Terse, plain and directly to the point is M. R. A.'s statement tonight that unusual weather conditions have forced the sale of their ladies' girls' and children's ready-to-wear outer apparel and hosiery, which ordinarily would not reach the bargain stage until all spring and summer buying had passed. It's a short, blunt, straightforward message from the big house to the ladies of St. John, and assurance is given of surprising opportunities for securing bargain new 1907 garments at most unusually small prices during the next six days. Far better for seller and buyer, than the usual "wait and see" method, these goods go out now, for the weather has held them back too long already. Read the ad.

BIFF! BOOM! AND HECTOR

WENT THROUGH THE DOOR

Struck a Match to Find a Gas Leak—Found It, Much to His Surprise—Was Stunned by the Discovery.

MONTREAL, May 18.—You can always find a gas leak with a match as Hector Barth found last night in a tenement house on Beaudry street. Gas was detected escaping in the house and Hector, a young man, volunteered to enter the vacant building. He opened the door which had not been locked, and went to the back of the house where the odor of gas was very strong. He ventured to light a match near the meter in the bathroom, when the escaping gas took fire, followed by an explosion which hurled the young man through the open door into the street, injuring one of his legs. The explosion wrecked the ceilings and parts of the brick wall in each of the three tenements in the wing, while most of the front doors of the other dwellings were torn off their hinges, and nearly every window in the building was smashed.

HIS REASON FOR COMPLAINT.

(From the Washington Star.)

Rear Admiral Read, at a dinner at the Portsmouth Navy Yard, illuminated with a story an interesting discourse on food inspection.

"A sailor," he said, "brought a tin cup to an inspecting officer and exclaimed: 'Taste this sir. That is all I ask. Just taste it!'"

"The officer took a sip."

"Well, really, my sailor," he said, "this is not bad soup after all."

"Yes," said the sailor, bitterly; "yet they want to persuade us, sir that it's tea!"

AGAIN THE BICYCLE.

(Montreal Herald.)

The epidemic character of certain amusement and entertainment epidemics is one of the great problems of psychology. Here are a few of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homestead resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by residence upon the said land.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of the homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.
