BASEBALL.

HAMILTON DROPS TWO TO GALT. Hamilton, Aug. 6.—Two baseball matches in the Canadian Western League series were played at Dundurn Park between Galt and Hamilton teams. The morning game was a very one-sided affair, and resulted in a bollow victory for Galt.

The afternoon game was close and exciting throughout, but the visitors by playing a faultless game were again victorious. The home team made more hits, but their errors were costly. Score:

| R. H. E. | 2 6 0 | Hamilton | 1 9 5 | Batteries—Lomas and Baker; | Burnett and Cockman.

NOTES OF THE GUELPH GAME. Carney's father accompanied him to Guelph and had the pleasure of seeing his son pitch the best game of ball played in many a season on the Guelph grounds. The latter club were loud in their praise of his

effective work in the box. O'Connor, the Guelph's first baseman of last season, was on the grounds. He has just returned from the Southern League. Guelph leaves today for a three days' trip

to Cobourg, Port Hope and Lindsay.

Thorpe's throwing to second was beautiful. He caught Bradford and McElroy in succession in the fourth.

The fifth includ was very disastrous. Hiscott threw wild off Powers' hit. The two batters were easily retired. Downs gave the Alerts a chance to retire | scores): the side by placing a high fly to left center. Ball and Hynd can for it and allowed it to drop. It was the tormer's ball, and be said after the game that he should have taken it. Congalton drove a line grounder to Farnworth, who allowed it to rol! through his legs, the batter going the rounds of the bases before the ball was returned. A single and a triple followed. Not one run

should have scored. Hiscott usually throws pretty well, but his eye and arm must have lest their judgment. Both throws to first were from the same distance and thrown in underhand

in the eighth, but could do nothing but a slow hit to Congalton. He had three balls and one strike called on him when he hit

Guelph has very bad accommodation for newspaper men to score a game.

Daddy Dewns is the "king" in Guelph. He could do nothing with Carney's de-

livery.
Snyder, for Guelph, covered a let of ground and threw finely to first. Guelph eclipsed London by their excel-

lent fielding. One hundred and ninty-six tiekets for Guelph were sold from Lendon.

Dyson's umpiring was faultess. Not one decision was disputed. There is a possibility of London still winning the pennant. Guelph has three games to play, one with Hamilton and two

with London. Guelph is scheduled to play in London on Saturday, but claim that arrangements were made with Weber at Galt to play two games in London on civic holiday. The Alerts have arranged with the D. A. C. of Detroit for the latter date. They refused yesterday to come to London on Saturday, but will likely have to fill out the date, as it is the regularly scheduled

It is estimated that capital and labor would lose \$3,000,000 a day were all railroads in this country blockaded by a strike

PROFESSOR Dolbear declares that electricity is not in its infancy and that there is nothing in its present use that has not been known for years. THE most remarkable formations of frost

known to the meteorologist are found on Mount Washington, where the crystals are often a foot long. THE last criminals who were beheaded in

England were the Cato street conspirators in 1820, though they had previously been killed by hanging. IF man had been limited to the use of his

natural weapons of defense he would long since have been beaten out of the contest by the animal kingdom. MRS. DOLLY PENTREATH, who died in

the village of Mousehale, on Mount's Bay, in 1788, aged 102, was the last person who spoke the Cornish language. MUSCLES of the eyes, ears and nose show

that several groups, which in the lower animals are very highly developed, in man are in an almost rudimentary condition. GLUCK's life was made a burden by musical squabbles. He was a peaceable man, but it was his misfortune to be con-

stantly mixed up in the broils of his admirers and their opponents. SWEDEN is the most Protestant country in the world. Out of a population of 6.000.000 but 2.000 are Roman Cathelics. The remainder belong almost exclusively to

the Intheran church. IT Is asserted that James T. Hightower, a loom repairer in the Warsaw (Ill.) woolen mills, has not slept for eighteen years. He goes to bed and experiences a sensation of sleepiness but never closes his eyes.

An ingenious Pittsburger has devised a clothes wringer which is operated by electricity. It works automatically, and when the last piece is squeezed out a bell rings and the washtub is turned over and CHINA'S imperial canal is the largest in

he world and the greatest in point of traffic. Its length is 2,100 miles, and it connects 41 cities situated on its banks. It was completed in 1350, after 600 years spent in its construction. Most deaf persons hear better in the

midst of a moderate din than when it is quiet around them. The noise of the cars in travel or the whirr of machinery in mills helps to make up the volume of sound necessary to reach their impaired organs.

Over 4,000,000 hectares were raised last year, being twice as much as of oats and four times as much as of wheat. Prussia makes over 1,000,000 tons of beet sugar. All Must Go. and yields one-half the world's supply of

ZEKE CLOTTS, of Mobile, Ala., is the owner of an ox with a natural knot in the middle of his tail. Several veterinary surgeons have tried to untie it, but their efforts caused the animal to emit a strange hoarse cry. The tail is so shortened by the knot that it is practically valueless to switch off flies.

THOSE swimming wild hogs of Arizona are doubtless of the razor-back variety seen in the pine forests on the eastern shore of Maryland. They are fleet beasts, the razorback hogs of Maryland, and good swimmers, as are all lean swine. Fat swine float admirably, but when they swim their snarp fore hoofs dig cruelly into the hanging flesh of the breast and neck and the swimmer is sometimes exhausted from loss of blood.

A FISH exerts its great propulsive power who want them are enicined not to delay.

Those portant instence played this alternoon in the singles. The Parker-Landreth match with its tail, not its fins. The paddle wheel was very pretty tennis to watch, although was made on the fin theory of propulsion. and the screw propeller had its origin in noting the action of the tail. It is now shown that the fins of the tail actually perform the evolutions described by the propeller blades, and that the fish in its sinuous motion through the water depends on the torsional action of the tail to give it power.

> The Graves of Royal Dogs. (From the St. Louis Republic.)

One of the most interesting spots in the mmediate vicinity of Windsor Castle, the summer residence of Queen Victoria, is the celebrated "Graveyard for Royal Dogs." It seems that Victoria's husband, the late Prince Albert, was passionately fond of dogs, and from the inscriptions on the largest of the "monuments" in this royal canine burial ground, it is to be inferred that the Prince was the first to mourn the hardened and fossilized by the lapse of loss of a favorite four-footed companion. The inscription on the slab in question is as

> MAURICE, Favorite Mount St. Bernard H. R. H. the Prince Consort, Died November, 1864.

Near by is the grave of "Prince, Scotch terrier, died Feb. 6, 1874," and a little further on is a slab marked "Nellie, mother to Bess, Flora and Sailor; died Oct. 12. 1886." Another little marble slab, about one foot in length, near the grave of Nellie, informs the reader of the inscription that it marks the last resting place

of "Mina, daughter of Corran and Princess; born February, 1869, died February, 1873." Within a few paces of the grave of Mina is a slab erected "To the memory of Dot, granddaughter of Corran; died May 3, 1881, aged 9 years." Maurice was the favorite of the Prince Consort, "Gipsy" of the Queen herself. The little monument over Gipsy's grave says that she "died March 15, 1868."
