### SOLDIERS EXHIBIT MANY HANDICRAFTS

Collection at C. N. E. Shows Remarkable Skill of Convalescents.

### **CRADLES TO CARVING**

Every Conceivable Artistic Object Made by Veterans Hands.

Soldiers in the transition period between the activities of the trenches and the normal works of peace are represented in what is probably the most unique section of the exhibition the department of soldiers' civil reestablishment, soldiers' comforts. That this division of the women's building will draw a continuous and admiring ing a value all their own—that of being the work of men who fought a period of convalescence in the vari-

inality of the various articles on view at once caught the spectator. Men were busy with the corner where a model recreation room such as is seen in the hospital, will be erected. Long curtains of soft green and short ones of pretty white muslin were being hung. A billiard table, piano and other furniture were waiting for position. Opposite a similar section was being Present assessment on the land is papered with blue prints, showing the \$303,000 beautifully accurate work of draughts men in the Canadian forces. But it was in the various glass cases that was in the various glass cases that the lodestone was discovered in the form of handicrafts which have come as the work of soldiers in as the work of soldiers in many parts of the Dominion. Mrs. Van Koughnet who has charge of the collection, was busy at every point. She was assisted by Mrs. Albert Brown, Mrs. F. White, er son, Captain White, and a number of other returned soldiers.

Opens a Vision
The effect of the glass cases filled with basketry of various kinds, with embroidered centre-pieces, miniature furniture, wool-work, cushions, models of ships and air craft, sketches, waterof ships and air craft, sketches, water-colors hammered brass and a hundred and one samples of soldiers work is curious. The eyes of the onlooker seem to see thru and beyond them. A vision opens up of beds in hospital wards upon which lie men who with unaccustomed fingers handle hits of wool or silk in an endeavor to while away the weary months of convalescence. Other men in shops work with tools in an attempt to strengthen fingers and limbs that in France or Flanders were the dexterous instruments of retribution to the enemy. At first the workers are languid and inept but interest is awakened, patience and ambition come to their patience and ambition come to their drove it to Napanee, where it was abanaid and one realizes that the wonderful things in the cases are as much
the result of courage and determinathe result of courage and determinathe result of courage and determinathe result of their producers as tion on the part of their producers as

many beautiful trays, boxes, photo-holders book-racks, small tables and other samples. A deer with splendid antiers and fine pose is the work of a patient in Davisville Hospital. A small box with carving so fine that it looks like Chinese work in ivory, attracts attention. A model of an airplane is noted. Several pieces of skil-fully developed raffia are from Queplane is noted. Several pieces of skilfully developed raffia are from Quebec. One of these is a small circular basket in sand shade with a field and stream at the bottom in green and blue, the field has an orchard in bloom and cattle are in the field or drinking at the stream. The card attached tells that the soldier who made the basket was formerly an agriculturist. Children will rave over the dainty cradle in grey enameled wicker with the trimmings of pale rose and the pretty covering of flowered muslin. A miniature suite of furniture is also on hand. Then there are animals on wheels—a cow a rabbit a narrot on wheels—a cow a rabbit a narrot on wheels—a cow a rabbit a narrot on whether with the withing the rabbit and the process of the stream of t miniature suite of furniture is also en hand. Then there are animals on wheels—a cow, a rabbit, a parrot on a hoop and a dog wearing the insignia of the Red Cross. Articles of the more artistic class are represented by the handkerchief case of white satin with corn flowers in blue and gold painted upon it and in the china set injured by the widespread condemnation of the dishonest ones and he respectively. The price committee which had been formed by Federal Food Administrator Arthur Williams in an effort to arrive at some fair return of profit between dealer and consumer.

Mr. Palmer said there were a vast number of honest dealers who were injured by the widespread condemnation of the dishonest ones and he respectively. The price committee which had been formed by First stage, 7 shots, 500 yards and shots, 600 yards.

looking like a suit case, which opens up revealing the pigeon holes and table of the usual desk. Painting and drawing is not forgotten, a number of carbon sketches and a collection of landscapes in vater colors and oils being also a view. Among the articles and a collection of landscapes in vater colors and oils being also a view. Among the articles of the usual desk. Painting and the community, I expect to accomplish two things. First, by fixing what is a fair rate of profit between men and publishing that rate broadcast, the consumer will know how to protect himself. If he considers himself when he was arrested he had his coat hanging in a cloak room of the bilthe fingers of men are the handsomely the dealer and force that man to regulate his prices according to the list and found 28 capsules, said to constitute the committee. This one some showing great roses of conventional design, one being done in concentric circles of small flowers and the centric circles of small flowers and the from rising. also scaess in silk, the woof being worked through in all-over pattern; a committee will do. It will enable us to make conspicuous examples. A jury in a community where a fair price committee will do. soldier hands shawls and mats done mittee has fixed a list of prices will in the old cais: stitch way; hammocks netted from twine; specimens of fancy ject, and convictions of gougers will knitting: albums for snapshots with follow." finany or ginal covers; inlaid work principally displayed in trays or boxes. Among these are specimens from Montreal done on the best style of cigar boxes with the monogram of the Toronto National Club carved on the back. These are in recognition of the many boxes that went from the club for the use of the soldiers.

Bead Necklaces. Anything like a complete account of the soldiers' hospital work would be impossibe, but one of the most attractive contributions still remains. It is that of various articles of bead, manu-facture necklaces, watch fobs, belts, will, when removed, take every trace bags and finger rings. One necklace is of fine beads in dull red with gold be washed to free it from the remaindivided by sections in black and steel. The effect is decidedly rich and novel. The taste in combining colors is seen delatone you get and you will not be strikingly in this section and is noted disappointed.

in every department of the work.

a mandolin and violin being noted in one of the cases.

During the fair a demonstration will be in charge of Mrs. Albert Brown, illustrating the rewing, knitting, bandage making and other phases of womca's work that is done for the hospitals, the intention being that this will round out and serve as a compliment to the many phases of handicraft that have been evolved by the convalencement whose work forms this valescing men whose work forms this interesting and fascinating exhibit.

# **CATERERS LEASE**

From New York Conclude Deal.

The Canadian Realty Company, has just completed a deal whereby a 21year lease of the old Fairweather crowd on every day of the big fair building has been taken by a well-goes without saying, the exhibits hav-known firm of French and Danish caterers of Fifth avenue, New York. being the work of men who fought overseas and who are now putting in About \$30,000 a year is given as the overseas and of convalescence in the variance for the building and it is stated a period of convalescence in the various military hospitals.

Even in the unfinished state in which the building was when visited by The World yesterday, the atmosphere of the collection and the originality of the various articles on view

Plans for remodeling and equipment entertained by the lessee are estimated at \$150,000. The building at present owned by Frederick Cromp ton, has three storeys in front and

HURONIC PASSENGER'S EXPERI-ENCE.

Several, people who were on the Huronic when it ran on the rocks of one of the Angus Islands in Lake Superior last week arrived in the city today. Among them were Mr. and Mrs. Leathhead of Montreal. Mr. Leathhead's story of the mishap is very brief. The steamer was making its way thru a dense fog when sud-denly it ran aground. The passengers rushed from their staterooms but were quickly reassured by the officers of rooms to await developments. Later they were taken off by tugs to the Hamonic which brought them in to Port Arthur. Mr. Leathhead spoke
