TO OPEN MINES IN ALBERTA

CANADIAN NORTHERN HAS IMPORTANT PLANS

Close to Border Line of British Columbia

D. D. Mann, vice-president of the Canadian Northern Railway Company. made an important statement to the Toronto Globe the other day relative to the prospective development of large coal measures adjacent to the borders of British Columbia. This was to the effect that the Canadian Northern will gineers. The programme provides for "The time for action" extend their line into the Brazeau coal fields of Alberta this summer. All the necessary financial arrangements have been made for the construction of a siderable importance and benefit to the line of railway from Edmonton to the section in question, at the foot-hills of Although the department of mines the Rocky mountains. To quote from the Globe's report of the interview with Mr. Mann

"The field, which gives evidence of large deposits of soft coal of a high grade, has already been staked out, and its purchase entails an expenditure of about \$10,000,000. It is ten thousand acres in extent. Negotiations for the financing of this have been going on for a considerable time, the delay being caused because of the fact that much German capital, as well as British, is associated with Messrs. Mackenzie & Mann in the

"However, as Mr. Mann announced all contracts have now been signed, and the work of development will proceed with speed. It is expected that the coal mined in this field will prove suitable for use on the company's locomotives. Should this belief be found to be grounded on fact it will place the C. N. R. Co. in an independent position so far as their coal supply is concern-

new camp are held by the two classes of the island.

cently, the announcement was made that the grant to the Edmonton, Yukon & Pacific railway, a Mackenzle-Mann venture, had been transferred to a road of similar length in connection with the Alberta Midland, a railway company whose charter has been taken over by the C. N. R. Company.

This projected road, cailing for contact the cere and the company with the company with the cere and the cere struction from a point at or near Ed-monton to a point at or near the Skeena river. rivers Brazeau and MacLeod, is the piece of construction to which the transfer of the bond has been made. But Mr. Mann said yesterday that the starting or finishing place of building has not yet been definitely settled. The railway is bonded for the first fifty miles at \$13,000 a mile, and the remaining hundred miles at \$50,000 a

COUNCIL ALONE CAN PASS LIQUOR BY-LAWS

Vancouver Board of License Commissioners Without Power De clares Judge McInnes

Vancouver, May 11.-The Board of License Commissioners has not power to pass a bylaw ordering the closing of hotel bars on Sundays and preventing the sale of liquor on that day.
This is power given to the Council specifically under the city's charter. This is the effect of an important decision given yesterday by Judge McInnes which may be followed by a written decision by his honor, this being the first time the point has been

As a result the court allowed the appeal of Frank Burdick, of the Hotel Imperial, against his recent conviction by the police magistrate for a violation, as found by that court, of the bylaw which the commissioners had passed

PHOTOGRAPHING THE COMET.

Pasadena, Cal., May 11.—Under the direction of Prof. George Ellery Hale, a remarkable series of photographs of Halley's comet has been secured at the Carnegie observatory on Mount

According to Prof Hale director of the observatory, these will be supplemented with other views obtained while the wanderer is within hailing distance of the earth. Prof. Hale now estimated the comet's

tail to be 20,000,000 miles in length. He discussed at the Convocation of Canthis appendage on the generally accept- were Sunday recreation and the died date, May 18th, and that two days vorce laws. later the comet will make its closest Strong opp

GRANBY SMELTER IN FULL BLAST

New Record Established at Works Where Eight Furnaces Are in Operation

Phoenix, May 10.—The entire battery of eight furnaces at the Granby smelter was in operation all last week. onsuming around 4,000 tons of ore per day. During the week 27,675 tons of ore were smelted, which constitutes a new record at the big reduction works. On only one or two occasions before have all the furnaces been in operation together, and then only for a day or two, for experimental purposes,

On Tuesday about 4,200 tons were smelted, an average of over 500 tons per furnace in 24 hours. The furnaces, however, are not being run at full capacity. It is understood that better values can be obtained by operating at

Based on these returns the Granby company is making copper at the rate of 30,000,000 pounds per annum.
