Perfectly Cured

Yeak and Low Spirited - Nervous Prostration - Appetite Poor and Could Not Rest.

"I take great pleasure in recommending Hood's Sarsaparilla to others. It has been the means of restoring my wife to good health. She was stricken down with an attack of nervous prostration. She suffered with headaches and her nerves were under severe strain. She became very low spirited and so weak she could only do a little work without resting. Her appetite was poor, and being so weak she could not get the proper rest at night. She decided to try Hood's Sarsaparilla, as we had heard it highly praised, and I am glad to state that Hood's Sarsaparilla has perfectly cured all her ailments." G. MENTS. correspondence Wingham Times: Mr. D. Cantelon wound up his apple shipping operations for the season last week when he sent forward his last consignment. His total purchase aggregated 17,000 barrels, was made up from the counties of growth as follows: Huron, 4,000; Perth. 1.500 Waterloo, 2,500; Oxford, 2,000; Brant, 4,-500; Norfolk,1,000; Prince Edward, 2,000. The best quality of fruit was obtained in Perth, Waterloo, Oxford and Prince Edward county, where the price averaged \$2 per bushel. During the past month Mr. Cantelon has paid out in hard cash no less than \$40,000, which included the cost of the fruit, barrels, wages, etc.

A large pro-portion of the winter fruit is keeping quiet, 3s 12d: Feb., quiet, 3s 12d: Jan., poorly, some lots in store there having had to be overhauled in order to put them in proper shape. A western shipper says that the recent losses in the English market have been largely due to the poor keeping qualities of the winter fruit this year and its arthe winter fruit this year and its arrival on the other side in a slack and otherwise poor condition. He also says

The reasons assigned for this unusual condition of the fruit is that it ripened too quickly in the steady, 12s 6d. fall. Account sales were received by a shipper west of Toronto last week of a consignment of apples he made to a Liverpool house, which showed that sales of one-third of the fruit sold at 18s to 20s, and two-thirds at 5s to 11s 6d, showing quite a loss.
