

patients that their employment has been attended with all the beneficial results for which they were prescribed.

I am, Sir, your obdt. servant;

FRANCIS BADGLEY, M.D.

Lecturer on Med. Juris., McGill College.

Montreal, April 2nd, 1850.

The undersigned certifies that the constant use of the Plantagenet Water has been of signal service to him against frequent attacks of Rheumatism in the joints, to which he has been subject for several years.

E. M. LEPROHON.

CERTIFICATE OF THE HON. L. J. PAPINEAU.

From the careful and scientific analysis which was made by Mr. Hunt, of the Plantagenet Mineral Waters, the enlightened Physician could at once proclaim that it was, in a great variety of diseases, acute and chronic—that he would prescribe their use, with the strongest reliance that he must thereby obtain the most favorable results. Experience soon confirmed the decision. Several of the Physicians of the highest standing and reputation in this city, and whose practice is therefore most extensive, because most successful, have published certificates testifying to the great efficacy of this invaluable medicine, which they have most frequently administered to their patients. Their authority is the one that ought to carry the greatest weight with sick persons, and persuade them. Though I am a stranger to their learned profession, and have been blessed with such uninterrupted health, that I have not needed calling them to my aid, nor to make use of any remedy for several years, yet I attest, on my personal knowledge and observation, that many persons in my family, as well as in a large circle of friends, relations and acquaintances, have used these Waters, either under direction of their Physicians, or of their own accord, and that, in an infinite number of cases, they drew therefrom their cure often; relief always; inconvenience never.

At the desire of the proprietor, with true satisfaction do I give him the present certificate, happy if it can become a proximate cause of usefulness to any sick one whom it had helped to induce to resort to a remedy which, more often than almost any other, shall prove successful

L. J. PAPINEAU.

Montreal, April 19, 1850.
