

SECOND EDITION.

# WHAT THE FARMERS MAY DO WITH THE LAND;

OR,

PRACTICAL HINTS FOR THEIR AND ITS IMPROVEMENT.

BY

D. G. F. MACDONALD, C.E., LONDON.

## OPINIONS OF THE PRESS.

'A sounder, better argued, or more thoroughly sensible practical pamphlet is not often met with. Mr. Macdonald belongs to the go-ahead class of agriculturists, and sees nothing in store for the farmer but prosperity, if he only goes the right way to extract it from the land. The superior economy and efficiency of the Scottish system of agriculture is practically demonstrated from a variety of details, stated with great clearness and much method of arrangement. Altogether, the pamphlet is one calculated to do good and set the farmers thinking, and we hope that its rural circulation may prove equal to its merits.'

ATLAS.

'A pamphlet abounding with information, such as cannot fail to recommend itself.'

TIMES.

'This is an excellent practical and well-timed pamphlet, stimulating the English agriculturists to improvement. Mr. Macdonald writes like a man in earnest, and one who is practically acquainted with the subject, and we hope that his pamphlet will be well circulated among the *far niente* bucolic interest.'

MORNING CHRONICLE.

'Mr. Macdonald appeals to the English farmers to apply the most improved Scottish system of cultivation to their lands; reminds them that the barren north produces on an average—thanks to enterprise and skill—more than a third more corn per acre than the genial south; and reads our sluggishly-moving English friends a sound lecture on their tendencies to retrograde rather than to go a-head—filling his pamphlet with hard-hitting facts and excellent and sensible practical details.'

INVERNESS COURIER.

'Of all the pamphlets which have recently been published on agricultural improvements, none of them contain more practical information in such small compass.'

NORTHERN ENSIGN.

'It is a most sensible pamphlet—we would cordially recommend it.'

EXAMINER.

'If one of the greatest elements of success consists in speaking to the times, and speaking in language not to be mistaken, then we say this pamphlet must obtain a wide circulation, and be the means of doing a vast amount of good.'

OBSERVER.

'Its pages convey a vivid and correct picture of the present state of agriculture. The hints are most valuable.'

GUARDIAN.

'We recommend this pamphlet to our agricultural friends. It is the work of a practical man, not a mere theorist.'

GLOUCESTER JOURNAL.

'This work is clearly and concisely written, and is certainly by a master in farming. It should be perused not only by the landed proprietors and farmers of England, but by every one who is in any way connected with the occupancy and cultivation of the soil.'

THE WEEKLY DISPATCH.

'A very able pamphlet.'—THE RIGHT HON. SIR E. BULWER LYTTON, Bart., M.P.

London: ADAMS, 9 Parliament Street.
