

DELCO-LIGHT

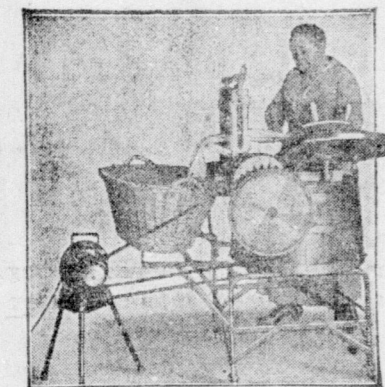

"PAYS FOR ITSELF"

LIGHTS THE BARN.

RUNS THE FANNING MILL.

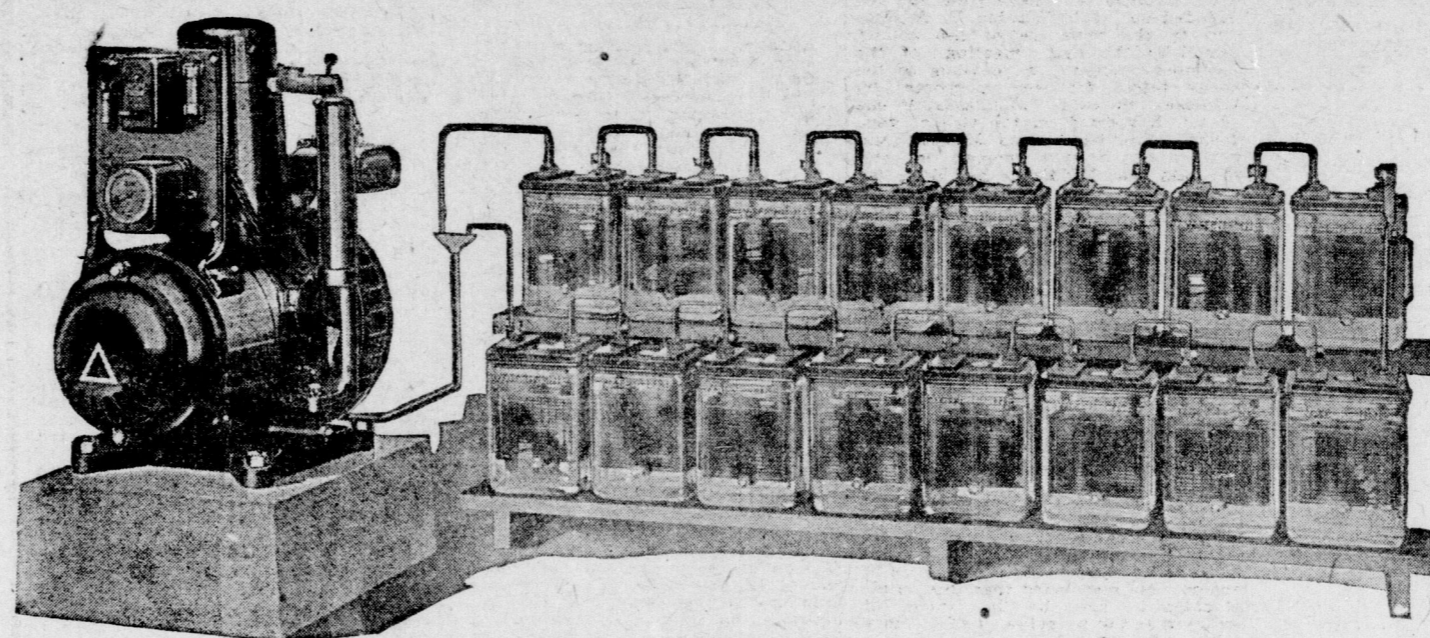

RUNS WASHING MACHINE.

TURNS THE CREAM SEPARATOR.

PUMPS THE WATER.

This complete Electric Light and Power Plant for farms, stores and country homes quickly pays for itself in time and labor saved.

THE WAR IS OVER!

Now is the time to plan on meeting "after the war" conditions, by installing equipment which will increase the efficiency and output of your farm.

DELCO-LIGHT will not only increase efficiency, but will better living conditions, and will PAY FOR ITSELF.

DELCO-LIGHT will furnish plenty of bright, clean, safe electric light for any part of the house or barn. Better light means improved living conditions and greater contentment in the farm home.

DELCO-LIGHT furnishes power for running the washer, cream separator, churn, fanning mill, grindstone, milking machine and other light machinery. It will operate a vacuum cleaner, heat an electric iron, and operate over 200 other time and labor saving electric appliances.

DELCO-LIGHT will operate a complete pressure water system with running water at the turn of a faucet, in any part of the house or barn.

"Over 60,000 Satisfied Users"

Dan Campbell of Komoka, Ontario, reeve of Lobo, says that DELCO-LIGHT is saving him a total of twenty hours per week. Here's his letter and affidavit:

Komoka, Ontario, Sept. 3, 1918.

TO WHOM IT MAY CONCERN:

This is to certify that we own a Delco-Light plant and find that it is very satisfactory, and certainly saves a great deal of time as follows:-

Turning cream separator 7 hours per week,
Churning, 3 hours per week,
Ironing, 3 hours per week,
Washing, 3 hours per week,
Care of lamps and lanterns, 2 hours per week,
making in all a total of 18 hours per week.

We are at present milking ten cows.

We are also using our motor on fanning-mill and lighting our buildings throughout.

We are well pleased with our investment.

Yours truly,

D. Campbell
