LIFE WAS A MISERY TO HER

Says this Woman Until Relieved by Lydia E. Pinkham's Vegetable Compound.

Owen Sound, Ont.—"I suffered for ten years with female organic trouble, neuralgia and indigestion, and was weak and had such bad pains I could hardly walk or stand up at times. When I would sweep I would have to go and lie down. I could not sleep at night, and would wander around the house half the time. I tried everything but nothing did me any good, and the last doctor I had told me he never expected me to be on my feet again or able to do a day's work. One day one of your little books was left at my door and my husband said I should try a bottle of Lydia E. Pinkham's Vegetable Compound. I thank God I did, for it cured me, and I am now well and strong. I think there is no remedy like the Vegetable Compound for anyone who has my troubles, and have recommended it to my neighbors. You can publish my letter for the benefit of those I can't reach."

—Mrs. HENRY A. MITCHELL, 1767 1/2 Ave., East, Owen Sound, Ont.

If you have any symptom about which you would like to know write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice given free of charge.

Preparing Grains For Fall Fairs

It pays to advertise. There is no better advertisement than to be a prize winner at the Fall Fair and no crop on the farm can be exhibited to better advantage than the cereal crop. To attain the best results, a special plot should be maintained and kept thoroughly clean, free from weeds and all impurities. Harvesting should be done by hand, keeping the sheaves as neat and straight as possible.

First and foremost the grain in the sheaf must not be weathered, it must be perfectly dry and of good colour. The best results are obtained by the use of slightly immature straw, as it will be found to be less brittle and easier to handle. The straw should be spread in thin layers in the sun to dry; the sun will bleach the straw as well as dry it. Use only straight, uniform straws to make the sheaf; two or three sheaves should be collected in the field to allow for waste.

The majority of persons have the idea that all should be placed on the same level. This would give us the square head in which, when tied, the majority of the straws would break off below the head. The ideal rounded head with, The ideal sheaf has a rounded head with a gradual curve. This rounded head is procured by allowing the central straws to stand a little higher than the surrounding straws and each layer of heads that are added, to gradually slope away from the centre. The large sheaf may be conveniently formed by first making a number of small sheaves and then placing them together as though they were individual heads. Gradually sloping them off in the same manner. To finish the sheaf a layer of individual heads should be placed around the whole producing a finished exhibition sheaf. All the loose leaves should be plucked off the outside of the sheaf with a jack-knife leaving only the white shining straws, and all heads that do not conform to the symmetry of the head be cut off, leaving a perfect sheaf. Colored ribbon about 1/4 to 3/8 inches wide may be used with good effect to cover the binding strings.

The remainder of the plot should be threshed by hand. This will form the bulk sample for the Fair. If the plot was kept pure in the field there will be very little that will need to be done to the threshed sample. A good fanning mill will remove all broken and small kernels, all chaff and dirt. The fanning mill must be clean, many an excellent sample has been ruined by a dirty fanning mill. Thoroughness is the secret of a good sample, the fanning mill should not be spared even if it means fanning away 50% of the original sample.

The bulk sample may be double bagged for shipping to the Fair. The sheaf should be shipped in a box, 14 inches longer and 1-3 inches broader and deeper than the sheaf. The sheaf should be wrapped in paper and tied, fitted into the box and kept in position by supports.

With our present day standards always improving, great care must be taken in preparing the exhibits for our Fall Fairs. No prize will be won by the farmer who puts up a rough sheaf or a poor sample. The secret of success is thoroughness.

MILL SAW BILLS

The Advocate Office has just finished printing a stock of the latest Mill Saw Bills, which was drafted up by the Mill owners on the Miramichi River. This Saw Bill is suitable for any mill on the river and we are now prepared to supply them to all desiring same.

CLIMBING THE CANADIAN ALPS

The Yoho Glacier near Field, B.C., is a Beautiful Sight for the Climber.

Sections of the Alpine Club of Canada in all parts of the Dominion have received the anniversary message of the director, Arthur O. Wheeler, interprovincial boundary survey commissioner for B.C. There is much in this document of special interest to members of the club, but there is also a great deal which affects the general public, since it looks forward to a greatly increased tide of summer travel into the fastnesses of the great hills.

The director's message opens with comments on the prosperous standing of the club and the success of the camp at Yoho lake last summer. Thanks are also tendered to many who helped to make the camp successful. Mention is made of renewed photographic activities in the mountains and of the fact that the challenge cup for competition by amateur photographers was won last summer by Dr. H. E. Buley of Edmonton.

With reference to the erection of a suitable memorial to the soldiers members of the Alpine club, the director says: "It is decided to do this on two separate lines, first, to place a record of all our members on military service, and particularly those who have joined the supreme honor roll on the club house grounds at Banff, and second, the erection of a hut above timber line at some serviceable place in the Canadian Rockies for the use of our members and possibly the public who are inter-

ested in making mountain climbs." With reference to independent mountaineering during the past year mention is made of the first ascent of Mt. King George, and several other peaks of the Royal Group, lying in a hitherto unexplored district fifty miles southwest of Banff. Mt. Sir Douglas and Mt. Joffre were also climbed for the first time last summer.

After some comment on the Banff winter carnival, in which the Alpine club takes an active interest, having been donors of a challenge cup for hockey, the director takes up the matter of the forthcoming "Welcome Home" camp to be held at Mt. Assiniboine from July 20th to 31st, 1920. At this camp more than 300 people will be placed under canvas and the special feature will be the fact that all returned members will attend as guests of the club. The camp will be situated three days' journey from the railroad and transportation of baggage will be by a specially organized pack train known as the "Alpine club pack train." Of special interest to the general public is the fact that this pack train will be in operation throughout the summer and anyone wishing to make a really interesting trip into the heart of the mountains can do so at a minimum expense. The camp at Mt. Assiniboine and the "Overnight Camps" on the way thither from Banff will be open to the public from the first of July until

the end of September, except during the two weeks when they will be occupied by members of the Alpine club. At any time during the summer, walking tours may be taken to Mount Assiniboine and these camps will be open to furnish good meals and a bed to the tramp at the end of his day's journey. There is only one way to really see the mountain and that is on foot, but so far this pleasure has been confined to the very few, on account of the difficulty of carrying food and bedding. Those difficulties are now to be removed and it is planned in coming years to arrange many such walking and riding tours for the benefit of the public.

In conclusion the director quotes the verses of a gifted Calgary poetess, Miss Marian L. Moodie:

Oh wind that comes out of the West,
the land of the sunset skies,
Where far o'er yon mountain's crest
those glorious colors rise,
You bring me the fragrance of pine,
the coolness of mountain snow,
The music of falling streams by the
hills where the lilies grow.

Oh wind that comes out of the West,
you sigh on your way to the plain.
The mountain land is the best. Will
you not come back again?
Glow skies with your golden light,
Blow softly wind from the hill,
For my heart has a longing tonight,
that only the mountains can fill.
