A White Rug made Black—
with Mosquitoes

The following is an extract from a letter recently received from the wife of an army officer in India:—
"Our home was simply swarming with millions of mosquitoes last hot weather, and after burning a handful, or tin, of the powder on an open stove and shutting up the entire room, thousands literally fell down on the floors and tables. In the drawing room alone we had a white felt rug which became black in a few hours, the insects by hundreds laying dead on it."
The powder above referred to is Keating's Powder, and the experience, although somewhat remarkable, is not unique, for it is a fact neither flies or mosquitoes can exist when exposed to the fumes of Keating's Powder. Where open stoves are not available it is quite easy to clear a room by simply using a candle and an ordinary shade holder; placing on the round part of the shade a piece of flat tin, pouring the powder on top of it, and leaving it to smoulder.

To separate the yolk of an egg from the white make a hole in both ends of the egg. Then hold it upright, giving it a gentle shake, and the white will run out, leaving the yolk unbroken in the shell.

TOMMY NEEDS THE

SMOKES!

Contributions taken by the Postmaster of St. John for Overseas Tobacco Fund.

To the Editor of The Times:

Sir,—Having received from Overseas Amalgamated Tobacco Funds of Montreal (P. Q.), their Collecting Funds Card, I would earnestly appeal to our citizens for their contributions towards maintaining successfully the mission it represents.

I may here quote the following information contained in the appeal, and state the Postmaster will gladly receive all contributions, and as each card is filled will forward the same with the amount collected to headquarters, Montreal.

(1st) Every cent contributed goes to purchase tobacco and cigarettes.

(2) By arrangement with the British and French governments the tobacco is packed in bond and shipped duty free. This enables the Overseas Club to secure tobacco and cigarettes at the lowest possible price.

(3) For one quarter (30c.) the Overseas Club are able to supply: 50 cigarettes, 4 oz. smoking mixture, a box of matches and a postcard. For \$1.00 the Overseas Club can supply: 50 cigarettes, 4 oz. smoking mixture, 1 briar pipe, 1 tinder lighter, 1 rubber lined pouch, some matches and a postcard.

HE STRUCK IT
RIGHT AT LASTAfter Suffering Almost Two Years
"Fruit-a-tives" Brought Relief

MR. WHITMAN.

282 St. Valler St., Montreal.
"In 1912, I was taken suddenly ill with Acute Stomach Trouble and dropped in the street. I was treated by several physicians for nearly two years. I was in constant misery from my stomach and my weight dropped from 225 pounds to 180 pounds. Several of my friends advised me to try 'Fruit-a-tives' and I did so. That was eight months ago. I began to improve almost with the first dose. No other medicine I ever used acted so pleasantly and quickly as 'Fruit-a-tives', and by using it I recovered from the distressing Stomach Trouble, and all pain and Constipation and misery were cured. I completely recovered by the use of 'Fruit-a-tives' and now I weigh 208 pounds. I cannot praise 'Fruit-a-tives' enough."

H. WHITMAN.

T. McAVITY & SONS

OFFER SITE FOR BIG
MUNITIONS PLANT

D. A. Thomas, former Welsh M. P. and the personal representative of Lloyd George, the minister of munitions, to the United States and Canada, yesterday heard a scheme for the increased output of munitions in St. John that may be most far-reaching for the city.

McAvity, of T. McAvity & Sons, told him in the course of his special tour of inspection of the plant at the Exhibition Building where shells will be turned out in about three weeks, that they could at once treble their proposed plant and output if assured of the orders from the war office. But more than that, Mr.

McAvity offered to the war office the advantages of the whole expenditure that has up to date been made on the plans and foundations of the site they have acquired on the triangle between Marsh road, Westmainland road and the street railway track running to One Mile House and of the firm's whole technical experience if they wanted to erect a special factory for munitions. This offer was to be unconditional except that after the war the buildings and site should revert to the firm.

It is not in accord with the secrecy that the war office imposes to state the capacity of the St. John works nor the projected output if this offer is accepted but as \$10,000 has already been spent by the firm in preliminary work for iron and brass foundry purposes some idea of the vastness of the offer may be obtained.

Mr. Thomas received the offer attentively and made notes of the conditions. Especially was it impressed upon

him by Mr. McAvity that St. John was an ice free port all the year and that the new works if agreed upon could be in operation by December next. Mr. Thomas, himself one of the largest employers of labor in Great Britain, asked many questions as to obtaining the needed skilled labor to man the plant and was assured that in the three large works that the firm of T. McAvity & Sons control there were enough men to form the nucleus and the rest could be readily trained by them.

A newspaper man in Michigan publishes the alleged fact that to prevent being bothered by mosquitoes you should rub your face and hands with alum. Another way is to catch the mosquito by the back of the neck and pour tobacco sauce down its throat.

The woman who loves a man for himself alone generally has an income of her own.
