International Business Development Program (1997)

Meeting the International Business Development Program's Challenges: The Goal

Export and foreign direct investment continue to be the major driving force of the Canadian economy. This year's economic forecast for 1997-98 shows that Canada's exports will grow 7.5% while FDI growth is expected to be 10.5%. This growth is reflected in International Business Development's (IBD) program activities.
