CLARIFIED AND BOTTLED MILK

The clarify and bettle milk is the only sanitary and up-to-date way to handle such an important product of the dairy as milk, for while it is one of the best and most necessary foods we have if properly cared for, it is certainly one of the most dangerous if neglected or carelessly handled, and should never be exposed to street dust, as is done in the ordinary way of peddling milk from large cans with one measures. The Steam Turbine Machine used Montreal Live Stock.

MONTREAL, Sept. II.—(Special.)—About 550 head of butchers' cattle, 30 mileh cows, 100 calves, 590 sheep and lambs and 390 fat hogs were offered for sale at the East. End Market to-day. Business was fair, with no changes to note in the prices, except that milch cows are rather higher. Prime hears sold at from 4%c to 5c per 1b., but they were not choice; pretty good cattle, 3%c to 4%c, and the common stock at 2c to 3c per lb. Milch cows sold at 35 to 55 each. Most of the calves were grassers, which sold at 2%c to 3%c per lb. Good yeals sold at 4c to 4%c per lb. The Steam Turbine Machine used to clarify all the milk sold from the

NEW KISHINEY HORROR DO NOT BE

Again the Scene of Anti-Jewish Atrocities.

Eighty Jews Killed In Encounters With Enflamed Populace-Organized Band of Roughs Attack Hebrew Quarter-Houses and Shops Looted -Massacred Those Who Opposed Them-Refugees Driven Back.

Kishinev.

It is estimated that no less than 80
Jews lost their lives in encounters with the enflamed populace. The Jewsish quarter of Kishinev was attacked by an organized band of roughs, who losted houses and shops and ruthlessly killed or wounded all those who attempted to defend their property.

The Jews are fleeing from Kishinev in panic. Many of them who made their way to the banks of the Pruth, in the hope of finding protection in Roumania, were driven back by the frontier guards.

by a bulldog in the water, sustained serious injuries.

The boy was becoming exhausted in his efforts to fight off the animal when a couple of penitentiary guards in a prison tower half a mile away happening to notice the struggle through their long-distance glasses, jumped into a boat and despatch the dog with their rifles at close range.

At the hospital it was found that the boy had been fearfully bitten, and his life was despaired of for a time, but to-day the physicians think he may recover.

ALASKAN VOLCANO ERUPTION.

Ashes and Cinders Thrown Over Score

Ashes and Ginders Invitages.

Seattle, Wash., Sept. 12.—Advices received here from an officer of the revenue cutter Rush, lying at Dutch Harbor, and dated Sept. 4, say that on Sept. 1 and 2 a volcano in the Alutian Islands erupted, sending ashes and cinders over a score or more of native villages.

A hurricane accompanied the phenomena and wild fowl of all kinds were driven far to sea. No lives were reported lost.

The eruption occurred in the vicinity of the volcanic island Perry, which sprang up from the sea a short time after the San Francisco earthquake.

COAL PROBLEM IN THE WEST.

People Have Not Learned Necessity of Stocking Up for Winter.

HUMBUGGED. More than ever, 'dishonorable and disreputable pharmaceutical concerns are flooding the market with cheap and Some of these are even labelled "Extract of Wild Strawberry," "Wild Strawberry Compound," etc., in the hope that the public may be deceived and led to purchase them, thinking they are getting the genuine Dr. Fowler's.

of Stocking Up for Winter.

An advance of 15 per cent. in prices is a little detail which is presented for the consideration of the coal consumer in the prairie provinces, and he is thereby enabled to realize one of the benefits of an agreement between operators and men in the coal fields. Quotations are 90 cents to \$1.50 per ton higher in Regina, and this increase practically applies to the whole Province of Saskatchewan. All grades of western coal are included. Prices are still below the level at which Pennsylvania coal can compete in these markets, but the difference is slight, and it is possible that more of the American product may be used in tuture.

During the stremous days of the last coal shortage the companies and the railways were attacked for their inability to provide a sufficient supply of tuel. It was argued that the public must be served, no matter what the cost might be. In fact, it was proclaimed that the consumer should have the coal, because he was prepared to pay for it, even if the price were \$20 per ton. But a revolution in the weather has worked a change in popular sentiment. Now that the summer, or an advance copy of it, has arrived, and balmy breezes are being wafted over the prairies, the disregard for values in the coal market is less apparent. Complaints are heard, in fact, because the public is called upon to pay the increased wages which the miners in the mountains receive. It is considered unfair that the consumer should be forced to settle for the advances which the operators have chosen to give to their men. When the winter comes back these complaints will probably congeal. The scramble for coal will take the place of academic discussions on the economic phases of the subject. Ask for Dr. Fowler's and insist on being supplied with it. See that the name The T. Milburn Co., Limited, Toronto, Ont., is on the wrapper. Price Metal for Quebec Bridge Was Twice Inspected.

Rallway Pays More.

Quebec, Sept. 12.—The coroner's jury resumes its enquiry to-day into the Quebec Bridge disaster.

Before the Royal Commission yesterday, E. A. Hoare, chief engineer of the Quebec Bridge Co., testified. He was appointed to that position in 1900, but for 35 years had been engaged on different Canadian railways. His experience with bridges was that of structures entering into railway construction, both wood and steel.

He had been chief engineer of the Canadian Northern Railway.

His duties in connection with the Quebec Bridge were to prepare plans and specifications, to make probable estimates for tenders and to superintend the work. The specifications first called for a 1,600 foot span, and later for one of 1,800 feet, some modifications being made to them by Mr. Cooper. The modifications were made after the signing of the contract. The Government had accepted the modifications. Mr. Cooper had visited the bridge several times and received weekly reports. All metal was inspected upon arrival in the metal yard, and again at the bridge, before being raised into position. This was very important. Neither Mr. McChure, Mr. Cooper nor himself had authority to stop the work of the Phoenix Co. on the bridge.

Asked what he would have done then had anything occurred to warrant a stoppage of work, he said he could not state, as such a contingency had never occurred to him.

Amongst the bodies of bridge victims recovered yesterday was that of Bird, the chief resident engineer of the Phoenix Bridge Co., at the bridge, an old Montrealer. Railway Pays More.

It is interesting to know that the Canadian Pacific Railway is contributing its share of the increased cost of producing coal. It is by far the largest consumer of steam coal in the west, and its requirements seem to keep pace with the output of the mines. It obtains its coal at a great reduction, of course, because it enters into contracts to take delivery of a large quantity from each mine every day. The advances in wages have made it necessary for the railway company to pay 10 per cent. more for its coal, and this means a large additional expenditure. Thousands of tons of coal are consumed by locomotives alone on the divisions west of Winnipeg, and nearly all this fuel comes from the mines which were affected by the recent settlement.

Consumer Should Stock Up.

Censumer Should Stock Up.

There are not many indications that the warnings which have been issued with respect to another shortage of fuel during the coming winter are being respected. The people of the west do not often cross a bridge before they come to it, and they do not intend to worry very seriously over the coal outlook until there is some urgent need of concern. It is more than possible that a wail will arise next November about the scarcity of fuel, and Governments and railways will work overtime in the effort to relieve distress. Much of this trouble would be obviated if the individual consumers would show enterprise by stocking up during the summer. It is easy to deliver coal, both from cars and from the wagons, during such weather as this, and the transportation companies and coal trade would welcome an opportunity to supply the needs of the public now. The unwillingness of the public to accept delivery is a disappointing feature of the situation. Consumer Should Stock Up. How the Smartly Gowned Woman Puts The smartly gowned woman knows full well the value of hat polse. Does she plant her hat on her head and stick a pin in it carelessly? Not she.

She knows, for the best of reasons, that adjusting the hat is a matter that deserves study and that must be done with care.

No Demand Just Now.

Stick a pin in it carelessly? Not she.

She knows, for the best of reasons, that adjusting the hat is a matter that deserves study and that must be done with care.

That every hat is capable of a poise. That unless it is poised rightly its effect is spoiled. It is graceful and becoming if it is poised well and most ungraceful if badly poised.

The average woman does not know how to adjust her hat. She does not seem to realize that the graceful appearance of a hat depends entirely on its poise; that unless it is poised right it is dowdy.

That it must be set carefully on the coffure and the hair must be pulled down in front to show some of its big soft waves.

That the side should be fluffed out a little and the back hair receive attention. little and the back hair receive atten-
