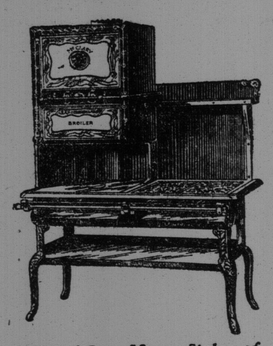
MC2035 POOR DOCUMENT

Get Breakfast With
$1.00 GAS

As Fuel in Housecleaning Time and through the Summer and you will have a great deal of comfort you never experienced with the old method

No Kindling - No Coal - No Ashes - No Dust



One of Our Many Styles of ECONOMIC GAS RANGES

This cleanly, Convenient Fuel is taken by us right to your home—into the very burners of your gas range—and a match is all the kindling you need.

DO YOU REALIZE THAT WITH LESS THAN THREE CENTS WORTH OF $1.00 GAS you can cook a complete dinner and most of the next day's breakfast? Can you do that with the old time fuels?

WITH $1.00 GAS you can roast meats and poultry to a turn, broil steak and fish to perfection, retaining all the natural strength, flavor and juices, and with only half the loss by shrinkage that results from the old methods, doing away with the odor.

A SLIGHT TURN OF THE VALVE REGULATES THE FLAME instantly, making possible a perfectly even oven and any temperature desired. Liquids may be kept at the simmering point or from boiling over by the same means.

BREAD AND CAKE BAKED WITH $1.00 GAS have a smooth even texture, uniform crust of light, golden or dark brown—as you like—and a peculiarly pleasing flavor. This results from perfect control of the heat.

$1.00 GAS
Is The Ideal Fuel For Summer; The Most Convenient For Winter.

Saves Time Saves Fuel Saves Labor Saves Space

Our Combination Steel Range

Is a Masterpiece in Range Making—can be changed from coal or wood for gas fuel in a few seconds. Really Two Ranges, occupying only the place of one.

We also offer a Full Line of Gas Stoves and Ranges for cash or on the monthly payment plan; the cost of installation being reduced to the minimum, 10 cents the running foot, all fittings included.

Cleared Yesterday.

Schr E. Merriam, 331, Ward, for City Island for orders, Stetson Cutler & Co., 349,559 feet spruce deals.

LOCOMOTIVE ENGINEER HAS REMARKABLE EXPERIENCE

I have been thinking that word from me would benefit those who may be suffering as I was before I began taking your Swamp-Root, the great kidney, liver and bladder remedy. I am a locomotive engineer, employed on the Tyrone & Clearfield Branch of the Pennsylvania Railroad. Three years ago I was afflicted with kidney and bladder trouble so bad that I was compelled to lay off duty from my engine and was in the care of two doctors. However, their medicine did not benefit me. One day, I noticed your advertisement, to send name and address for a sample bottle of Swamp-Root. At this time my trouble had reached such a serious stage that it was with great difficulty that I could urinate. I sent for the sample bottle and in three days received a small bottle of Swamp-Root, which I took according to directions, and by the time I had taken the contents, I could pass water more freely. I was so pleased with my experiment that I sent my wife to the drug store of W. H. Slick, Phillipsburg, Pa., and secured a one-dollar bottle. I continued taking Dr. Kilmer's Swamp-Root until I was entirely cured. Now whenever I feel any pain or soreness after being exposed to cold weather or hard work, I take a dose or two of Swamp-Root. I cannot recommend this remedy too highly, especially to brother engineers who are more or less troubled with their kidneys (more than any other class of men).

Yours truly,
T. J. VANSCOYOC,
1461 Logan Ave., Tyrone, Pa.

County of Blair, ss.
State of Pennsylvania, ss.

Personally appeared before me, a Notary Public, T. J. VanScoyoc, who being duly sworn, doth depose and say that the foregoing statement is true. Sworn and subscribed to before me this 15th day of July, A.A. 1909.

H. B. CALDEWOOD,
Notary Public.

Letter to
Dr. Kilmer & Co.,
Binghamton, N. Y.

Prove What Swamp-Root Will Do For You

Send to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. It will convince anyone. You will also receive a booklet of valuable information, telling all about the kidneys and bladder. When writing, be sure and mention the St. John Evening Times. Regular 50c. and $1.25 size bottles for sale at all drug store in Canada.

Probably not many people know that the wood of the alder is used in the manufacture of smokeless powder, yet such is the case, and in some places the preparing and shipping of the wood has become an industry that is proving profitable. The alder was formerly only good when the small boy wanted a fish pole in a hurry.

Yet many men think that a political policy pays bigger dividends than honesty.

The Busiest Dairy in St. John

THE PEOPLES DAIRY 180 UNION STREET 'PHONE 2149

The above photo shows the interior of the smallest dairy in St. John, yet it produces the ICE CREAM which leads in this city. GOVERNMENT ANALYSIS shows the People's Dairy Ice Cream has the highest percentage for PURITY AND QUALITY. The Dairy has a factory and warehouse in connection, and facilities are better than before for catering to trade—wholesale and retail—at short notice in Frozen Fruit Puddings, Water Ices, Sherbets, Custards, Etc., as well as Ice Cream. The cream and milk carried by this dairy comes from some of the best farms in Kings county, such farmers as Messrs. Bettle, Carter, Dickson, Allaby, Darling, Titus and others producing the stock which gives the Dairy the place it holds in the trade. We also carry in stock the Lower Millstream Dairy Farm butter put up by J. E. McAuley, which is well known in this city. More—this dairy keeps on sale the Maple Syrup put up by Cochrane Bros., of Bloomfield—Syrup which is guaranteed purest by Government Inspection. Hennery eggs always on hand, fresh from the producer. Bear in mind a good service from this dairy to all parts of the city.

LIFE ON THE PLANETS

(Translated for the Pathfinder by Anton Hardt).

Such eminent astronomers as Lowell, Schiaparelli, and others, have ventured to give opinions on the subject of the habitability of our sister planets. Lately a zoologist, Edmond Perrier, member of the French Academy of Sciences and director of the Museum of Natural Science in Paris, has published in the Revue de Paris an article which is very interesting, because it is based on strict scientific principles.

He denies the possibility of life on the more distant planets of our solar system, on account of physical conditions. Mercury, with an average temperature of 247 degrees Fahrenheit, is unsuited for living beings, and thus there are left for consideration only Venus, earth and Mars. Perrier is of the opinion that the conditions for the life of plants and animals on these three planets have been similar.

Gravity, light, combinations of elements and similar conditions which determined the evolution of life on our neighboring planets do not vary essentially from the conditions on our earth. Perrier assumes that there are, or have been, streams and oceans on Mars and Venus; that rain, snow, hail and thunderstorms occur there the same as with us, so that the conditions are favorable for the life of algae, microbes and other micropic life.

As to the possibility of life on Venus, Perrier states that the gravity there is almost the same as on the earth, that the average temperature is higher and therefore that there is more warm moisture. The inclination of the axis is a little more than that of the earth, therefore the seasons are less pronounced than they are with us.

The year of 224 days is much shorter than ours. It is possible that insects with a long life, slow development and of considerable size may have lived there. The moist atmosphere favors the life of ferns, rushes, lycopodium, etc.—in short, a flora similar to the one which is characteristic for our coal formation.

Since there are no plants with blossoms, then no butterflies, bees, or other insects which depend on blossoms can exist, and insect life is confined to crickets, locusts, dragon-flies, beetles, etc. Conditions on the planet Venus are favorable to the growth of reptiles and amphibia, the same as existed on earth during the triassic period. Birds and mammals cannot exist there.

The planet Mars is very different from Venus. It is farther from the sun, its axis is more inclined, which makes the seasons more pronounced, and the difference is greater between night and day. Its winter is cold, its summer hot; the northern hemisphere has a larger summer season and is warmer than the southern one.

Conditions are favorable for warm-blooded animals that can stand better the extremes of temperature; consequently Perrier declares Mars to be the planet for mammals and birds. On account of the lesser gravity on this planet all the living beings there are built lighter, and jumping and running creatures prevail.

On account of the different seasons there must be plants with blossoms, and butterflies which finish their course of life in one season. Therefore Perrier names Mars the planet of flowers and butterflies. On account of the weaker light and lower temperature all living beings on Mars must be similar to those of the polar and temperate zones of our earth.

The great length of the year, 668 days, favors the development of living beings, one summer furnishing enough time for a whole generation of animals or plants. The quantitative development on Mars must be greater; grass is higher, fruits are larger and the same holds good for insects.

The more difficult conditions of life necessitate a greater development of mind. Perrier assumes that insects with social instincts such as termites and ants prevail. On account of the lesser gravity such huge animals as the elephant or rhinoceros cannot exist there, but slim creatures of a gazelle-like figure prevail.

Perrier calls Mars the planet of grace and beauty. Since the conditions of life there favor jumping and climbing creatures, he assumes that ape-like animals exist there. From these it is possible that creatures walking upright have developed, and finally creatures resembling men.

WEEKLY COTTON LETTER

(E. & C. Randolph, New York, to J. M. Robinson & Sons).

Nothing has happened during the past week to cause any change in sentiment. Further rains have been reported in the southwest and, generally speaking, reports from the south indicate that with a favoring spring, the crop will secure a particularly encouraging start over a considerably increased area. And while the prospects in this direction remain bearish, we see no sign of any improvement in the domestic mill situation. The reduction in the quarterly dividend of the Claflin Company served to emphasize the depression of trade, and the weekly estimates of bureaus at Fall River certainly show no improvement.

We can see very little change in the speculative situation in the old crop months. The May-July straddle interest has been somewhat reduced on such occasions as the May premium has broadened above twenty-five points, but leading spot interests have purchased May whenever the premium has narrowed to around twenty points, and while at times during the week it has looked as though one of last summer's bull leaders was liquidating July, the same operator is credited with buying July on setbacks.

Preparations are being made to send cotton to New York from various Southern points for delivery on May contracts, and so far we can learn of not more than 20,000 bales of ocean freight room engaged for shipment from New York during April. We anticipate, consequently, a rapid increase in the stock here with the approach of May contract maturity, and while we see nothing at present to indicate that these deliveries will not be promptly taken up by the bull pool, we are inclined to think that the bulk of the cotton will be delivered on July, and unless cotton is a scarcer article than we at present apprehend or unless new crop prospects have in the meantime suffered materially, we fail to see a sufficient incentive for bull speculation to carry still further forward in the race of new crop discounts, even with a possibility that the September revision may increase the low grade penalties.

The 1720 passengers were transferred from the stranded North German-Lloyd liner Prinzess Irene, at Long Island, New York, to the steamer Prinz Frederich Wilhelm yesterday without a mishap. The steamer was still gripped in the sands last midnight.

A sub-committee of the board of works met yesterday and discussed plans for widening Mill street. The engineer submitted plans providing for acquiring property on the west side of the street but no decision was reached.

WOMEN CURED AT HOME

Women's disorders always yield from the very beginning of the treatment to the mild, but effective action of Orange Lily. Within two or three days after commencing its use the improvement becomes noticeable, and this improvement continues until the patient is completely cured. Orange Lily is an applied or local treatment, and acts directly on the womanly organs, removing the congestion, toning and strengthening the nerves, and restoring perfect circulation in the diseased parts. In order to convince all suffering women of the value of this remedy, I will send a 35-cent box, enough for ten days' treatment, absolutely FREE to each lady sending me her address. MRS. FRANCES E. CURRAH, Windsor, Ont.

MORNING LOCALS

At a meeting of the directors of Fernhill cemetery, in the board of trade rooms yesterday afternoon, Hon. J. G. Forbes was elected president. The staff of permanent officers was reappointed.

David R. Kennedy, of Montreal, traveling baggage agent for the C. P. R., and formerly of this city, was married in Montreal Tuesday evening last to Miss Celia Hogan. Mr. Kennedy has many friends in St. John.

Rousing committee meetings in favor of commission were held last night in Prince Wellington and Kings wards. Arrangements were made to bring out the vote on civic election day, and it is said to be a foregone conclusion that these wards will each give a grand majority for commission and improved civic government.

A carload of equipment sent by Contractor M. Sullivan, arrived in the city yesterday for use on the new drill-shed work. It is expected that the work will not be long delayed.

Thirty-six candidates, fourteen of whom were men, were last night confirmed in St. Luke's church by the Bishop of Fredericton. His Lordship delivered an interesting sermon.

W. Campbell, of Dundee, reached the city yesterday, touring this country at the invitation of the dominion government in the interests of immigration. He said that the west was extensively advertised in the old country, but the east did not get its share, and this was why the maritime provinces did not secure as many immigrants as desired. From what he had seen, however, he would recommend the east to his fellow-countrymen in good faith.

In the Seamen's Institute yesterday afternoon and evening an Easter tea and sale were conducted with distinct success. The sale will be continued tonight.

John O'Brien, charged with setting fire to property in North street, was yesterday afternoon discharged by Judge Ritchie, who said that he did not feel that the evidence against him warranted his being sent up for trial. Testimony was given by Thomas Dean, S. Speight, and Policeman Wittrien.

A comparative statement of the customs revenue of the twelve largest ports in the dominion, shows that St. John ranks tenth in the list. The St. John figures for the year ending March, 1910, were:—$1,333,754.34, and for the year ending March, 1911, $1,340,926.68.

With the rivers and lakes soon to open, Dominion fishery inspectors are to make a rigid inspection with a view to compelling the enforcement of regulations for the protection of inland fisheries. Special attention is to be given for the care of salmon and trout and the sawdust nuisance is to be stamped out.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

MARINE NEWS.

The C. P. R. liner Empress of Ireland, Captain Forster, left for Liverpool via Halifax about 5 o'clock last evening. She took away 468 passengers, as follows: Fifty saloon, 128 second cabin and 290 steerage. Among those going over were W. R. Mc Innes, general traffice manager of the C. P. R.; Miss McNicoll, daughter of D. McNicoll, vice-president and general manager of the C. P. R.; Hon. John B. Davis and Mrs. Davis, New York; O. J. B. Carr Hill, E. J. Grice and J. F. Wright, the latter three from Shanghai, China, en route to London.

FAMOUS GEMS OF PROSE

WEBSTER'S DEFENCE OF NEW ENGLAND

By Robert Y. Hayne

From a speech in the U S senate, January 21, 1830.

THE honorable gentleman from Massachusetts, after deliberating a whole night upon his course, comes into this chamber to vindicate New England; and instead of making up his issue with the gentleman from Missouri, on the charges which he had preferred, chooses to consider me as the author of those charges; and losing sight entirely of that gentleman, selects me as his adversary, and pours out all the vials of his mighty wrath upon my devoted head. Nor is he willing to stop there. He goes on to assail the institutions and policy of the south, and calls in question the principles and conduct of the state which I have the honor to represent. When I find a gentleman of mature age and experience, of acknowledged talents, and profound sagacity, pursuing a course like this, declining the contest offered from the west, and making war upon the unoffending south, I must believe—I am bound to believe—he has some object in view which he has not ventured to disclose. Mr. President, why is this? Has the gentleman discovered in former controversies with the gentleman from Missouri, that he is overmatched by that senator? And does he hope for an easy victory over a more feeble adversary?

Has the gentleman's distempered fancy been disturbed by gloomy forebodings of "new alliances to be formed," at which he hinted? Has the ghost of the murdered coalition come back, like the ghost of Banquo, to "scar the eyeballs of the gentleman," and will it not "down at his bidding"? Are dark visions of broken hope and honors lost forever still floating before his heated imagination? Sir, if it be his object to thrust me between the gentleman from Missouri and himself, in order to rescue the east from the contest it has provoked with the west, he shall not be gratified. Sir, I will not be dragged into the defence of my friend from Missouri. The south shall not be forced into a conflict not its own. The gentleman from Missouri is able to fight his own battles. The gallant west needs no aid from the south to repel any attack which may be made on them from any quarter. Let the gentleman from Massachusetts controvert the facts and arguments of the gentleman from Missouri if he can; and if he win the victory, let him wear the honors. I shall not deprive him of his laurels.
