

and Miscellaneous. It is published monthly each issue will contain 64 pages, and the annual subscription \$3. We wish it longevity and prosperity.

JOURNALS RECEIVED.

We have received from Messrs Lindsay and Blackiston "Rankin's Abstract" for July, 1855. For the information of those of our readers who do not subscribe for this periodical, we would state, that it is published half-yearly, and contains articles in every department of medicine selected from British, European, Continental and American Journals. The price is only Two Dollars per annum; and, indeed, were it twice that amount, a medical practitioner should not be without it.

From Messrs S. S. and W. Wood, we have received "The British and Foreign Medico-Chirurgical Review" for July, 1855. This standard Quarterly has lately changed editors. Dr. Parkes, the former editor has received a lucrative appointment in the East. Dr. Seiveking, who has succeeded Dr. P. in its management, is a highly educated Physician, and an able writer, and we venture to predict that the interests of the British and Foreign will not decline during his regime.
