## That Cold Room

on the side of the house where  
winter blasts strike hardest always  
has a lower temperature than the  
rest of the house. There are times  
when it is necessary to raise the  
temperature quickly or to keep the  
temperature up for a long period.  
That can't be done by the regular  
method of heating without great  
trouble and overheating the rest of  
the house. The only reliable  
method of heating such a room  
alone by other means is to use a

### PERFECTION SMOKELESS OIL HEATER

*Absolutely smokeless and odorless*

which can be kept at full or low heat for a short or long time.  
Four quarts of oil will give a glowing heat for nine hours,  
without smoke or smell.

An indicator always shows the amount of oil in the font.  
Filler-cap does not screw on; but is put in like a cork in a bottle,  
and is attached by a chain and cannot get lost.

An automatic-locking flame spreader prevents the  
wick from being turned high enough to smoke, and is easy to  
remove and drop back so that it can be cleaned in an instant.

The burner body or gallery cannot become wedged, and can be unscrewed  
in an instant for reworking. Finished in japan or nickel, strong, durable, well-  
made, built for service, and yet light and ornamental. Has a cool handle.
