

POSILAM BRINGS SKIN HEALTH AND COMFORT

Posilam and Posilam Soap mean lasting skin health and comfort to all who are afflicted with any annoying or disfiguring skin disease. These troubles cause acute distress, particularly in hot weather, when bodily comfort is difficult under best conditions. The complete cure of eczema, acne, eruptions, itching troubles, sunburn, stings, scalds and every form of skin ailment is easily accomplished by this perfect remedy.

POSILAM SOAP, besides assisting in the work of healing, should be used daily for its many benefits to the skin, whether or not disease is present. Best for baby's bath; absolutely pure; soothes tender skin; prevents irritation; cleanses, softens, and brightens the complexion. Write to the Emergency Laboratories, 32 West 25th Street, New York City.

Spring Tonics Real and Unreal

Some people use stimulating medicines in the spring. This is a mistake. The action of the heart is increased. You feel better for a time, but the reaction soon sets in. You are discontented, the fatigue by using up more rapidly the vitality you have left.

Get a real tonic—a true tonic, one which will increase the amount of pure, rich blood in the body, revitalize the feeble, wasted nerve cells, and so prove of lasting benefit to you.

A good example of a true tonic is Dr. Chase's Nerve Food. This food nourishes and gives you a new lease of life. It builds up the system, and you may not feel the difference so quickly, but have the satisfaction of knowing that the tonic you use is natural and lasting.

Dr. Chase's Nerve Food is a strengthening tonic half so satisfactory as Dr. Chase's Nerve Food.

THE CITY SCHOOLS CLOSE FOR THE SUMMER VACATION

Pupils Released from Studies Yesterday—Pleasing Receptions Held Last Evening for Graduates of High School and St. Vincent's

The annual summer closing of the public schools of the city took place yesterday when 7350 pupils were released from their studies to rest and take advantage of the balmy days of July and August.

Last evening the members of the High School alumni held a reception for the graduates at which 150 were present. The assembly hall was tastefully decorated in honor of the occasion. The class motto, "No tentacles out of the past," was prominently displayed on the blackboard at the rear, while the platform and the walls were decorated with the school colors of maroon and grey, predominant, and blending with the red, white and blue of the flags and bunting.

The evening programme was opened by a selection by the High School orchestra followed by a quartette by four of the young lady graduates. The Cecilia orchestra then played several selections during which the hosts and their guests thoroughly enjoyed themselves. Harry McGuire was then heard in an excellent cello solo, which was received with much applause.

A very interesting event in the programme was the presentation of a life membership in the alumni society to Miss Marion Macaulay, the valedictorian. Refreshments were then served after which dancing became the order of the evening until 11:30 when the happy gathering broke up. The chapter of the evening were Miss Jessie I. Lawson, Mrs. H. S. Bridges, Mrs. J. V. Ellis and Miss Walker.

The closing exercises at the High School were largely attended, many of the visitors having to stand during the programme, which embraced both pleasing and interesting features, reflecting great credit on those taking part and those under whose direction it was given.

In St. Vincent's High School a class of seventeen received graduation diplomas. The closing exercises were held yesterday morning and were attended by a large gathering of parents and friends of the pupils. Among those present were: His Lordship Bishop Casey, Dr. H. S. Bridges, who presented the diplomas, Commissioner Agar, Senator Ellis, Rev. A. J. O'Neill, Rev. Dr. McMan, Revs. W. Holland and A. J. Duke. The graduates were: Misses Julia Margaret Cleary

Regina C. Lawlor, Katherine McLaughlin, Josephine F. Wetmore, Mary B. MacDonald, Mildred A. McAloon, Margaret M. Gallagher, Helen M. Sharkey, Kathleen M. McGrath, Mary C. Doherty, Mary V. O'Neill, Jean W. Walsh, Ellen Turner, Mary J. Fitzpatrick, Cecilia McElwaine, Mary P. Doyle, and Madeline Gleason. Addresses were delivered by His Lordship Bishop Casey, Senator Ellis, Commissioner Agar and Rev. A. J. O'Neill. The Alumni gold medal and the Ellis medal were presented to Miss Genevieve Barry.

In the evening in Keith's assembly rooms a reception and dinner was held at which the year's graduates were the guests of the Alumni Society. The affair was by far the most successful ever held by the society. The class of seventeen who yesterday said good bye to school days were welcomed to the ranks of the alumnus and enrolled in the membership ranks.

The reception was preceded by a dinner. Miss Florence O'Regan, president of the Alumni Society, presided. About one hundred and thirty were in attendance. Following the dinner a delightful programme of toasts, vocal and instrumental music was rendered. The address of welcome to the new members was delivered by Miss Florence O'Regan and was responded to by Miss Cleary, class leader, and Miss Veronica O'Neill. The other toasts were: "Our Teachers," "Our Orchestra," "The Alumnus," "The Gentlemen." The musical portion of the programme included selections by the Cecilia Orchestra, piano solo by Miss Geraldine Carleton; banjo selection, Miss Beatrice Carleton; vocal number, Miss R. Wetmore and leading by Miss Agnes Scully.

The rooms were artistically decorated during the afternoon by the committee and presented an attractive appearance, the association's colors being prominent in the color scheme. A pleasant feature during the evening was the presentation of the Ellis medal to the graduates. Miss Alice Moran, a signet ring was presented by the members of the Alumni Society. Mrs. Herbert Flaherty was presented by the orchestra with a pendant.

The evening was thoroughly enjoyed by all present and was voted the most successful reunion of the association on record.

We're Not Doing Much to Save Workers in Dangerous Trades

Workers in White Lead—Most P from Poisonous Fumes by Rag Muzzl

(NOTES)—Industrial diseases are being studied nowadays, instead of being regarded as unavoidable. Specialists are trying to find remedies for them, in better working methods and better laws. This week the subject is engaging the attention of a great national conference at Atlantic City. At this conference are many speakers of world-wide reputation. The following article is contributed by one of them.)

BY PROF. C. E. A. WINSLOW, College of the City of New York. Industrial disease pervades every industry we have, from the largest to the smallest—from working in lead, a substance from which the deadliest of fumes arise, to operating a type writer in a badly-lighted office while sitting in the wrong kind of a chair. And yet there are but 15 industrial medical inspectors in the United States, and all but two of these are in Massachusetts!

Illinois is the only state which has a real ventilation law, and that law regulates only the amount of air to be supplied and fixes no standard for temperature and humidity. A law providing a standard for temperature and humidity, similar to laws which are on the statute books in England, was drafted in conference with members of the Association for Labor Legislation, and was introduced in the New York state legislature in 1911, but failed of passage.

Any temperature over 70 degrees F. puts a strain on the heart-regulating mechanism of the body, and keeps the blood in the skin away from the vital organs, and produces far-reaching impairment of the efficiency of serious of Occupations—Proletariat.

tem, and the body as a whole. It is beyond question that the workers in a factory where the temperature is over 70 degrees are injured by a lowering of their vitality that may lead to tuberculosis and other serious diseases and that they are working below their normal standard of efficiency, so that both they and their employer are the losers.

Nevertheless, from the reports of the New York state department of labor for 1908, 1909 and 1910, it appears that out of 215 workrooms examined at seasons when the outdoor temperature was 70 degrees or less, 156, or 73 per cent, had temperatures of 73 degrees or over, and 63, or 29 per cent, had temperatures of 80 degrees or more.

In view of the difficulty of formulating legal standards intensive investigations of special industries, such as that recently made in England of the cotton industry, are urgently needed in the United States.

Even if the Wisconsin plan of an industrial commission with power to fix specific standards be substituted for the attempt to fix the details of factory regulation in the form of law, the necessity for a thorough study of existing factory conditions by properly qualified experts is imperative. Only on the basis of such studies can legal standards be enacted or specific rules laid down by a factory commission.

There should be medical experts and chemical experts and engineering

Exmouth Street Methodist Church. Rev. W. W. Brewer, pastor, 9:45 a. m., society classes; 11 o'clock, Divine service, preacher, Rev. H. E. Thomas; 2:30 p. m., Sunday school and Bible classes, also Glad Tidings Sunday school; 7 p. m., Divine service, preacher, Rev. Neil McLaughlin, president of the New Brunswick and Prince Edward Island Methodist conference. Congregational Church, H. F. Mahood, pastor. Subject Sunday evening: "Ought a Christian to attend Theatres." Everybody welcome.

FATHER—My son, what does the teacher say when you don't know your lessons?
SON—She says I must be a chip of the old blockhead.

PRETTY SOON.
Tramp—Vant I wuz so hungry I ate a house.
Mrs. Goodly—How terrible!
Tramp—No'm; it wuz fine. It wuz a porthouse.

TIPS ON THE RACES.
(By our Staff Tippler.)
Brass Band—ought to be in front most of the time.
Pelican—should win by a nose.
As a sulky horse, Pessimist ought to do well.
Siphon—should do well in spurt.
Doc Cook is not a very good pole horse.
It seems as though Gas Mantle would be apt to break suddenly.
Hamfat should walk home.
Galosh ought to go great in the mud.
Breakfast Food is usually good for an early start.
Sulphur Match is generally scratched.

WHY—
Does a woman pore at her back hair, whether it needs it or not?
Are squeaky shoes so popular with the men who come around to the offices collecting bills? It isn't necessary to attract so much attention.
Do fat men always pick out low-crowned hats?
Do all tall women wish they were little Della Foxes?
Does the trolley always come off when the conductor is in the middle of the crowded car with both hands full of nickels and a package of transfers between his teeth?
Does rent day always come just when you haven't got a cent?

experts—not just doctors and engineers, but doctors and engineers who have specialized in public health—on the staff of the body which enforces health laws in factories.

Whenever you feel a headache coming on take NA-DRU-CO Headache Waters. They stop headaches promptly and surely. Do not contain opium, morphine, cocaine, or other dangerous drugs. 25c. a box at your Druggist's.

NATIONAL DRUG AND CHEMICAL CO. OF CANADA, LIMITED.

Just Hold the GILLETTE Naturally

Shaving with the GILLETTE is not a fine art, nor does it require skilled labor. You may be "no good with tools," yet you can shave yourself easily and well with the Gillette Safety Razor.

Hold it lightly, as illustrated, and it falls naturally into the right shaving position, blade edge just touching the skin. Then draw it across the face, not hoe fashion, but with the Angle Stroke shown, and the keen GILLETTE blade will cut smoothly in any direction—with the grain, across it, or against it.

If you want a light shave, or if your skin is tender, screw the handle tight.

If you want a close shave, loosen the handle about a quarter turn. This allows the blade to spring away from the guard a little and take more hold. Buy a GILLETTE and forget your shaving troubles.

Standard Sets, \$5.00. Pocket Editions, \$3.00 to \$6.00. Combination Sets, \$6.50 up.

At your Druggist's, Jeweler's or Hardware Dealer's.

"Don't Eat Them ALL, Grandpa!"

It's no wonder Maple Buds taste good, and it's no wonder mothers everywhere are encouraging the little folks to spend their pennies for them.

Maple Buds are nothing more than the best of chocolate, pure milk and sugar—things the doctor would recommend to build up a sickly child. The most delicate child can digest them.

The distinctive flavor of Maple Buds is entirely due to the use of only the best chocolate. The fine velvety texture comes from grinding and grinding through innumerable steel rollers.

More Facts About McClary's "Sunshine" Furnace

—The Understudy of the Sun—

There's no dust nuisance about the "Sunshine"—when you rock down the ashes the dust is drawn up dust-flue then directly across to smoke-pipe where it belongs. Look at the illustration and remember to open both "Dust" and "Direct Draft" dampers—these simple devices make the "Sunshine" the cleanest furnace for the home.

See the famous "cup joints" here—the frame of the ash pit—the two sections of the fire-pot and the dome all joined together by our "cup joints."

There's a layer of asbestos cement in each joint—this unites all sections in a permanent way, yet leaves room for the expansion and contraction of the metal.

No wonder that this "Understudy of the Sun" is called the "Sunshine" furnace—Since it diffuses pure warm June air throughout the house.

You don't have to wear overalls when attending to the "Sunshine" furnace—it has a big roomy ash-pan. All the ashes are guided directly into the pan by ash-chutes. A minute or two performs the job. Yes, the "Sunshine" is the clean furnace.

The "Sunshine" Furnace burns either wood or coal. Coke, too, if you prefer it. The "Sunshine" distributes a greater percentage of heat units—the Baffle plates (a new McClary device) decidedly increase the heating efficiency of the furnace.

But—see the McClary agent of your locality. Ask him to show you all the features and exclusive devices which make the "Sunshine" Furnace worthy of the name—The Understudy of the Sun.

If you do not know the McClary Agent, write us at our nearest address and we'll forward you a letter of introduction by return.
