Dear Dr. Hatcher

Your first year BA,
B Sc. tentative ten-table looks

excellent.

Though the second year ten-table

existing seems satisfactory I would
call your attention to the fact that I

believe in Nov. Wed. Fri at 10

in Elementary Arithmetic, a subject by no
means inappropriate in any general
science course.

Yours sincerely

C. A. Brodie Bonnell

N.B. I also believe in Nov. Wed. Fri at 11 in Maths + Science Society
Author's note: As it is necessary for a rigorous logical character you might
like to include it also.
