NY ST. JOHN STAR.

ST. JOHN, N. B., APRIL 2, 1902.

WHY NOT IN ST. JOHN? ong the line of what the Star about the desirability of the altoperating with the auth to add to the attractiveness and squares, there is a sugges the following editorial paragraph from

the Brooklyn Eagle That joarna

"Brooklyn is to have a "block beauti ful" if the committee on beauty has its way, as it is advised to have it. The block will be provided with shade and flowers, and the severity of architectural lines will be softened by mass of foliage and bloom in window boxes and by vines that will be trained over porches and house fronts. The block which it is proposed to improve is

bounded by State and Joralemon street and Sydney and Garden places. A house to house canvass is going on, with the view of inducing recruits to

join in this enterprise, and a florist has offered to supply window boxes filled with flowers for \$2.50 each. For half a dollar more he will keep them watered and in good condition through the summer. Boston ivy, Japanese ivy, or ampelopsis, which gives almost the touch of autumnal color that insists in the city, can be had for 35 cents, and thrifty trees are to be had for about \$5. Miss Zella Milhau is the active agent in this work, and she has

secured the co-operation of a number of well known citizens."

WIRELESS MESSAGES

It has been demonstrated that wire as messages can be sent through the water as well as through the air, and

that water does not interfere with the hission of a message which has been started through the air. The Cunarder Umbria, which arrived in

New York on Sunday, was in commun cation on Thursday with the Kaiser Wilhelm der Grosse, and on Saturday east of Nantucket, with the Campania bound east. She received eight messages from passengers on the Campan-

ia. In both cases, each steamer was in visible to the other when message were exchanged. Before the message was sent from the Campania the bam boo pole to which the Umbria's wires

were attached, had been carried over board, and was trailing astern. But the messages were received by the op-

erator just as if the wires were in the air instead of in the water.

BRITAIN'S FINANCES GOOD.

A London cable of Monday's date

anys:-"The papers this morning pub-lished editorials on the satisfactory condition of the finances of Great Brit-ain as revealed by the revenue returns. They generally congratulate the coun-try that, in spite of the war, the pros-pority of trade continues. This pros-pority, it is declared, is proved by the large increase is revenue from the in-come tax. It is estimated that the budget deficit will reach £27,000,000, and that the success of previous ex-periment will induce Sir Midmael Hicks-Beach, the chancellor of the exchequer, further to widen the basis of taxation. The Daily Telegraph thinks the war has had the effect of awakening the energy of the whole empire, and that it may prove to be the salvation of Great Britain's business position in the word." says :- "The papers this morning pub-

pect. W. Frank Hatheway said discussion should be adjourned until there was a larger attendance. He suggested a special meeting. At the March meeting the letter from the Toronio board had been referred to D. J. McLaughlin to prepare resolutions of endorsation, but Mr. McLaughlin was unable to be pres-ent and he thought action could be de ferred.

Mr. McLaughlin was unable to be pres-ent and he thought action could be de-forred. T. H. Estabrooks thought the board should do more than endorse the reso-lutions already passed by the Toronto body. It should place itself on record as favoring the idea, but he agreed that a larger attendance should be present. He advocated a special meet-ing at a early date. It was decided to hold a special meet-ing frides events. W. Frank Hatheway brought up the question of settling industrial disputes by arbitration. He referred to the suc-cured for this plan in Sydney. N. S. W., and to the recent strike in Boston, where great commercial losses were only averted by the scalous efforts of the state board of arbitration. He mittee of five to consider the best transportation companies and indus-tral concerns and their employes and to report back at an early date. A. C. Currie seconded the motion, which passed unanimously and it was left with the council to select the com-mittee.

mittee. T. H. Estabrooks suggested that it would be well to have the labor or-ganizations represented on this com-mittee. They have no representative on the board of trade, but it is likely some means will be found to enable them to co-operate.
