THE CAMBERS AND THE PRICE AND THE STATES.

THE CAMBBERS AND THE PRICE AND THE

It is a matter of regret that the initation extended by the Legislative vitation extended by the Legislative Assembly to make a proper enquiry into the facts of the case has not been accepted, but that, as above stated, the advisers of His Excellency have declared their policy without investigation. It is equally a matter of regret that Parliament is apparently about to be asked to legislate without investigation. It is with all deference with a course seems to submitted that such a course seems to be quite incapable of reasonable jusbe quite incapable of reasonable justification and must create the conviction that the educational interests of the Province of Manitoba are being dealt with in a hostile and peremitory way, by a tribunal whose members have not approached the subject in a judicial spirit or taken the proceedings necessary to enable them to form a proper opinion upon the merits

of the question.

The enquiry asked for by the reply of the Legislature to the remedial order should in the opinion of the undersigned be again earnestly invitation.

To that end every possible effort has been put forth and every possible pecuniary sacrifice made in order that there might be established a school system based upon sound principles and equipped and administered in accordance with approved modern educational methods. Though very much to be accomplished, it may remains to be accomplished, it may be fairly asserted that a reasonable measure of success has attended the efforts which have thus been put forth. In amending the law from time to time and in administering the system it is the earnest desire to remedy every well-founded grievance and to remove every appearance of inequality or in-justice that may be brought to notice. With a view to so doing the Govern-ment and Legislature will always be ready to consider any complaint that may be made in a spirit of fairness

to conclude that by leaving the question to be so dealt with the truest interests of the minority will be better served than by an attempt to establish a system of Separate schools by corecive legislation.

corecive legislation.
Such a system, discredited as it is.
will be from the outset crippled by reason of insufficient pecuniary support
and ineffective educational equipment. and will be an injury rather than a benefit to those whom it is intended All of which is respectfully submit-
