

COLLINS AVSAT. FLY ANYWHERE. LAND ANYWHERE.

COLLINS
AVSAT

Imagine landing anywhere in the world—where you never could land before. Day or night. Rain or shine. With or without ILS. Impossible? Not with Collins AVSAT,™ a family of satellite-based precision navigation systems designed for all phases of flight, including landing. Collins AVSAT lets you determine your position at any spot on the globe without being limited by ground stations. Based on differential GPS (pioneered by Rockwell), it opens up precision approaches to thousands of additional airports throughout the world. Collins AVSAT. Opening a world of new possibilities in navigation.
