

# Corona Steel Range

## Best Grates

Exasperating experience of grates going wrong with the Corona Range. The Corona grates differ from the old-fashioned ones in that they are built for heavier use. And you can change them in a minute. In and out like the grates from their jiffy. That's handy for you surely! No fuss about having a mechanic to change them. How handy for coal to wood, too.

You should know all about the best of handy ranges having easy handles and easy handles. See the Corona at our store and write us directly for literature.
