first named firm has grown to, I may say it was only some 4 or 5 years ago they were the pioneers of our smelt trade, and only did their business on the Napan River, as that year a man was considered a lunatic if he said a smelt could be taken a lunatic if he said a smell could be taken with a bag net in the Main Miramichi. To-day, only the 4th year of the smelt business this firm has been so successful that they have had Messrs. Guy, Bevan & Co's mill at this place sawing shooks for over six weeks for their business in smelt alone. They have now 30,000 smelt shooks cut and dried, the latter word dried means a saving in Railway freight of 60,000 lbs., or \$600.00 worth of carriage, an item in itself. One-third of these shooks have been shipped to Pokecent. more than smelt taken in the Mira-Meeting of Parliament.

Our Ontario exchanges state that it is season this enterprising firm had their generally understood that the Dominion smelt in the New York market a fortnight Parliament will meet either on the 7th or loth of January. the officer at Bathurst, from whence they were shipped. This firm has also its lobster factory at Pokemouche, a freezer in which they freeze large quantities of fall bass, also for winter shipment. Turning to Black Brook we find this firm has erected a large building where y will have all their frozen smelt classified under the der their own eye for market. Last year during the boom in smelt, buyers bought tomcods, lumps of ice, in fact everything that could be conveniently packed out of sight, this year this will be checked uner the above inspection. The 30,000 shooks I mentioned this firm has ready for this husiness represents 1,250,000 lbs. smelts when they are made and filled, or a carload every working day from the opening of the smelt season. You can, Messrs. Editors, calculate what a profit of 1 cent per pound will cover transaction, it will be just \$12,500. If the product realizes what they did last season there will have to be spent and the fishermen some 200 per cent. more

from this firm alone. Now, this firm de

not confine their business to smelt only,

they are always ready for any speculation,
