without any time applying enough water to saturate the mass. Plants cannot flourish under such condisince in our family, Boschee's German Syrup has been our favorite remedy and always with favorable and always with favorable results. I have never hesitated to report my experience of its use to and window gardening arises from and window gardening arises from others when I have found them the inconvenience attending the use troubled in like manner." REV. another evil is the dryness of the

> Both of these obstacles to suc cess can be greatly modified by the use of a table properly fitted for the reception of the flower pots or vases n which the plants are kept. This table may be of any required size a surface of one or two feet would be suitable for most windows; it should be made tight and neatly fitted. A ledge is made by fasten ng a strip three inches wide around the edge; then fill with two inches of clean, white sand, upon which the plants are placed. Lining the table with zinc would completely guard against drip. The table should be fitted with rollers to facilitate the operation of watering and cleaning the plants. With a table of this kind the placts can be watered freely and occasionally sprinkled without any injury to surrounding objects. The sand should be kept constantly wet, so that moisture will be evaporated from it, and thus overcome in some degree one of the chief obstacles to the successful culture of Every Sufferer plants in dwelling rooms—a dry at-

'There are a few genera' rules with regard to watering plants which may be noted. Watering should be preferably applied during the early winter season. Plants in pots well ing shoe-string threatening to trip you more water than those which are ceed exactly as if you were about to newly potted or have a quantity of lie an ordinary bow knot, but he soil with a few roots. Plants with fore you draw it up pass the right parlow or small foliage will not use hand loop through the knot; give a so much water as those with large steady and simultaneous pull on spreading leaves. Plants in the both loops, and you may t-ead the shade will not need as much water sands of time or the ocean beach all as will those in the sun. But in day and waltz into the wee sma' cases when water is applied it should hours of the morning, and that

but much harm may be occasioned by its indiscriminate use. Many persons consider it necessary to resort to the use of guano and other solutions on sickly plants and are surprised to find that the application only hastens the dissolution of the

I have a positive remedy for the above disease; by its one thousands of cases of the worst kind and of long standing have been cured.
