

tario, which high office he still holds, and the arduous and responsible duties of which he discharges with distinguished ability and to the satisfaction of all classes of the people. Mr. Kirkpatrick was for years Chairman of the Kingston Collegiate Institute and Hospital board. He has ever proved himself a warm friend of education and of the university. He is a Doctor of Law of that time-honored institution which last year celebrated its tercentenary—the University of Dublin. Above all, Mr. Kirkpatrick is one who loves, believes in and serves his country.

Mr. Kirkpatrick in reply delivered an excellent speech.

After recalling old days at Queen's, he expressed his pleasure at the 'Varsity's progress, and said that whatever success he had himself attained, was largely due to the thorough grounding he had received at Queen's. Trinity University, Dublin, had some years ago conferred on him the degree of LL.D., and he had been highly honoured thereat, but he esteemed this from Queen's as of equal value. After referring to the companions of the old days who had "fallen by the wayside," and the professors who had "crossed the bar," he had a few kind words for Rev. Professor Williamson. Speaking of the progress of Queen's he said that had the plan of federation been carried out and the university removed to Toronto, the action would have been detrimental to the cause of education in Eastern Ontario. He was heartily glad that the friends of Queen's had stood by her, and that the university had been established on a fine basis. It was desirable to make Queen's second to none, and the friends of the university realized this and the great responsibility that devolved upon them, when they rejected the federation scheme. He urged that Queen's be liberally supported; at present, he was sure, the endowment was not large enough. He hoped that the students would always be loyal to their Alma Mater, and would do all in their power to increase her endowment, which he hoped to see doubled during the next 10 years. Referring in hopeful tones to the proposed School of Mining and Agriculture, he said that it was time the farmers were receiving some direct benefit from the universities. After a few concluding words of thanks for the honor

conferred upon him, the Lieutenant-Governor took his seat amid cheers.

Dr. Fowler, Dean of the Medical Faculty, then presented Dr. Donald Maclean, of Detroit, for the same honor. He said:

"Mr. Chancellor; It gives me much pleasure to present Doctor Donald Maclean, of Detroit, Michigan, as one who is eminently worthy to receive one of the higher degrees of this University. Dr. Maclean was an Alumnus of Queen's, and doubtless his early training here contributed in a marked degree to the formation of his character and his striking individuality. He pursued his medical studies in Edinburgh, and became the favorite pupil of the immortal Syme, who inspired Dr. Maclean with his own enthusiasm, daring, and caution, and with an intense love of that branch of the profession in which he himself excelled. Dr. Syme had such a high estimation of Dr. Maclean that he entrusted to him the editing of his valuable work on Surgery. The confidence was not misplaced, as was shown by the favorable reception accorded it by the profession at large. Shortly after Dr. Maclean's return to Canada he was elected a professor in the medical department of Queen's University, and taught for some years with marked success both clinical surgery and physiology. His fame extended as far as Ann Arbor, and he was solicited to accept the chair of Surgery, where his aggressive teaching and surgical achievements greatly enhanced the reputation of that deservedly famous University. For several years Dr. Maclean has resided in Detroit, confining his attention to the practice of Surgery, and is now recognized as the most brilliant and successful surgeon in the Northwest."

Dr. Maclean thanked the Chancellor for the honor conferred on him, and said that, although he had been connected with several Universities, he had always been "true to his first love," and would continue to watch her course with the greatest of interest.

Professor Dupuis next presented Dean H. T. Bovey, Professor of Applied Science in McGill College, Montreal, for the degree of LL.D. In doing this he spoke as follows:

"Henry T. Bovey was born and educated in England. Professor Bovey took a high position in his student course at Cambridge,
