She could not, however, find any fault with Shirley today for failing in prompt-ness, and they started forth with a mem-orandum that would have appalled many

Poor Shirley found, long before the day was half over, that she would have to exercise great patience and forbearance if there was to be a whole week of work like this before her.

Madame was a great bargain-hunter, and wanted the best there was to be had in the market for the least possible from store to store they traveled.

Jooking over goods of every description, often going back to take the articles they had first examined, and making the weary clerks pull down their nicely fold-ed fahries the second time.

weary clerks pull down their nicely fold-ed fabrics the second time. Besides this, madame did not strive to conceal her eccentricities anywhere, and her sharp tongue spared no one. At first the salesmen were good-natured, and seemed disposed to regard her indulgently, appearing to be amused by her peculiarities rather than offended by her peculiarities rather than offended by her bluntness, which, to Shirley's sen-sitive ears and ideas of good breeding, was often very offensive. But she at last worried almost every-body out, while her gentle attendant often blushed at her rudeness, and longed to apologize for her harsh remarks, ex-periencing also almost a sense of per-sonal guilt, as if she were in some way accountable for her behavior.

scountable for her behavior. Shirley found herself thoroughly wearled out when night came, but thankful that the day was done, and, con-sequently, with one less such experience to be endured.

to be endured. Madame Marton always retired very early, so, in spite of her trying day, Shir-ley had the evenings to look forward to, for they always brought Clifton, who made the most of this last week of grace. They tried to be brave and cheerful, each for the sake of the other, but it was no light thing to feel that they were about to be separated for an indefinite period.

"You do trust me implicitly, my darl-ing?" Clifton exclaimed, interrupting her. "You are sure there Is not a doubt in your mind regarding my fidelity to you?" "Not one, Clifton," the fond girl an-swered. "Are we not one, in heart and soul, and shall I doubt myself?" Clif." "Well, dear, it proclaims that you are mine, and so I am happy," the fond lover tenderly returned. Then, with a last farewell, they separated. The next morning Madame Marton and Shirley left for St. Sauveur; and about ten o'clock Hamilton Vining, on entering his office, found a note, addressed in a familiar hand, lying on his desk. Eagerly opening it he read: "Dear Vining,-My adorable aunt left New York for St. Sauveur this a.m. The pretty and dangerous sewing-girl accom-panied her as companion. We are now ready for the second act in our domestic drama, eh? Yours, WM. NOFWOOD." A satisfied smile broke over Mr. Vining's face as he finished reading this pithy epistle. pistle

"Now, if Clifton will only fall into the other trap as readily as the girl did into this, that disagreeable business will soon be very comfortably settled." What the other 'trap' was will soon appear. One morning, about a week following the departure of Shirley for Canada. Mr. Norwood was very late in getting to his office. He looked unusually grave and preoc-cupied, and responded absently to Clif-ton's cheerful "Good-morning." The young man had just received a letter from his betrothed, and was in the best of spirits, for Shirley had written in a bright and cheerful strain, and he believed her to be happy in her new posi-tion.

Mr Norwood seated himself at his desk and began to open the numerous letters which the morning's mail had brought to him, making notes as he went along on such as demanded special attention.

He did not speak once while thus en-gaged, and Clifton wondered what was passing in his mind, for usually he was very social, and kept up a running fire

very social, and kept up a running fire of comments upon his correspondence. But, finally, after the last missive had been disposed of, he pushed the pile away from him with a sigh of relief, and lean-ed back in his chair to rest. "There was quite a budget this morn-ing," Clifton remarked, as he glanced up from his work. "Yes; it seems as if they get more numerous every day, and some of them amount to but very little," Mr. Norwood gravely replied. Then, after a few mo-ment of thought, he resumed: "Clif, this royalty business is bothering us again, and I don't see that there is any way out of it but for me to make a trip abroad and give the matter my personal atten-tion."

and give the matter my personal atten-tion." "Is that so?" the young man inquired, in a tone of interest. "Yes, and I want you to go with me." replied his companion, shooting a quick, searching glance at his young secretary. Clifton looked astonished, and paled slightly at the proposition. His first thought was of Shirley. Could he make up his mind to let three thousand miles of ocean divide them? It was a long distance, and it would take more than a week to reach her in the event of anything happening. "The proposal surprises you," continued Mr. Norwood, his keen eyes still reading that thoughtful face. "I supposed it would, but it will be a good opportunity for you to learn something of the world, while I do not see how I am going to get along without you."
