

greater is the work of those who devote their lives to leading men and women of both races to become citizens of the Kingdom of God. All these facts were forcibly brought home to the minds of those who visited Pointe-aux-Trembles on the occasion of the installation of Mr. Brandt. It seemed a rather fortunate coincidence that the Rev. J. E. Duclos, of Valleyfield, a French-Canadian, should be Moderator of the Scotch-Irish Presbytery of Montreal.

These schools are beautifully situated on the bank of the St. Lawrence about ten miles from the city. The surroundings and furnishing of the buildings make this a very home-like spot.

The attendance at present is about 165 pupils, over which are placed six teachers. The systematic method of carrying out the time-table is in itself a valuable education to those who are privileged to attend. The installation ceremonies were profitable to all who were present, especially to those of us who attended to do honour to our former fellow-student and that we might speak intelligently of the work that is carried on in these schools.

The sermon by the Moderator was from the text, "The glory of a young man is his strength." The preacher clearly showed the value of a strong Christian character, illustrating his points by several examples of young men in Bible history. Among those who took part in the programme were the Revs. Dr. MacVicar, who delivered the charge to the new Principal, Dr. Coussirat, Dr. Amaron, S. J. Taylor, G. C. Heine and I. P. Bruneau. The splendid singing of the pupils helped to make the meeting a most interesting one.

Other ministers present were Revs. J. Patterson, Dr. MacKay, V. de Genova, J. L. Morin, J. L. George, W. D. Reid and R. P. Duclos, of Montreal.

The life and work of the late Principal Bourgoïn and of Father Chiniquy are a source of inspiration to those upon whom their mantle has fallen, and the church at large should see to it that they are not wanting in anything, that will help this institution, which is a credit to the Church and a valuable factor in the enlightenment of the land in which we
