Got the Better of Hotel Clerk. "With all his faults," began Fairchild, "the hotel man is a first class fellow, who will go a long way to keep his guests from shining too much in public or from being seen by doubtful guests. I recall an instance which happened to me in New York not long ago. I had registered in the morning and, leaving my key at the notel, came back again in the evening. Finding the night clerk on, but not on to me, I asked him, giving him my

name, if I was in. Not knowing, the number of my room, I decided this was the way to find out.
"He looked at me rather suspiciously. Byidently the result of his inspection was not reassuring, for, after making a bluff at feeling in my box, he replied

quite stiffly:
"'No, sir; Mr. Fairchild is not in." I sat down on the lounge and said

Injuries From Carbolic Acid. Warnings are given in a medical journal against the injury to skin and even bone which may result from the long continued use of weak-say, 3, 24 or even 2 per cent—carbolized applications, especially upon peripheral por-tions of the body, such as the fingers. This effect, it is asserted, is due in a small measure to the action of carbolic acid upon the vasomotor system, but in the main to its destructive effect upon the red and white blood corpuscies.

This induces, partly in a mechanical and partly in a chemical way, stasis, first in the capillaries and, if the action of the drug be continued, then in the larger veins and arteries, with the result that the nutrition of the part is in terfered with and the removal of the harmful substances hindered; the mac eration of the epidermis caused by the acid favors evaporation, so that the gangrene is a dry one, a mummification, as it were.

Self Help In Case of Fire. As a house is never attacked by fire at the top and bottom at once, if there is a safe and ready exit at both top and bottom very little danger to life is to be feared. It is important that all exits should be so known as to be easily found by day or night by every in-mate of the house. If the clothes you have on catch fire, a blanket, rug of some such woolen article show quickly and tightly wrapped around had his leg broken by a collision with you.
