The Fisheries of Nfld.
 The Evening Telegram.
 With this article on the
 of our Native Land, also a
 reference to the fisheries of
 and some other items which
 all probability be my last for
 this period, my next on the same
 will be in the press of the
 States and other foreign coun-
 Having retained my health and
 I go abroad to get investors
 with capital in developing
 land.

GREAT MINE OF THE SEA.
 produce of the sea put up un-
 derfitted ideas will revolution-
 ize fisheries of Newfoundland and
 products heretofore wasted
 be utilized, for food or fer-
 Now I must point out to my
 in all walks of life, that
 something radically wrong
 fisheries. About ninety per
 of our total resources come from
 fisheries and we are not main-
 taining a total population of two hun-
 dred and sixty thousand people even
 Grand Falls and Bell Island in-
 cluded, and we have men starving
 in parts of Conception Bay and
 localities and receiving paper
 when we should be supporting
 a million people the
 mine of the sea. Countrymen,
 are all interested directly or in-
 directly.

NORWAY.
 five per cent. of Norway's
 come from her fisheries,
 a population of two, and
 quarters of million of people
 equals 962,000, or I may say a
 people supported by the
 of codfish, herring, salmon, and
 the fishes and the by-products
 oils, fertilizers, cattle food,
 Norway appreciates the tal-
 her countrymen and the Gov-
 ernment does all in its power to as-
 sure, particularly as to its fish-
 and send their most experienced
 to the foreign markets, their
 being "Quality First." Their
 fishery varies from one mil-
 lion and a half barrels, and in 1920
 had over fifty-six thousand bar-
 rels of oil. Hon. W. F. Penney,
 report on the fisheries of Nor-
 which is creditable and interest-
 ing, all quoted herring oil at two
 and thirty-five dollars per
 barrel and the above at forty gallons of
 oil would realize nearly two
 hundred dollars. Newfoundland has
 the barrel of herring oil, and we
 bring of a superior quality and
 plentiful. The same applies
 Newfoundland's codfish. Why? be-
 cause it is better food in Newfound-
 land.

Sloan's Liniment
 Sloan's Liniment is pro-
 duced in the most care-
 ful manner and is the
 man's greatest enemy.
 Hundreds of people use and
 commend it.
 Rheumatic aches and pains
 instantly obey its command
 and disappear.
 It penetrates right to the
 spot. No need of rubbing.
 Use it with thoroughness.
 Give it a trial.
 Its bottle will convince you.
 All druggists and dealers.

Halifax and the merchant at Halifax
 will find a market for same (that is
 not good enough). In many cases, as
 I have repeatedly stated, our fisher-
 ies must be modernized, revolutioniz-
 ed and standardized if we want to
 take first place in the various mar-
 kets. We have both quality and
 quantity, and with proper methods
 should be supporting a population of
 at least one million from our fisher-
 ies. With the Americas at our doors,
 Newfoundland should be to-day pro-
 ducing at least one and a half million
 barrels of herring, also food for cat-
 tle, fertilizer, herring oil, and other
 products which would give employ-
 ment to every cooper in Newfound-
 land, and even with modern machin-
 ery to make packages, hundreds of
 coopers and thousands of male and
 female help experts at herring would
 have to come from the land of King
 Robert Bruce and also from the
 motherland. Increased exportation
 will reduce the heavy taxes which we
 are paying to-day. The masses for
 want of employment are getting im-
 pregnated with socialistic ideas, and
 had the warnings of three of New-
 foundland's brightest and philan-
 thropic and good-hearted sons in the
 commercial life of their native land
 been heeded, I mean the late Hon.
 W. B. Orlow, A. F. Goodridge, and
 John Harvey, names that will be
 revered by generations yet unborn,
 there would not have been the unrest
 amongst us to-day. Having given forty
 years of my life to fisheries and com-
 mercial life (33 years fisheries and 7
 commercial) I hope to be the
 pioneer in paving the way to
 modernize our fisheries, and go
 down in history side by side with
 my sire and others in distant walks
 of life that have done something to
 uplift my native land and conserve its
 fisheries.

COAL TO NEWCASTLE.
 We read in our papers of imported
 fertilizer for sale, smoked Digby her-
 ring, British Columbia salmon, and
 we throw away millions of dollars
 worth of the by-products of codfish
 and other fishes, which should be used
 for food, and as fertilizer. The enter-
 prising and well known firm of Mes-
 srs. C. F. Bowring & Co., of Liverpool
 has a large plant at Grimsby pro-
 ducing cattle feed, meal and fertilizer
 from fish offal and great credit is due
 to our local firms, Messrs. Harvey &
 Co. and Job Bros. & Co. in their
 pioneer work utilizing the by-pro-
 ducts of our codfish for cattle feed,
 meal, and for fertilizer.

UNITED STATES OF AMERICA.
 Are we making an effort to hold the
 friendship of that great nation with
 all its wealth and its one hundred
 and ten millions of people by our
 Government prohibiting the fishing
 vessels of the United States from net-
 ting light fishes to catch fish for her-
 own people, which will not go into
 competition with us, whereas the
 Luperburg fishing fleet is privileged
 to catch its own bait fish in our waters
 and part of their catch of codfish goes
 into consumption with Newfoundland
 fish. The United States helped us dur-
 ing the Great War, and now, is finan-
 cing us with loans of millions of dol-
 lars. Our great statesman, the Rt. Hon.
 Sir Robert Bond, P. C., did his utmost
 in trying to bring about free fish for
 free bait with his native land in the
 Bond-Blaine, and the Bond-Hay
 treaties. He could see the great bene-
 fits to be derived from reciprocity
 to his native land. So let our Govern-
 ment give the United States a square
 deal and take pattern by Sir Robert
 Bond. I am only giving the Govern-
 ment a few ideas what should be done
 as this is a national issue and not a
 political one. I wish to see a
 political union of the United States
 and give into Caesar as to our
 fisheries.
 Before I lay down my pen I must
 make reference to Sir Edgar Bowring,
 Newfoundland's representative in the
 motherland, and welcome him home.
 We must not forget all that Sir Edgar
 has done and is doing to develop the
 fisheries; his generosity to the public,
 Bowring Park and other benevolent
 gifts to his native land. His name
 along with the historical firm of Bow-
 ring Bros. will go down side by side
 with others in the history of New-
 foundland.

LOOK!

Big Bargains at Smallwood's

Children's White Canvas Skuffer Laced Boots, only \$1.50 per pair

Ladies' White Canvas 2-strap Shoes Cuban Heel, only \$2.00 per pair

fore the present or future generations
 would not have us contribute any-
 thing, as I have faith in Newfound-
 land's great mine of the sea, the
 greatest mine in the world which pro-
 duces fish of all kinds for food.
 Figures should not frighten the mem-
 bers of the Executive Government, as
 they have not gone over the rough
 road of experience as to our fisheries,
 as I have, and I will die without
 knowing it all. Let them ask the Hon.
 W. F. Penney how many millions of
 dollars are invested in Norway as to
 its herring fishery for oil, food and
 fertilizer, and the by-products of all
 kinds of fish, and it would not sur-
 prise me should it go over the hun-
 dred million dollar mark exclusive of
 its cod fishery. All I ask for is a
 square deal (I do not claim to be the

impossible-perfect) and to be given
 a chance to develop the gifts that
 God has given me. Let the Govern-
 ment and all forget that I am a coun-
 tryman born amongst you and that I
 came from the land of my forefath-
 ers, England and Ireland, or some
 other land that would remove the
 doubters and knockers. There is no
 proposition on this or the other side
 of the Atlantic that can equal New-
 foundland's "Mine of the Sea." Of
 fish we have both quantity and qual-
 ity, and I intend to specialise as to
 quality, as to breeding, standardizing,
 etc. All other propositions in New-
 foundland must take second place to
 the above, let it be a Humber Deal or
 other industries. So countrymen, in
 assisting me to develop my ideas, you
 are only assisting yourselves and the
 future generations.

"FISH MEAL"

We have 2 tons Fish Meal which we offer at 3 1-2 cents lb. to clear.

This is a rare opportunity to stock up at an attractive price.

ORDER FROM
JOB'S STORES, Ltd.

Be a REAL WOMAN

Sparkling with vivacity and spirits; glowing with vitality; and owning a complexion that any school girl might envy.

It is easy to have a soft velvety skin free from blemish, raw cheeks and well formed neck and shoulders. Every one knows how yeast builds health and vitality. Clean the skin, fill out the hollow places and puts good firm flesh just where it is needed. And the secret "fermentation" process used solely in IRONIZED YEAST enables the yeast to produce its results twice as quickly. Get IRONIZED YEAST from your dealer today. You'll soon look and feel years younger.

FREE TRIAL To try IRONIZED YEAST contact FREE, simply mail postcard for Famous 3-Day Trial Treatment. Address: Harold P. Ritchie & Co., Ltd., Dept. 51, Toronto.

IRONIZED YEAST Tablets
 THE ONLY YEAST THAT IS GENUINELY IRONIZED

NATIVE ABILITY.

We have had doubters in the past as to their countrymen's abilities. When Michael Kearney, the ship-builder was launching the Brigantine "Ida" from where now stands the Post Office, Charles Fox Bennett, Merchant and owner, doubt Kearney by stating that the "Ida" would take the shore and Kearney placed his watch on the corner of the store. The vessel went by, watch untouched. Doubters stated that the Gulon Liner S.S. Arizona would never reach Liverpool, also H. M. S. Flamingo, Portsmouth or the S.S. Flavian, Boston, but they and other ships repaired by Daniel Condon did so. A square deal is all I wish, after having suffered as I have in trying to uplift my native land. Three generations having removed the doubters and knockers will in time prove that I, the fourth will complete the missing link and remove them also. With recovered health I will do my part towards uplifting my native land and then I will not be forgotten by the generations to

1. Work hard. Hard work is the best investment a man can make.
 2. Study hard. Knowledge enables a man to work more intelligently and effectively.
 3. Have initiative. Ruts often deepen into graves.
 4. Love your work. Then you will find pleasure in mastering it.
5. Be exact. Slipshod methods bring only slipshod results.
6. Have the spirit of conquest. Thus you can successfully battle and overcome difficulties.
7. Cultivate personality. Personality is to a man what perfume is to a flower.
8. Help and share with others. The real test of business greatness lies in giving opportunity to others.
9. Be democratic. Unless you feel right towards your fellow-men you can never be a successful leader of men.
10. In all things do your best. The man who has done his best has done everything. The man who has done less than his best has done nothing.
