

*Eumyphid glomerata*!

*Desmia funeralis*!

*D? janassialis*!

*Ediodes minimalis*!

*Samea ebulealis*!

*S. ecalis*!

*S. phyllisalis*!

*Asopia archiasalis*!

*Agathodes monstrosalis*!

*Parapompe allionealis*!

*Hydrocampa italis*! Not a true *Hydrocampa*; wings much longer.

*Zebonia serinalis*, but with longer wings than usual in the genus.

*Leucochroma icciusalis*!

*Phacellura nitidalis*!

*Ph. hyalinatalis*!

*Ph. immaculata*!

*Botys arypalis* is *B. ventralis* G. & R. their label annexed.

*B. verticalis*!

*B. apertalis*!

*B. strictalis*!

*B. theseusalis*!

*B. siriusalis*!

*B. licalis*!

*B. ollusalis*!

*Isopteryx? oblitalis*! The species is a good one.

*? leucothoalis*! The species is a good one.

*Oligostigma seminealis*!

*O. curviferalis*!

*Catyclysta lamialis*!

*C. claudialis*!

*C. principalis*!

*C. confusalis*!

*Botys oblitalis* and *B? pantheralis* are considered as synonyms by Walker, one specimen representing both labels. Specimens too much rubbed for identification.
