

Electricity for Everyone

Those who are forced to do without electric light and other conveniences of electricity, because they live far from a source of electric power, may now get all these things fulfilled by the use of a Westinghouse Self-Contained Lighting Plant.

This apparatus is a complete little generating equipment which supplies sufficient electricity for the average home and can be operated simply and economically.

It is easy to operate and there are thousands of homes which should be enjoying the advantages of this wonderful Westinghouse Lighting Plant.

Greece Wants Arbitration Otherwise War Goes On.

Members Win Quebec Province -- Opposition Sweep Montreal -- French Will Operate German Railroads -- Ismet Pasha in More Conciliatory Mood.

LAUSANNE, Feb. 5. Premier Venizelos of Greece returned to the Associated Press Bureau, said, "If Turkey will agree to some independent arrangement with Greece concerning mutual claims, or agree to its submission to some form of arbitration, then we will consider state of war terminated. All other matters with Turkey settled; but if Turkey insists on operations from Greece without making us for damages caused by more than one million Greeks driven from Asia Minor, then Greece must make that the war go on. It is my duty to say."

MONTEREAL, Feb. 6. Government of Premier Taschereau was returned to power in the general elections to-day, with a sweeping majority. With one exception out of the Liberal sixty-two and the Opposition thirty. The feature of the election was the sweeping victory of the Union in the Island of Montreal.

LONDON, Feb. 5. General Weir and Minister of Public Works Letrocoeur, accompanied by railroad experts, are on their way from Paris to Ruhr, to formulate plans for handling the railroads, in the occupied territory without the aid of Germans. Workmen in the Coal Mines in the Sarre Valley, taken over by the French in compensation for the running by the Germans of the mines in North France during the war, have struck because of the refusal by the governing Commission to double their wages. The mines produce nine million tons yearly. The French continue to take into custody or deport Germans guilty of subversive measures against occupation authorities.

NEW HOPE, PARIS, Feb. 6. M. Bompard, head of the French delegation at Lausanne, held a long talk with Ismet Pasha before leaving for Paris, the details of which he telegraphed to Premier Poincare, who received his message late this afternoon. Ismet was more completely informed of the intentions of the Allies in the event settlement was not reached. He did not persist in his uncompromising attitude of last night and accepted the text of the capitulations previously submitted to him, thus removing the only obstacle to the signature of the treaty. The reservations of the Turks on other points, such as Mosul, have already been accepted by the Allies. Premier Poincare hastened to transmit this favor-

Newfoundlander Plans Herring Oil Refinery.

F. HOWLETT TO FLOAT COMPANIES TO CONDUCT THIS INDUSTRY—GOOD MARKET FOR OIL.

Mr. F. Howlett is making satisfactory progress with his project to establish three or four plants in Newfoundland for refining herring livers into pure oil in the same way as cod oil livers are treated. The samples of herring oil which he sent to New York and Boston to prominent fish oil dealers and soap manufacturers have been favorably reported on and Mr. Morton who is the principal of a large cod oil firm in Boston offers to take 50,000 barrels next year if it can be supplied as per sample sent. The price is about the same as cod oil just now and will be influenced by that market as herring oil is used for about the same purposes as cod oil. The price then will range from 50 to 70 cents a gallon.

Heretofore, all the herring livers at the big packing centres have been thrown out during the herring season and only a small percentage of the herring livers saved to make oil. This product was sent out to market in the old-time crude rotted state. Mr. Howlett has a patented process by which the impurities can be eliminated and, by machine pressure, is able to render out a beautiful clear, almost odorless, product of a straw color, the very appearance of which easily helps to make a sale. Besides this there are the by-products of meal for cattle and fertilizer which average about five cents a pound.

Mr. Howlett hopes to have a small company formed the coming season and will start factories at Bay of Islands, probably two, one at Springdale and a fourth at some location where herring are also plentiful. It has been found that herring oil, properly refined is the best to use in lubricating very fine machinery and it is sought for now exclusively for chronometers and other nautical instruments.

As to the meal and fertilizer made from the residue of the livers, there should be an unlimited market for it. Mr. J. D. Davies is now making an analysis of this by-product for Mr. Howlett, who hopes to get big orders to supply the market as soon as the merits of his product are made known.—Trade Review.

Wireless Marriage Illegal

The United States Attorney-General has given his opinion that marriages by wireless is not legal. A San Francisco clergyman was to have broadcast the marriage ritual to the contracting parties in New York City, whose responses in turn were to have been broadcast back so that the entire continent might "listen-in" on the ceremony. "I am of the opinion," ruled Charles O. Newton, the Attorney-General, "that any attempt by a clergyman or magistrate to perform a marriage ceremony without being actually present with the contracting parties, witness or witnesses, would not comply with the mandate of the statutes of New York State."

Have you tried MRS. STEWART'S Graham Bread?

He Got The Job. "Why, look here," said the shopman who wanted an errand boy, "aren't you the same lad who was in here a week ago?" "Yes, sir." "I thought so. And didn't I tell you then that I wanted an older boy?" "Yes, sir. That's why I've come back. I'm older now."

Bad Breath Overcome

"Bad breath is a sign of decayed teeth, foul stomach or unclean bowels." If your teeth are good, look to your digestive organs at once. Get Seigel's Curative Syrup drugists. 15 to 30 drops after meals, clean up your food passage and stop the bad breath odor. 50c. and \$1.00 Bottles. Do not buy substitutes. Get the genuine.

The Peace of Utrecht.

The final stage of the long war of the Spanish Succession opened on January 18, 1713, on which day the peace conference began at Utrecht. Hostilities continued, indeed, languidly, but the Duke of Marlborough had been dismissed from his command, and all vigorous had departed with him. Ultimately peace was signed on March 21, 1713 (old style, April 11, new style) by France and England, and all the other participants, except Germany. At the time, the treaty was derided fiercely by the Whig party; but upon the whole there is not much difference of opinion among posterity as to the wisdom of the settlement. The motives of the English statesmen by whom the measure was carried to success, may well be questioned, and the whole policy that was responsible for the war equally may be condemned by those who regard, before all other things, the interests of the British people. But when it is asked, simply and directly, whether the English statesmen could have done better than to accept a peace even on the terms gained, there can be no answer but that little or nothing could have been obtained for British interests never had been concerned deeply in the war; and every year of its continuance had involved them in new and profitless sacrifices. In fine, while the Peace of Utrecht brought no glory to the English statesmen by whom it was arranged, the verdict of history must be that they acted reasonably. Better than the indefinite prolongation of the war; and it may be asserted with truth that the manner in which the peace was concluded was more open to objection than the peace itself.

Why Ice Floats.

Almost everything gets bigger when it is heated and smaller when it is cooled, and in the ordinary course of events water does exactly the same thing. But the strange point is that if you cool water to seven degrees above freezing point it stops getting smaller and begins to expand, continuing to do so until it becomes ice. That, of course, is why ice always occupies more space than the water from which it is made, and so easily bursts jugs and water pipes. It also explains why ice floats in water. But if water followed the general rule, and got continually smaller as it grew colder, ice would be heavier than water and would form at the bottom of ponds, rivers and seas until it reached the top.

Curious Armor Used in South Seas.

Perhaps the strangest and rarest armor in the world is that once used by the Gilbert Islanders in the South Seas, the only branch of the Polynesian people who ever reached the height of producing a coat of mail. The armor, of which only a few examples remain, consist of an undergarment covering the legs, body and back of the head, and a breastplate. The under part is woven from the coarse, hairy cover of the cocoon. The skin of the ray fish, which dries almost as hard as steel but which is

"Robbing Peter to Pay Paul."

This saying had its origin in the rivalry between St. Peter's Cathedral, now Westminster Abbey, and St. Paul's when, in 1550, an appropriation was made from St. Peter's to make good a deficiency in the accounts of St. Paul's. Much opposition was shown to this, and it was for the time a popular outcry, "Why rob Peter to pay Paul?" The saying was revived as a proverb upon the death of William Pitt Earl of Chatham, in 1778. The City of London argued that so illustrious a statesman should be buried in St. Paul's; while Parliament held that the remains of so great a leader should be placed with the dust of kings, and that to bury him away from the Abbey of Westminster would be again a robbing of Peter to pay Paul.

Burns Vaseline Petroleum Jelly Burns are very painful and dangerous, and if not treated promptly and properly, are in danger of poisoning. They will also leave disfiguring scars if not guarded against. Vaseline Petroleum Jelly is a dependable remedy which gives quick relief to the burned skin, stops the pain, and keeps out the air, allowing the burn to heal properly. It is also valuable in the treatment of wounds, sprains, skin diseases, chilblains, etc., and, taken internally, for coughs, colds, sore throat, etc. It should be always on hand—in every home and on every vessel—for emergencies. Start a Medicine Chest with a liberal supply of "Vaseline" Petroleum Jelly and the other "Vaseline" preparations shown here on the lid of the chest. Sold at all drug and general stores. Chasebrough Manufacturing Company, New York City. W. G. M. Shepard, Distributor, 137 McGill St., Montreal, Canada. The Medicine Chest
