

will readily be conceived that to discuss such topics clearly, positively and with benefit to the lay reader, requires no ordinary tact; and we must say that the author has succeeded beyond all our expectations. No one can possibly be harmed by perusing his pages, and none but will be instructed and benefited.

"The work is characterized throughout by sound scientific views, and indicates extensive and careful reading."

FROM PROF. HARVY L. BYRD, M.D.,

*Professor of Obstetrics, in the Medical Department of
Washington University, Baltimore, Md.*

MY DEAR DOCTOR: You have done your work well. I am one of those who believe the lay members of every intelligent community should be educated in a general knowledge of the laws of life, not only for the good of the race, but, if you please, for the good of our profession also. Hence I endorse your efforts in this direction.

I am, with high esteem,

Very truly yours,

HARVY L. BYRD.

FROM JOHN H. GRISCOM, M.D.,

New York City.

"I have devoted considerable time to the perusal of 'THE TRANSMISSION OF LIFE.' Its numerous and important subjects have been nowhere to my knowledge, as intelligently and effectively treated. The sanitary advice, so well inculcated, should be learned by every individual, especially by parents for the safety of their children."
