

A MISSOURI EDITOR ON SWINE.—The Editor of the Louisiana, Mo., Press, in relating what he knows about farming, touches on the hog question in this style:—"To make Berkshire pigs out of your hazy splitters, select a cold day, stand them on their haunches tied to a sapling, and drive their noses back into their shoulders, leaving about an inch protruding. If you will look at the agricultural papers you will see that all blooded hogs are fixed that way. If you have any whose noses are longer than all the rest of the body, better sell them to an artisan well company for drills, as you cannot drive the nose back without telescoping the whole pig. When you cut up hogs, leave the hams and shoulders square, leave some hair on too, salt everlastingly, and then they will be worth several cents per pound less than when trimmed and eared so that a Christian can eat them.

"Thirty-two cents!" echoed a woman yesterday, when her grocer charged her that sum for a pound of butter. "Yes, 'um," he replied with a bland smile. "You see the grocers can't carry much of a reserve, and we can't turn our collaterals at a sacrifice. If the Government calls in the bonds due in 1874, and the imports of bullion tend to ease the money market a little, butter must find its level with everything else. Butter is very panicky just now, but I think the worst is over." She paid the money without further growling.—*Detroit Free Press.*

MANUFACTURE OF COCOA.—"We will now give an account of the process adopted by Messrs. James Epps & Co., manufacturers of dietetic articles, at their works in the Euston Road, London."—See article in *Cassell's Household Guide.*
