

## Lump Jaw

The first remedy to cure Lump Jaw was

### Fleming's Lump Jaw Cure

and it remains today the standard treatment, with years of success back of it, known to be a cure and guaranteed to cure. Don't experiment with substitutes or imitations. Use it, no matter how old or bad the case or what else you may have tried—your money back if Fleming's Lump Jaw Cure ever fails. Our fair plan of selling, together with exhaustive information on Lump Jaw and its treatment, is given in Fleming's Vest-Pocket Veterinary Adviser. Most complete veterinary book ever printed to be given away. Durable bound, indexed and illustrated. Write us for a free copy. FLEMING BROS., Chemists, 75 Church St., Toronto, Ontario.

## Worth Looking Into

When it becomes necessary to buy feed, it will be well to keep in mind the word

### "CRESCENT."

"Crescent" is a mixed chop, with the Government analysis on every bag. One of the largest dairy herds in Ontario recently ordered a carload, and the order was placed after thoroughly testing its value as a dairy feed. Ask your dealer about it. If he does not know, write us. We can give you a close price on a carload.

THE CHISHOLM MILLING CO., LIMITED  
"A," Jarvis Street, Toronto, Ont.

## BRAMPTON Jerseys

CANADA'S GREATEST JERSEY HERD  
We are offering for sale one 2-year-old bull and four yearlings, fit for service; also six bull calves; females of all ages. Come and see them or write. B. H. BULL & SON, BRAMPTON, ONT.

**High Grove Jerseys No Better Blood in Canada.** Present offering: Two choice young bulls about fourteen months old. Will be sold right, before going into winter. ARTHUR H. TUFTS, P. O. BOX 111, TWEEB, ONTARIO.

The class was being questioned on the cardinal points of the compass.  
Teacher—If I turn to the east and look at the rising sun, what is behind me?  
Boy—Your shadder.

## SHE HAD CONSUMPTION.

**Dr. Wood's Norway Pine Syrup Cured Her.**

**Weighed 135 Pounds—  
Now Weighs 172.**

Mrs. Charles McDermott, Bathurst, N.B., writes:—"I thought I would write and let you know the benefit I have received through the use of Dr. Wood's Norway Pine Syrup. Three years ago I had consumption. I had three doctors attending me and they were very much alarmed about my condition. I was so weak and miserable I could not do my housework. While looking through your B.B.B. almanac I saw that Dr. Wood's Norway Pine Syrup was good for weak lungs, so I got a bottle at the drug store, and after taking ten bottles I was completely cured. At that time I weighed 135 pounds and now weigh 172, a gain of 37 pounds in three years. I now keep it in the house all the time and would not be without it for anything, as I owe my life to it."

Dr. Wood's Norway Pine Syrup contains the lung healing virtues of the Norway pine tree, which, combined with other absorbent, expectorant and soothing medicines, makes it without a doubt the best remedy for coughs, colds, bronchitis and all throat and lung troubles.

Price 25 cents at all dealers. Beware of imitations. The genuine is manufactured only by the T. Milburn Co., Limited, Toronto, Ont.

## QUESTIONS AND ANSWERS. Miscellaneous.

### WARTS.

I have a colt rising two years which has a raw wart on the back of hock. Would you kindly tell how I can cure it? SUBSCRIBER.

Ans.—Dress with butter of antimony once a day, applied with a feather, for three or four days, or longer if necessary, after which dress twice daily with 1 part carbolic acid to 20 parts sweet oil until healed.

### ASPARAGUS "FERN."

Our fern has several stems like the inclosed one. Some of them leaf and some do not. Is there any reason for some of them not leafing, and should they be cut off? The inclosed stem grew in four weeks. F. S. Oxford Co., Ont.

Ans.—If the stalks of the so-called asparagus "fern," which is really an asparagus, not a fern, do not leaf out within a reasonable length of time, say within two or three weeks, cut them off.

### MAPLE-SUGAR-MAKING OUT-FIT.

1. How far should you bore into a tree when tapping it? 2. What kind of a spile do you think is the best to use when the pail has a lid on it? 3. What kind of a lid is the best and cheapest for to cover the pail while it hangs on the tree? 4. What size of a pan is suitable and cheapest for a hundred trees? 5. What style of a fireplace is generally used when burning rough wood? Perth Co., Ont. G. B.

Ans.—1. It is customary to bore into the tree about one- and one-half inches. Much depends on whether the tree has a second growth, or is old growth. In small, second-growth trees, a short incision is best, while in larger and older trees, a larger incision.

2 and 3. The proper lid for a sap-pail is one that will shelter the sap from storm, leaves and dirt, and at the same time properly ventilate the buckets, by allowing a free circulation of air. A cover is advertised that will not lie perfectly flat on the bucket, as the sap is apt to sour. A little ventilation is necessary. Several styles of spiles are advertised, and from actual experience we are not prepared to say which is "best."

4. Small-size evaporators, suitable for 100 trees, are manufactured, which save time and fuel, though costing more.  
5. Machines are sold complete, with furnace, grate bars, chimney, evaporating pans, regulator, scoop and skimmer, but in many cases pans are used with fireplace usually of bricks, which take in rough wood. For clean, speedy boiling, good fuel is advisable. A good tin pan or evaporator is preferable to one of galvanized iron.

### ITCHING—SWOLLEN FETLOCK.

I have a Clyde stallion. For the last year he has had a desperate itch in his neck, so much so that if I let him loose in stall or yard, he will rub continually; has rubbed a great portion of his mane off. There is no scab or irritation as far as I can see. He is in good, healthy condition.

1. What treatment will stop him rubbing?  
2. What will stimulate his mane to grow rapidly?  
3. Please give address of firms where I can buy crude molasses, such as used for feeding stock.  
4. Have a colt six months old. About 6 weeks ago sprained hind fetlock joint, was swollen and lame for eight or ten days, when lameness gradually ceased, but all around joint is still enlarged. What will reduce joint to normal size? V. V.

Ans.—1. Wash thoroughly with soap and water, and after that give a thorough application of a two-per-cent solution of creolin, or any other good disinfectant. Repeat in ten days.

2. A monthly application of tincture of cantharides may do good; it acts as a mild sweat blister.

3. There are no firms advertising molasses in our columns at present.

4. Bathe thoroughly with hot water, then with cold water; rub dry and apply, rubbing well, the following liniment: Liqueur ammonia, 2 fluid ounces; oil of turpentine, 3 ounces; raw linseed oil, 3 ounces. Apply three times a day.

TRADE MARK
