FINANCIAL AND COMMERCIAL

PRICES EASIER ON LOCAL MARKET

Hay Sold From \$13.50 to \$14

WHEAT SOLD \$1 BUSHEL

Dats Sold Well, Demand Being Strong

Prices were inclined to be easier on \$4.40 to \$7.

the local market this morning, and the demand was fairly firm for most variables of produce. Hav was inclined steers, \$6.75 to \$7. Veals—Receipts, 100 to be somewhat slow in sale, and as there was a good supply the prices were considerably easier. The highest price paid for choice hay was \$14 50, which was given for only a couple of which was given for only a couple of 10c lower; lambs, \$5 to \$7 50; Canada loads. The majority of the good quality went from \$13 50 to \$14, while poor stuff went as low as \$12, while one load brought the phenomenally low

figure of \$11. One load of wheat is reported to have sold at \$1. Oats were offered in good quantities, but the demand was strong, and there was no difficulty in disposing of them. Some were bought for \$1 17, while others sold as high as

No Change in Vegetables.

There was practically no change in vegetable prices, nor in that of dairy produce though the demand in all varieties was good.

In the meat department there was only one noticeable changes; that was in the price of dressed hogs, that have maintained such a heavy price lately. The highest price paid for them today was \$11, and even at that there was a good deal of difficulty in disposing of them.

.n price, but the sale was considerably more active than in the past few days The market is inclined to advance, and

LIVE STOCK.

TORONTO. Toronto, Sept. 27.—With only 53 loads all told received at the Union stock yards this morning, business was necessarily small in volume, and the trade was slow. About half the cattle offering were butchers, the balance being held over for tomorrow's export market, together with subsequent arrivals. The light run favored prices which were steadily maintained. ed prices, which were steadily maintained at last week's closing levels. Many of the usual buyers took a day off, prefering to wait and take the chances of ther buyers today were the representatives of

the local packing houses. General condi-tions summarized are: Exporters—Market steady. Butchers-Steady, but slow. Sheep—Steady.
Stockers and Feeders—Market steady,

with moderate demand for good stuff. Hogs-Market easier.
Packers complain that too many hogs ere being sent in only half in condition are being sent in only half in condition. Consequently there are too many culls, and prices are cut. If the hogs were better finished before being sent to market, prices would be steadier. Select hogs are quoted this week 25c lower, or \$7.90 f. o. b., and \$8 is to \$8.25 fed and watered. The total run was 53 loads, with 1,078 head of cattle, 583 sheep and lambs, 23 hogs and 13 caives.

OLD COUNTRY PRICES. iverpool, Sept. 27.—John Rogers & Co. ort today: States steers, from 12%c to Canadian, 11%c to 12%c; ranchers, c to 11%c; cows and helfers, 10%c to e; bulls, 9c to 10c; trade very slow.

prevailed in the Deptford market for cattle since. this day week, and prices for Americans have declined ½c to ¾c, Canadians ¾c to 1c, and ranchers 1c to 1½c per lb. This was due to increased offerings, and a somewhat limited demand from both local and country buyers. American cattle sold at 12¾c to 13¾c; Canadians at 12c to 12¾c, and ranchers at 10c to 11½c per lb.

At a joint meeting of the board of education and the board of control of Chelsea Green held last evening it was decided to hold the ball in the city hall instead of at the new school as was decided on some time ago. The hall has been secured and the affair will be held on Oct. 8.

The proceeds will be used to pur-

more new seats and equipment for the school. It was also decided to construct new sidewalks from Adelaide street to the school on the Thompson road, part of which will be cement.

Those present were W. J. Gibling, chairman; W. E. Mitchell, George Tye, William Snow and James Grant, of the board of control; School Trustees Harry Bourne, the chairman, and William Haynes and Councillor Arch Blakie.

AIMED AT MARS

Astronomers Take Advantage of Near Approach to Earth to Seek Discoveries.

THE INT. THE PARTY its moons were the target of many of the big telescopes in various parts of the world today, and with the planet only 35,000,000 miles from the roof of the United States Naval Observatory, as astronomical sharps figured it, the instruments of that in-

and Mars means a clipping of fifteen million miles off the average interven-The Clan Mackintosh Founders ing space, and Prof. Asaph Hall, jun., son of the astronomer who first discovered the satellites of Mars, began training the naval observatory's great glass on the big light in the sky early in the evening, despite the prevailing clouds and he announced his purpose

> All preparations had been made with minuteness, and, like many other observers at other points, he had a hope of some interesting scientific discov-

Is High Above Horizon.

Mars at this time is fairly high on the horizon, and under ordinarily fair conditions in this latitude excellent observations should be recorded of the surface markings and polar caps. While interest was heightened in tonight's observations by reason of the planet running in closer to the earth A MILE IN DEPTH planet running in close to the astro-than at any other time, the astro-nomical experts of the government are not confining their work along this line today. Prof. Hall and his associates have been engaged since August 20 in measuring the two moons of Mars, and will continue in that work probably for a month or more. The polar cap has taken up less of their time, although some very good observations have been made with a view to determining the size of that feature of Mars and of other markings as

The satellites are rather close to the planet and some very curious disturbanges exercised by the plant, including rather remarkable parallelizing effects, have been noted. To observers studying different portions of Mars the inner moon appears in quite different positions in the sky.

Inner Moon Turns Swiftly.

The inner moon, which is in the glare of the planet most of the time, occupies only seven hours and a half in its revolution, while the planet it-self is a slow mover, turning on its axis in about 23 hours. This is one interest in the project. Indeed, it is of the unique features of the solar reported that several other parties who system. According to scientists acproposed to sink test wells this fall cepting the nebular hypothesis, it is have postponed activities until such probable that this satellite was once a part of the planet, and that the total mass revolved in a shorter time. Observations show the inner moon is quite bright as soon as it gets a lit-tle away from the glare of the planet. equipment, as they proposed fully to The outer meon observations are exfollow the directions of the spirit pected to prove of considerable value message and sink to a depth of 5,400 in determining the mass of Mars. The naval observatory telescope is 26-inch instrument with which

WHITNEY AND COOK

Continued from Page One.

Peary Aided Cook. Murphy was in charge of both houses. He is not able to read or write. He had written instructions from Peary which Whitney, at Peary's request, read over to him from time to time. These instructions were very stringent. They directed Murphy to use Cook's stores first and Peary's afterwards. Murphy was told he was to give Dr. Cook every help if he came along in a needy conditions implied that Murphy was to organize an expedition to search for Dr. Cook, but according to Mr. Whit-

Mr. Whitney said that Cook had a copy of these instructions, and would make them public. When Dr. Cook and his Eskimos arrived at the house they had no sledge; being too tired to drag it over

the rough ice, they had left it twenty miles from Etah. The following day some other Eskimos went out and recovered the sledge and brought it in. On it were Dr. Cook's instruments, clothes and

After spending two days at Annadoctor had been in consultation with tools sticking. The hole was eight tok, where Cook first met Whitney, Cook started for Etah. Whitney accompanied him. Cook remained for three days at Etah, organizing for his trip south to Upernavik.

The Young Women's Home Mission Circle of the First Presbyterian Church is holding a social evening ious to see a well driven to the depth and woollen shower tonight.
