

IN OTHER LANDS.

Something About Mexico and Central America.

H. F. Baker A World-Wide Traveller Gives His Views On Various Subjects.

Among the arrivals in the city this week is H. F. Baker, who is registered at the Dufferin hotel. Mr. Baker is the representative of three of the largest wholesale houses in the world, and during his extended travels he has visited nearly every portion of the globe.

The firms which he represents are all of London, and are Cross & Blackwell, which has been in existence for more than two hundred years; Huntley & Palmers, the largest biscuit manufacturers in the world, and W. G. Nixey, who is a manufacturer of black lead, which has been in existence for more than two hundred years.

Mr. Baker, who has taken a great deal of interest in the political conditions of the countries which he has visited, told the Sun last night that in his opinion the idea of endeavoring to secure a market in the south for dogfish was a good one, and one that should be of immense benefit to the fishermen along the Northern Atlantic coast.

Mr. Baker said that it was generally supposed by the people of North America that dogfish was not good to eat, but this is not the case, for it has been found that their flesh is very delicious. For that reason it has been suggested that instead of destroying them, it would be more expedient to encourage the catch and have them shipped to a southern market.

Mr. Baker said that it was generally supposed by the people of North America that dogfish was not good to eat, but this is not the case, for it has been found that their flesh is very delicious. For that reason it has been suggested that instead of destroying them, it would be more expedient to encourage the catch and have them shipped to a southern market.

Mr. Baker spent last winter in the West Indies, where he had a good opportunity to study the attitude of the inhabitants of those islands towards Canada, and in his own words, when he got to give a big preference to Canadian goods. Only a few years ago their trade was wholly with the United States, and it is interesting to note the change that has taken place.

Mr. Baker said that it was generally supposed by the people of North America that dogfish was not good to eat, but this is not the case, for it has been found that their flesh is very delicious. For that reason it has been suggested that instead of destroying them, it would be more expedient to encourage the catch and have them shipped to a southern market.

For that reason it has been suggested that instead of destroying them, it would be more expedient to encourage the catch and have them shipped to a southern market.

line was built by Sir W. Pearsons, an eminent English contractor, who has lately finished a contract for work in Vera Cruz costing some \$10,000,000. The government also propose to spend \$8,000,000 at the Pacific coast terminus.

Asked in regard to a direct steamship line from Canada to Mexico, Mr. Baker said he had looked into the matter very thoroughly and was convinced that a line would pay well. The steamers could call at Cuba without any great difficulty. Many prominent merchants in Mexico are anxious to develop the fruit trade with Canada. It is almost certain that a large trade would come, soon after a line was started.

THE PANAMA CANAL.

Speaking of Central America, Mr. Baker said that the development in the trade of that country during the last few years has been marvellous. This is chiefly due to the Panama canal. People are constantly moving into Panama, which is a bright and pretty town, and the American government is spending vast sums of money in the sanitary improvements of the town, along the canal, especially of Panama, which has for its only drawback its proximity to the Chagres river, a great deal of fever. For this reason, the town is considered unhealthy. Colon, the seaport at the other end of the canal, is also considered unhealthy, although it is a bustling town.

One of the finest places I have yet visited, said Mr. Baker, is San Jose, whose chief point of interest is its opera house, a large, magnificent structure that cost over \$2,000,000, the cost of the furnishings on the walls exceeded \$40,000. To build the opera house the merchants of San Jose, in the rainy days of coffee, agreed to tax themselves one cent per pound, which went towards the building fund. At the present time when coffee is not so easily cultivated and the competition, the merchants find the tax very burdensome. The opera house is situated so far inland that very few good companies ever get there, and it stands alone, a striking contrast to the dirty streets around it.

Bull fights in San Jose, Mr. Baker said, are of very frequent occurrence, and seldom a Sunday goes by when there is not a bull fight. People are not treated to a sight like that. Another place which is coming forward with rapid strides is Costa Rica, whose fruit trade is being greatly developed. There is a difficulty in raising fruit in that section of the country, because it is not affected by the hurricanes which are so dangerous in Jamaica.

CHAMBERLAIN'S POLICY.

Mr. Baker said that the people of the West Indies were strong in their approval of the Chamberlain's policy. They felt that it would bring them in closer touch with the Mother Country as well as with the other colonies. Mr. Baker said that in his travels he has met many Canadian men, most of whom are holding responsible positions. Among them were James H. McLeod, who formerly belonged to Toronto, now in Mexico City, a member of a large wholesale grocery firm; Mr. Millican, who is prominently connected with the Silver King Mining Company, and Dr. Godose, a native of this city, who has a large practice in Trinidad.

Mr. Baker had rather an interesting experience in a southern town a short time ago. He stepped up to a gentleman who had some money changed, and was surprised to find that individual hold up a crisp bank note of the People's Bank of Fredericton, N. B.

While in Cuba after the Spanish-American war, Mr. Baker had a standing on guard near the entrance of General Weyler's palace a soldier in an American uniform talking earnestly with a Cuban in a language which was strangely familiar, though unintelligible. He stepped up and asked to be shown through the palace, and was surprised to learn that the man was a Scotchman and a native of Mabou, C. E. In his own words, when he got stuck talking the Cuban language, he drifted off into Scotch, and the two formed a queer combination.

STRAINED HIS BACK WHILE LIFTING.

WAS IN A BAD WAY TILL HE USED DODD'S KIDNEY PILLS.

They Removed the Bad Effects, and Now William Sharam is as Well as Ever Again.

MURRAY HARBOR SOUTH, P. E. I., Sept. 2.—(Special.)—Hurt through strain on his back while lifting, Mr. William Sharam, general storekeeper here, got so weak that he could scarcely hold up. Today he is enjoying the best of health once more, and when asked how he got his health back he unhesitatingly answers, "Dodd's Kidney Pills."

"Having sprained my back with heavy lifting," Mr. Sharam says in telling his story, "it brought on Urinary and Kidney Trouble." I got so weak that I almost fainted and could scarcely hold up. I was terribly troubled with having to get out of bed so frequently to urinate.

"After using many medicines with no good results, I tried Dodd's Kidney Pills. I have used ten boxes in all, and can sleep without being disturbed and my old trouble has vanished."

Dodd's Kidney Pills cure the Kidneys. Cured Kidneys cure numerous diseases, including Rheumatism, Dropsy, and Bright's Disease.

COAL MINE ON FIRE.

WILKESBARRE, Pa., Sept. 2.—The fire in the Avondale mine of the Delaware and Lackawanna Coal Company continues to burn. All the timber work between the Red Ash and the Rose shafts on the Red Ash level, where a squeeze occurred nine years ago, has been destroyed by the flames and another cave in is reported from there tonight.

EXHIBITION.

Many Exhibitors Now at Work On Their Booths.

Fireworks Have Arrived—Horse Show Boxes Being Prepared—Will Be Sold by Auction.

Preparations for the exhibition opening are going on apace. The enterprising superintendent, C. W. Taylor, who has charge of the work about the grounds and building, has been making good use of the labor at his command and is rushing everything along. Wednesday the grading of the horse track in front of the grand stand was finished, and the posts are now being put in for the wire fence. The framework of the boxes has been erected and these will be finished some time next week.

The beginning of the grounds is completed. Yesterday the fireworks arranged from Hand & Co., Toronto, and they will be stored in the military magazine near the exhibition building. Thomas Logan has been engaged as mechanical superintendent of machinery hall and has 8 or 4 men at work fixing up the boiler and engine. Steam will be turned on today to test the generators and see that everything is in working order.

Men are at work on the dome painting the iron work and any other weather beaten parts of the building. A building of the same material as the one at the installation of the lighting plant. Several of the exhibitors have begun work on the booths, but only one is yet completed. The booth that gives evidence of being about the best of all is that of Dunlop, Cooke & Co., opposite the entrance to the main building. The framework is now partly up. Around it is being erected a building made on the booths of Shirley and Longley, upper Canadian pickle dealers; Phillips & Foley, confectioners; J. J. McGaffigan, tea merchant, and Fred Law, dealer in fruit and confectionery.

The Havoccol mineral spring, which will supply the mineral water again this year, have two stands, one at the rear side of the main building and another in the corner of the south wing near the band stand. The Malta Vita people have begun their stand on the raised platform near the centre of the main building. Kossman & Ratchford have begun their hardware booth; Witham, cream, on the east side of the main building. The space to be occupied by Emerson & Fisher is being put in. It is in the south wing.

The space to be occupied by Flood & Sons is in the same condition in which it was left last year. The walls and ceiling were trimmed with cedar, and these dry bows have never been removed. In the gallery of the main building C. D. Egan has begun a booth of rustic design. Henderson has had his preparations for an exhibit which they claim will far surpass their own at any previous occasion. Their booth is at the extreme north end.

The forty-eight boxes for the horse show will be sold by auction at Chubb's on Saturday, Sept. 10th, at noon.

DIED AT ST. MARTINS.

Mrs. Elisabeth Patterson Found Dead In Her Home.

ST. MARTINS, Sept. 1.—Suddenly, at her home, West Quaco, on Wednesday, Aug. 31, at noon, of heart failure, Mrs. Elisabeth Patterson, widow of the late Gen. Patterson, died at the year of her age. The circumstances surrounding her death are sad. Her daughter, who lives in St. John, had paid her mother a visit, just leaving her in her usual health on Monday previous to her death. Since living alone she had been spending the nights and breakfasting at the home of a neighbor, making the remaining meals at her own home. Falling to come Wednesday night to her boarding place the lady thought she had decided to remain at her own home, as she somewhat tired, and had not much business till the afternoon of Thursday, having not seen her up to that time. An entrance was forced into her home, where she was found dead upon the floor before her bed. The cause of death is supposed she fell while eating her dinner.

She leaves five daughters and two sons to mourn the loss of an affectionate mother. One son from New Brunswick is here to attend the funeral, and others are expected. An inquest was deemed unnecessary. Funeral Saturday, interment in the Mosher Hill cemetery.

WILL REMAIN IN NEW BRUNSWICK.

F. H. Hale, M. P., who has had a year of lumber operations in British Columbia, is in the city. His field of operations was near the Okanagan Lake, and some distance south of the C. P. R. Mr. Hale and his associates are having a more up-to-date equipment and much greater capacity. After a successful winter's operations in the woods the new mill was started this spring. Later the whole property was sold to the Kamloops Lumber Company, which operates several other areas in the province. Some of Mr. Hale's associates invested with the larger concern, and Mr. Hale remained for a time to assist the new company in the operations. Mr. Hale is returning to New Brunswick, and it is understood that Mr. Hale has ceased to be a resident of British Columbia. He is not much given to talk for publication, but does not appear to be dissatisfied with the result of his western operations.

Advertisement for HEAVY GUNS. May Shortly be Manufactured in Canada. Sir Charles Ross Asking for a Factory Site—More D. R. A. Prize Winners.

(Special to the Sun.) OTTAWA, Sept. 2.—The Canada Atlantic Railway, which extends from Depot Harbor, Georgian Bay, to Swanton, Vermont, a system of about 500 miles, has been acquired by the Grand Trunk Railway.

Jackson Booth, president, would not say anything on the matter today but accepted the calling of outside help to aid the force of immigration inspectors and watchmen. When the stragglers arrived here last Thursday they brought a number of representing many nationalities. Among them were fifty children suffering from the measles who were sent to a Brooklyn hospital by the physicians of the marine hospital. The gypsies greatly resented the taking of the children and last night a report spread among them that their children had been drowned. Then another child suffering with measles was found among them and a physician tried to feel the child's pulse, the women attacked. They pulled off their shoes, which have thick wooden soles, and belabored the doctor and hurled cups and dishes at him and at the guards who dragged him from among them. The gypsies men in an adjoining room, drew knives and other weapons. All night long the women herself set upon any uniformed man who entered their room. Early this morning officers were hurried to Ellis. They finally convinced the gypsies that their children had not been lost. The sick child was removed to the hospital.

GOT A GIRL FOR KEEPS. ALTONA, Prussia, Sept. 4.—During a dinner which Emperor William and the Empress Augusta Victoria gave at the Kaiserhof tonight to the leading officials of Schleswig-Holstein, the Emperor announced the betrothal of Crown Prince Frederick William to the Duchess Cecilia, sister of the reigning Grand Duke of Mecklenburg-Schwerin. The announcement was received with great enthusiasm.

NOVA SCOTIAN KILLED. TORONTO, Sept. 4.—Harold Dennedy of Nova Scotia, was run over by a street car on Spadina avenue Saturday morning and killed. The motorist did not see him. He was about fifty years old.

CHILD DROWNED IN MAINE. BANGOR, Me., Sept. 4.—Elgar, the three-year-old son of Andrew Ellis, of East Hampden, was drowned while playing on the river Friday afternoon. Mrs. Ellis, while searching for the body went beyond her depth, but was rescued with difficulty. The child's body was recovered this evening.

FOUND A LOT OF STOLEN SILVER. BROOKLINE, Mass., Sept. 2.—While passing a field near Coledges corner this evening, a little girl noticed some silverware behind a fence. She notified a policeman and upon investigation more than \$2,000 worth of silverware that was stolen from the house of Lewis Woodruff this morning, was recovered.

Vroom, 6th, and Wetmore, 7th, each won \$5. In the extra series, 600 yards, Major Wetmore, 7th, and Capt. Black, 7th, each won \$3.50. At 800 yards Major McRobbie, 8th Hussars, won \$3.70. At 900 yards Sgt. Bartsaux, 6th, and Sgt. Kennedy, 7th, each took \$4.50. At 1,000 yards Lieut. Semple, 7th, and O. T. Killam, Truro, each took \$4. W. G. Jeffries, 4th, won revolver competition.

OTTAWA, Sept. 4.—Additional scores in the D. R. A. matches posted yesterday: Capt. Complin, 23rd, was top score in Runningman competition, winning \$20. \$3.80 each, Corp. McDonnell, 7th; Lieut. Sutherland, 7th; Lieut. McArthur, 7th; Pte. Stech, 3rd. In revolver match Lieut. Semple, 7th, won \$5; W. O. Elliott, Arisande, \$4.

Extra series aggregate was won by Capt. T. Mitchell, corps of Guides, who was 1st. Sir Charles Ross, who is at present in England, has made application to the Dominion government for more land on the Cove Fields, at Quebec. Besides making the rifles for the militia, Sir Charles intends to extend his establishment to include the manufacture of big guns, six, eight, and twelve pounds, and it is for this purpose that he is now on the other side of the Atlantic getting out plans and specifications for the new factory.

Considerable opposition has developed in Quebec to the proposal to lease over the historic Cove Fields for factory purposes. It is held that there are many other eligible sites in the city for factories without disturbing one of the breathing spots of the city. Canadian postage rates have been made applicable to mail matter to Northern Nigeria.

A GYPSY RIOT. People on Ellis Island Thought Children Who Had Measles Had Been Drowned. NEW YORK, Sept. 4.—Ellis Island was the scene of a gypsy riot last night, which for a time threatened to result in the calling of outside help to aid the force of immigration inspectors and watchmen. When the stragglers arrived here last Thursday they brought a number of representing many nationalities. Among them were fifty children suffering from the measles who were sent to a Brooklyn hospital by the physicians of the marine hospital. The gypsies greatly resented the taking of the children and last night a report spread among them that their children had been drowned. Then another child suffering with measles was found among them and a physician tried to feel the child's pulse, the women attacked. They pulled off their shoes, which have thick wooden soles, and belabored the doctor and hurled cups and dishes at him and at the guards who dragged him from among them. The gypsies men in an adjoining room, drew knives and other weapons. All night long the women herself set upon any uniformed man who entered their room. Early this morning officers were hurried to Ellis. They finally convinced the gypsies that their children had not been lost. The sick child was removed to the hospital.

HARVEST EXCURSION.

The last signs of the harvesters' excursion were seen Sunday in the Union depot, when a small army of harvesters, with brushes, soap and water, diligently cleaned every corner and nook in the building. A nauseating lot of rubbish was removed and now even if the station doesn't smell exactly sweet, it certainly is clean, and a certain amount of freshness has returned to the usually trim and neat depot.

The Island crowd arrived here Saturday morning about three o'clock, tired and sleepy. Their complaints of treatment along the line were loud and vigorous. Beginning with a night spent on the Point du Chene wharf without food or shelter from the drizzling rain, they were slowly moved along the I. C. and kept without food or drink until Sussex was reached in the afternoon. They had begun to think that a process of slow starvation had been decided upon to thin out their ranks and relieve the crush, but at Sussex they were given a meal. They reached here about 10 p. m. within an hour of the departure of their co-excurionists and were allowed the privilege of sleeping on a floor left none too clean by the first lot of delayed harvesters. Many of the Islanders were people of means, but the lateness of the hour prevented them from getting into hotels and all had to share alike. When day broke they immediately sought out places of various kinds. They did not limit their orders and soon many of them were in a happy state of oblivion. Curled up on trucks, or seats, or lying prone upon the floor, they slept away the time. Their positions in many cases must have been very wearisome, except for those utterly drunk or sleepy. One man formed a good representation of the Islanders, the most violent of all, and he slept the sleep of the just, undisturbed by the drunken orgies of those around him.

The police report this contingent to have been the most violent of all, and only rough measures early in the day served to keep some of them under control. The more orderly among them found amusement in dancing, cake-eating and singing. Several possessed good voices and their quartette was much enjoyed by their comrades. The train which was to take them west arrived here early Sunday morning. The crowd were given breakfast about six o'clock and at half-past eight the last of the memorable harvest excursion of 1904 went out.

PROBATE COURT. Accounts were passed Saturday in the estate of the late Aaron Eaton to the amount of \$25,000 by the surviving executor and trustees, James Manchester and Mrs. Eaton. B. T. C. Knowles, prosecutor. A petition was presented for passing accounts in the estate of the late Martha A. Foxwell by Clement P. Clark and John M. Taylor, the executors and trustees. A citation was granted. W. B. Wallace, C. C. proctor.

IN INDIA.

HASSAU, Aug. 30.—The Durbar today was attended by the Chinese ambassador, the Tibetan agent and three councilors, Colonel Younghusband, commissioned with the British expedition, was informed that two clauses of the treaty with Great Britain had been agreed upon. The question of indemnity is still to be settled.

CHILD DROWNED IN MAINE. BANGOR, Me., Sept. 4.—Elgar, the three-year-old son of Andrew Ellis, of East Hampden, was drowned while playing on the river Friday afternoon. Mrs. Ellis, while searching for the body went beyond her depth, but was rescued with difficulty. The child's body was recovered this evening.

FOUND A LOT OF STOLEN SILVER. BROOKLINE, Mass., Sept. 2.—While passing a field near Coledges corner this evening, a little girl noticed some silverware behind a fence. She notified a policeman and upon investigation more than \$2,000 worth of silverware that was stolen from the house of Lewis Woodruff this morning, was recovered.

NOVA SCOTIAN KILLED. TORONTO, Sept. 4.—Harold Dennedy of Nova Scotia, was run over by a street car on Spadina avenue Saturday morning and killed. The motorist did not see him. He was about fifty years old.

RADCLIFFE IN TOWN.

He Has Kept Very Quiet—Now on His Way to Nova Scotia. Radcliffe, the hangman, arrived in the city on Saturday on his way to Kentville, N. S., where he will conduct the execution of William Robinson, who was convicted for the murder of his wife.

During the afternoon he was in a Mill street barroom near the depot, which was frequently visited by many of the harvesters who were waiting for the trains to depart for the west. As the afternoon wore away Radcliffe's identity became known to these lusty sons of the plow, who disregarding all question of propriety, grew strangely curious, and on the advice of the bar-tender, who urged him to seek a room up town, and rest, Radcliffe slowly wended his way towards King street.

He had written to the sheriff at Kentville asking him not to make any preparations for the execution until he arrived, and he will proceed with the erection of the scaffold at once. The hanging will take place on Monday, Sept. 13th. Radcliffe has been to the Pacific coast, where he conducted an execution, since he hanged George Goe at Woodstock, on the 22nd day of July.

THE BALTIC IN; BREAKS RECORD.

With Noted Passengers Has Returned and Reduces Her Own Time. NEW YORK, Sept. 3.—Her many-towered decks black with thousands of passengers—the largest number which any one vessel has ever brought from England to these shores—the gigantic Baltic, herself the biggest thing afloat, sped majestically warped alongside her North River pier, densely packed with a vast concourse which had gathered to meet the incomers. There were in all 3,731 voyagers on board, 49 in the saloon, 352 in the second cabin and 2,900 in the steerage. As another triumph the big ship made the quickest passage which she has accomplished since she has been in the service, 7 days 4 hours and 35 minutes.

GONE TO CUBA.

Miss Sadie Potter, sister of the Rev. J. G. Potter, paid a short visit to the manse on her way to Nueva Paz, Cuba, the auspices of the school under the auspices of the American Board of Foreign Missions. Miss Potter will reach New York tomorrow, where she and seven other lady teachers meet the ladies of the board and on Friday they will hold their farewell dinner, and sail on Monday, Sept. 5th. Miss Potter has already spent three years in Porto Rico, during which time she has acquired a working capital of the Spanish language.—Peterboro Examiner.

Rev. J. G. Potter is known to many in St. John. He occupied the pulpit of St. David's church here for several Sundays during the summer.
