- GOTCH, FRANCIS.—On Some Aspects of the Scientific Method, in Lectures on the Method of Science (1906).
- HILL, ALEXANDER.—Introduction to Science.
A little shilling book—a wise and attractive introduction.
- HOUSSAY, F.—Nature et Sciences naturelles (1908).
- HUXLEY, T. H.—Collected Essays, *e.g.* Method and Results, Science and Education.
- JEVONS, W. STANLEY.—The Principles of Science, a Treatise on Logic and Scientific Method. 3rd Ed. (1879).
- LANKESTER, SIR E. RAY.—The Kingdom of Man (1906).
A powerful book showing what Science has done and what it might at present be doing for the commonwealth of Man.
- MCDUGALL, W.—Psycho-Physical Method, in Lectures on the Method of Science (1906).
- MACH, E.—Die Analyse der Empfindungen (1886). 5th Ed. 1906.
A classic statement of the view that science is description.
- MERZ, J. T.—A History of European Thought in the Nineteenth Century. Vol i. Introduction. Scientific Thought (1896). Vol. ii (1903).
A work of magistral scholarship and deep insight.
- MIVART, ST. GEORGE.—The Groundwork of Science (1898).
- MORGAN, C. LLOYD.—The Interpretation of Nature (1905).
A fine introduction to the philosophical questions raised by Science.
- NATORP, P.—Die logischen Grundlagen der exakten Wissenschaften (1910).
- OSTWALD, W.—Vorlesungen über Naturphilosophie (1901). 3rd Ed. 1906.
A very important discussion of the principles of chemical and physical science.
- OTTO, R.—Naturalism and Religion (1907).
A competent and fair-minded statement of the scientific position, with an explanation of the religious.
- PEARSON, KARL.—The Grammar of Science. 2nd Edition (1900). New Edition (1911).
An indispensable and quite unique book.
- PICARD, EMILE.—La Science moderne et son état actuel (1909).
