ALCOHOL'IS A BODY FUEL Prof. Atwater's Investigation of the

Drink Problem.

He Finds That, While Alcohol Cannot Build Up or Repair Wasted Tissues, It Can Supply Strength, and in Certain Quantities Is Not Harmful to the System.

MIDDLETOWN, Con... June 17.—At the meeting of the Middletown Scientific association, recently, Prof. W. O. Atwater of Wesleyan university reported on the results of the experiments upon the effects of alcohol lately carried out under his direction with a nan in the respiration calorimeter. Although these experiments have been frequently referred to in the newspapers, this is the first authentic account giver to the public. They are conducted under the auspices of the committee of fifty for the investigation of the drink problem. The apparatus with which they are made, a small chamber with metal walls, is the same as is being used for experiments upon the food and nutrition of man at Wesleyan university in co-operation with the Storrs, Experimental station and the United States department of agriculture by Frofs. Atwater and Ross,

the United States department of agriculture by Profs. Atwater and Rosa, Dr. Benedict and others.

The chamber in which the man lives is about seven feet long, four feet wide and six and one-half feet high. It is furnished with a folding bed. chair and table. In the experiments where muscular, work is done, a stationary bicycle is also provided. There are arrangements for wantisting lighting bicycle is also provided. There are arrangements for ventilating, lighting and regulating the temperature of the chamber and for passing in food and drink, so that the man lives with entire comfort, day and night, during the entire experiment, which lasts from four to twelve days. The food, drink and other products, and even the air which the man breathes, are measured and analyzed with the greatest program. and analyzed with the greatest accuracy. What is still more interesting, the potential energy or latent force of the food which the body receives and

the energy given off from the body in the forms of muscular work and heat are likewise measured.

It has been shown in these experiments that the human body, like any other machine, a steam ergine or an electrical dynamo, for instance, obeys the law of the conservation of energy. By giving the men under experiment different kinds and amounts of food rest to light or severe muscular or mental work, it is possible to learn just how the body uses its food, what materials are needed for its support and how many different food materials

ompare in nutritive value.

The special object of the recent experiments was to study the nutritive effect of alcohol. Pure alcohol was administered with water or coffee. In others, to be reported upon later, alcohol was given in the form of whisky or brandy. Still others are planned in which been and with the still bear and with t ne will be u has been equal to about two and, a half cunces of absolute alcohol, about as much as would be contained in five or six ounces or three average glasses of whiskey, or in a bottle of claret or Rhine wine. It was given in six doses, three with meals and three between

Three important results were observer, First, the alcohol was oxidized—that is, burned as completely as bread, meat, or any other food. Second, in the oxidation all of the potential energy of the alcohol was transformed into heat and muscular power. In other words, the body made the same use of the energy of the alcohol as that of sugar, starch and other ordinary food materials. Third, the alcohol protected the materials of the body from consumption just as effectively as the corresponding amounts of sugar and darch. That is to say, whether the body was at rest or at work, it held its own just as well with the one as with the other.

In explaining the experiments Prof.

In explaining the experiments Prof.
Atwater called attention to the fact that food has two chief uses: one is to build up the body and keep it in repair, the other is to supply it with energy for warmth and work. Alcohol is similar to the fats, starch and sugar in that it cannot form tissue, but it does yield energy. It cannot be used to build the bodily machine or to repair it as it is worn out by constant use, but it can and does serve for fuel. Prof. Atwater explained that the object of these experiments was simply to get at scientific facts. At the same time the results, as facts are often misrepresented both by those who use alcoholic beverages and those who earnestly desire to promote temperance reform. The fact that alcohol in small quantities may serves food does not make it a desirable food for common use. Unquestionably it is used by many people in such quantities without harm, and often with positive benefit; but taken in larger quantities its action upon the brain and nerves is such as to counar in that it cannot form tissue, but larger quantities its action upon the brain and nerves is such as to coun-teract its food value. Too often mod-erate use leads to excess, and that ex-cess, results in physical, mental and

cess results in physical, mental and moral ruin.

Reference was also made to the errors which are too often found in the teaching of so-called temperance physiology in the public school, the Sunday school and the pulpit, as well as on the temperance platform. Many earnest promotors of temperance reform feel it necessary to insist that alcohol is not a food but a poison; that in any luantity, large or small, it is necessarily harmful and not useful. These theories are based in part upon necessarily harmful and not useful. These theories are based in part upon the results of experiments made years ago by imperfact methods, and since shown to be incorrect. They are directly opposed to the results of the latest and most reliable research and to the consensus of the leading automatically. thorities the world over.

HOPEWELL HILL, June 20.-Moun Pleasant Lodge, I. O. G. T., cele-brated its fifth anniversay last even-ing in the public hall, over a hundred members of the order and other being esent. A programme of entertainment was presented, including solos, duets and choruses, and addresses by John Russell, chief templar; W. A. West, A. C. M. Lawson, T. Mark Pearson and others. After the entertainment ice cream and other re-

tainment ice cream and other re-freshments were served.

The terminal examination of the pri-mary department of the Superior school here, taught by Miss Grace McGorman, was held this afternoon, and was attended by a large number of visitors. The exercises were of much interest and reflected credit on teacher and pupils. At the close of the children's programme speeches were made by W. J. McAlmon, J. M. Tingley, M. M. Tingley and the principal, A. C. M. Lawson.

Rev. Allan W. Smithers and bride arrived from Waterford, by Tuesday's train, and took up their residence at the rectory, Riverside. Mrs. Smithers will receive her friends on Tuesday, Wednesday and Thursday, July 4th, 5th and 6th.

Capt. Chas. Edgett of the schoon Morning Star, while superintending the loading of a cargo of pressed hay at Riverside, had one of his legs broken below the knee, by a bale of hay that fell from the hooks. The captain elongs to Moncton.

BRIEF DESPATCHES.

HYDE PARK, Mass., July 3.— Willie Hickey, seven years old, son of Michael Hickey, was drowned in Mother Brook this fitternoon while bathing. The body was servered.

BRUSSELS, July 3.—At a meeting of the factions of the left in the chamber, a resolution in favor of the withdrawal of the electoral bill and urging a dissolution instead of a referendum, was adopted. PROVIDENCE, R. I., July 3 — Margaret McKearney, 26 years old, was killed by a train at Dike street railroad crossing, in Olneyville, this evening while crossing the tracks on her way home from work.

LEWISTON, Me. July 3.—Willie Tuttle's left hand was blown off by a cannon cracker this evening. He was taken to the French hospital, where his left arm was amputated above the wrist. His left ear was partially blown off and his face injured.

FALL RIVER, Mass., July 3.— James Townley, aged 23, was accidentally shot by a boy on Park street tonight. Townley was with friends and the boy was discharging a revolver. It is believed that a bail cartridge got mixed with blanks. At the hospital it is thought that the young man will die.

WILLIAMSON, W. Va., July 3.— Anse Hatfield, ir., son of "Devil" Anse Hatfield, shot and killed H. E. Elis on a Norfolk and Western train near this place. There had been had feeling them for a long time, Ellis being a McCoy sympathizer in the Hatfield-McCoy feud. Hatfield escaped, but is being nursued.

COBURG, July 3.—The diet today adopted a bill whereby the Duke of Albany becomes heir to the Buchy of Coburg of Saxe-Coburg and Gotha. In the event of the extinction of the Albany lineage, Prince Arthur of Connaught succeeds, or on Prince Arthur of Connaught's extinction, the heir of the Prince of Wales succeeds. Prince Hohenlohe-Lamgenberg is made the Duke of Al-

PRESCOTT, Ariz, July 3.— Two young merchants, J. M. Rogers and Clinton D. Wingfield, were murdered in their places of business at Gamp Verde last midnight. Two masked men entered the store and ordered Rogers and Wingfield to throw up their hands. They followed this with a volley of shots, killing both men. The shooting attracted neighbors and the robbers fied without getting at the safe, which contained a large sum of money.

AN INTERESTING CASE.

tract for carrying the mail between Roxburgh and Penobsquis, has had ssued a warrant for the arrest of Miss L. J. Cross, teacher of South Branch school, district No. 8, on a Branch school, district No. 8, on a charge of defamatory liber Miss Cross, it appears, on the word of some pupils, wrote a letter to Edmund T. Lockhart, Mechanics' Settlement, telling him that McManus had been seen to open his mail on Maroh 8. When Miss Cross found out that her information was unreliable, that McManus did not carry any mail on that day she again wrote to Lockthat day, she again wrote to Lock-hart, telling him so. Mr. McManus, however, it seems, is not satisfied, and is seeking redress in the courts One thing seems certain, namely the day on which McManus is said to have opened the mail was not a regular mail day.

PEACE CONGRESS.

THE HAGUE, July 3.—The drafting committee of the arbitration commis-sion of the peace congress passed the second reading of Sir Julian Paunce-

Sir Julian Pauncefote's scheme was amended so as to permit the powers wishing to take advantage of it to propose four names for judges and also to permit the foreign powers at The Hague to replace the permanent council of administration, suggested in the proposal of the head of the British delegation.

At the suggestion of M. Leon Buorgeols, head of the French delegation the drafting committee decided that, in the event of a dispute, it should be the duty of neutral powers to call the

the existence of the permanent co

THE U. S. AND SPAIN.

MADRID, July 3.—The Spanish senae resumed today the discussion of the treaty of peace between the kingdom of Spain and the United States. Senor Montero Rios, president of the Spanish peace commission at Paris, declared that Spain would enjoy the same commercial rights in Cuba, Porto Rico and the Phillippines as would be enjoyed by the United States. He pointed out that the treaty was based upon the principle that Spain had relinquished sovereignty over Cuba in order that the island should become independent and not be annexed to the United States. The senate ratified the treaty and adjourned.

What is

Castoria is for Infants and Children. Castoria is a harmless substitute for Castor Oil, Paregorie, Drops and Soothing Syrups. It contains neither Opium, Morphine nor other Narcotic substance. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays Feverishness. Castoria cures Diarrhoea and Wind Colic. Castoria relieves Teething Troubles, cures Constipation and Flatulency. Castoria assimilates the Food, regulates the Stomach and Bowels of Infants and Children, giving healthy and natural sleep. Castoria is the Children's Panacea-The Mother's Friend.

"Castoria is an excellent medicine for children. Mothers inve repeatedly told me of its good effect upon their children."

DR. G. C. Osgood, Lowell, Mass.

"Castoria is so well adapted to oblidren that I recommend it as superior to any prescription known to me."

APPEARS ON EVERY WRAPPER.

THE WONDERFUL DOCTORS.

They have found out how consumption may be positively cured;
Ills that used to worry people need no longer be endured;
They we discovered lymphs and serums, so we have been plainly told,
That will stop the sad necessity of ever growing old;
They are finding out the microbes, they advancing day by day,
But people keep on dying in the same old-fashioned way!

Steel

They are stopping all the fevers and ing all the ills.

That the human form is heir to, with their serums and their pills;

They are causing men to wonder at their triumphs every day,

But people keep on dying in the same old-fashioned way!

What a wondrous thing is science! They can take a germ from you and consult its inclinations and exploit its from the West Indies with a large

INDIAN NAMES OF ACADIA. (By Richard Huntington.)

While floats our country's banner,
O'er Chebucto's glorious wave,
And the frowning hills of Scatarie
The trampling surges brave;
While breezy Aspotogon
Lifts high its summit blue,
And sparkles on its winding way
The gentle Sissiboo.

It dwells round Catalone's blue lake,
'Mid leary forests hid.
Round fair Discouse and the rushing tides of the Turbid Pisiquid.
And it lends, Chebogue, a touching grace.
To thy softly flowing river,
As we sadly think of the gentle race.
That has passed away forever.

ARRIVAL OF DUART CASTLE.

Str. Duart Castle, Capt. Seeley, arcargo and fifty passengers. The run up was a delightful one. The saloon passengers when leaving the vessel declared it to have been the most enjoyable sail they ever had. They speak in the highest terms of the courteous treatment they received at the hands of Capt. Seeley and his officers. Following is a complete list of

Steerage—A. J. Crombie, Hon and Chi Lo Shen Yeung, Lam Mee Moi, Demerari Loo Leck, Drinidad; Wm. Dias; Henry Ma Lay, Geo; Knight, Bermuda. The four Chinamen are bound to House long.

WHIPPED THREE WILD CATS.

St. George has on its rolls a man whose name should go down to undying fame as a brave of the first water. There have been occasions when an adventurous pioneer of the far west met and defeated a in square fight a solitary wild cat, but it remained for a New Brunswicker to whip three wild cats without turning a hair. The St. Croix courier thus describes the affray: "Thos. Cameron, while going through his pasture, discovered three wild cats killing a doe and fawn. He rescued the fawa after a hard fight, and it was afterwards taken charge of by Game Warden Spinney, who at once communicated with the chief game commissioner regarding its disposal."

RICHIBUCTO NEWS. RICHIBUCTO, July 1.—C. C. Car-lyle, who is developing a coal mine in this county about thirty miles above here, was in town yesterday, and received orders for upwards of two hun-dred tons.

The road machine is at work in this

vicinity.

Dominion day passed off without ny observance or demonstration. Rev. Father Bannon is making pre-parations for a garden party on his grounds next Wednesday evening.

SALMON CREEK.

SALMON CREEK, Queens Co., June O.—Fred Fowler's horse ran away the ther day, completely destroying his other day, completely destroying his carriage.

Our cheese factory is doing much better than at first. A ton of milk is received each day.

The mill at Briggs' Corner is doing fine work this season, sawing forty-five thousand a day. The lumber is being rapidly conveyed to St. John. A grand fair and strawberry festival will be held in King's hall on the ith of July, the proceeds to go to the building fund of the Baptist church. Mrs. Saul Camp and brother have arrived from Colorado.
