REGISTERED SEED

No seed may be sold as registered seed except that which is inspected, sealed and tagged by an inspector of the Canadian Seed Growers' Association. All registered seed is inspected in the field while growing to ensure its purity, and is further inspected after cleaning to ensure its high quality. All registered seed is guaranteed pure as to variety, free from seeds of other cultivated plants, free from noxious weed seeds, well matured, clean, sound, plump, well colored and germinating not less than 95 per cent. Registered seed is undoubtedly the highest quality of seed grain and potatoes available. Its production requires infinite painstaking and patience and its value is much more than that of ordinary seed.

Livestock from Peace River

A shipment of 29 steers from Fort Vermilion landed at the stock yards Edmonton, on August 28, last. These steers were raised and finished on the farm of S. Lawrence, and netted \$114 each at Edmonton. Considerable diff-culty was experienced in getting these cattle to market, a distance of nearly 1,000 miles. They came in over the E.D. & B.C. railroad and were held up for 35 hours without feed or water at Smith Siding. It was pointed out that it would be a decided advantage if there were yards at Smith, where the stock could be unloaded, fed and watered. It would look like pretty good business on the part of the E.D. & B.C. road to maintain yards there. In the near future there is almost bound to be considerable development in live-stock shipping from the north country and anything they could do to make it easy for shipments to come through would soon reflect on the volume of business to their line. All reports would indicate that there is abundance of feed in the Peace River country and the settlers there are not slow in taking advantage of this favorable condition.
