LONDIN, FRIDAY, AUG. 9.

AS TO PEACHES.

The Toronto Star says that it is like taking California peaches to Niagara to bring a London lawyer to Toronto. The Star says this half-jocularly and means no offence, but has it reflected to flow. on the extent of this peach business? Let it examine the list of high court of its leading lawyers, and it may be are California peaches-from the city of London. Toronto is not so old that it can afford to boast of the superiority of its home-grown products. The townships, villages, towns and citiesfor there are other cities in Ontariohave contributed by far the greater number of the choicest specimens on every Toronto tree, including the professional tree, which the Star seems to think is the pride of the garden.

Might we ask the Star to examine the origins of the men who produce so admirable a newspaper product as the Star itself? Aren't most of them California peaches? Certainly none of them are lemons. California peaches ment for the Borden naval policy. are just the things that Toronto and every large city needs to keep up the flavor of the home-bred variety. When Toronto wanted a head for its university it found a California peach in the Maritime Provinces. Its financial geniuses have been transplanted from Peterboro or London or Hamilton. Its commercial houses have drawn on outside Ontario into the scores for capable managers and executives. Its railways have brought the best men they employ from cutside places. It pressed the First Lord of the Admirdoes not seem to have a home-bred ercess of wonderful hockey and la- of its troubles, it has been guilty of a crosse players, either, as an athletic Who's Who would reveal.

managers or railway experts, the and have plenty ready to pick the \$15,-000 plums or peaches. In a merely ma-Untario communities its heels, but when it comes to brains it is still far from self-sufficient.

THE NEXT BRITISH REFORM.

Now that the Insurance Act is actu-Hy in force, British Liberalism turns tion would be put upon a visit to Canto another task. All other issues are about to dwindle beside the enormous questions of land taxation and agricultural labor, Only seven years ago Premier Balfour's standing reply to a constant state of political eruption. petitions and deputations from the wretched in city and country was that nothing could be done. The Liberal Government has been showing that much could be done; wages in sweated industries have been forced up, unemployment has been relieved, old age and sickness robbed of half their terrors. Now the accumulated abuses of and is higher than ever before. More's ages in the status of farm laborers, in the pity when there's so much farming the relations of tenant to landowner. and in methods of taxation, are to be attacked with victorious energy.

Everywhere the idea is gaining ground that the incidence of taxation should be shifted from improvements to the land. The workman's cottage or tradesman's shop should not be heavily taxed, while unoccupied land goes almost scot free, as is the case in English towns. In the English countryside, the only way to find the land London Daily Mail. required for small holdings is to put such a tax on the owner of uninhabited acres that he will be driven to sell. Campaigning for his seat in Hanley, Mr. Outhwaite, the Liberal candidate elected, proposed a tax of 3d, in the pound on land values, which seems modest enough to any colonial view, to any view but that of the British landlord, long fattened in privilege. Such a tax, however, would be a sensible relief to the smaller rate-paying and shop-keeping classes. It would be not only an act of social justice, but a condition of social progress in the poorer urban centres. It is simply monstrous that idle land should be practically tax-free.

Launching upon a campaign for taxation of land values, a minimum wage for agricultural laborers, and a fair rent bill in the interest of farm tenants, the Liberal party will probably be split, as it was over Home Rule. There are ominous signs of secession. But the Radical wing will be the stronger, and however leaders may fall away, the rank and file of voters will stand by a progressive policy. The Liberal party must move on if it is not to die; growth is its guarantee of are still favorites and very attractive life. A defeat at the next election is Among those mentioned as 50 neither here nor there. The cause is old, or nearing 50, are Maxine Elliott, the thing, and in Great Britain are Viola Allen, Olga Nethersole, Annie

THE MANCHESTER BY-ELECTION. their real age.
Some of the most prominent men The Unionists have just won Northwest Manchester by a majority of 1,202. Robertson, Robert Mantell, Francis The seat had been vacated by Sir George Kemp, Liberal, who was out of sympathy with home rule. His major-try in the last election was 445. Prior Bernhardt, Ellen Terry and W. H. Sir George Kemp another length of rope and another length of rope and another length of rope and another length of wood. The last length of rope and another length of well known. The inverse frowned not on his massive girth, and all standpatters claimed him for their own

the cause.

to 1906 the constituency had been steadily Unionist. It was won in that year by Winston Churchill, but when he offered for re-election on his promotion to the cabinet in 1908, he was defeated by 429.

The reversion of the seat to the Unionists is not so significant as their methods of winning it. Manchester is the free trade citadel, and the successful candidate. Sir John Randles, warily kept the tariff issue in the background, laying the emphasis on home rule. Welsh disestablishment and the insurance act. The London Daily News, Liberal, and the London Daily Mail, Unionist agree that the main factor in his success was his attack upon the insurance bill, the principle of which the Unionist party accepted in the House of Commons. The measure seems to be temporarily unpopular; there are nearly 14,000,000 insured persons paying a weekly tax, who will not be eligible for benefits for nearly six months. It is predicted there will be a change of sentiment when the benefits begin

The Unionist vote was not much larger than in 1908 or 1910; the drop in lawyers, present and past, and the roll the Liberal vote being attributed partly to the estrangement between the surprised to find how many of them Liberal and Labor forces. This is a far more serious menace to the Government than the Unionist party, which has no constructive policy. If the breach can be healed, the coalition should have nothing to fear from a party which runs away from its own policy to win a by-election. The Manchester victory looks like a pyrrhic

MR. CHURCHILL AND CANADA.

It is difficult to believe the story that Winston Churchill will visit Canada with a squadron of battleships, and will stump the country in an endeavor to whip up public sentiwhatever it may be.

Mr. Churchill has a genius for the spectacular, but in later years he has been credited with growing discretion and common sense, to match his undisputed abilities.

The proper naval policy for Canada was framed by the Laurier Government. The present Government has suspended the operation of that policy from partisan motives, and is seeking for a substitute. If it has gowns on the strength of it alty to come to Canada to help it out grave impropriety. No one imagines speeches in New Ontario. The folks up that Mr. Churchill would consciously In the summing up, Toronto should act as a catspaw for any party in stuff. he consoled with the knowledge that Canada, but the Borden Government If it needs more lawyers, doctors, would attempt to make capital out of financiers, journalists, commercial his utterances here, and he would be placed in a position which every Brit-

NOBEL PRIZE; DID IT GO TO WRONG MAN?

(By Special Arrangement With the Winnipeg Telegram.]

When Alfred Nobel, the Swedish millionaire and explosive inventor, died, he left a will which he had designed in a spirit of idealism. He was disappointed because his invention had not made war impossible; on the contrary, it had led the nations of Europe to pile up explosives of the most deadly character, and to go on talking about and preparing for war as the main business in world politics. sotte voce)—"I say, Alice, play some song that everybody can sing. They're to try to make his fortune express his desires for humanity. He provided in his will, therefore, for the distribution of \$40,000 a year, every year, for ever, to an inventor in five different fields of effort. The most original worker on behalf of peace was to receive \$40,000; the most able inventors in the field of chemistry, of physics, of medicine, were to be similarly rewarded, and finally, the same tidy sum was to be given each year "to the person who shall have produced in the field of literature the most distinguished work of an idealistic tendency." With regard to peace promoters and scientists, the trustees in Stockholm, who pick out the annual winners, have had little difficulty, and have met with little or no criticism because of their selections, but it seems that there has been considerable dissatisfaction with the adjudication along literary lines.

> Are the Nobel prize trustees carrying out the wishes of the dead millionaire in this department? This is the question which Gerald Stanley Lee is inclined to answer in the negative. He points out in a satirical article in the English Review that, in the year when the Stockholm committee sent a check to Rudyard Kipling for eight thousand pounds (\$40,000), an English writer, Mr. Allen Upward, wrote a book called "The New World," which was "so idealistic and distinguished, and so full of new ideas and of new combinations of old ideas, that there was scarcely a publisher in England who did not instinctively recognize it, who did not see that it would not pay at once, and that therefore it was too important a book for him to publish, and after a long delay the book was finally printed in Gen-

Although a copy of this book was sent to the Stockholm committee, the prize was not awarded to Upward Hence Mr. Gerald Lee indulges in this caustic language: "One would have thought that here was precisely the situation for which Alfred Nobel, who had been the struggling inventor of an invention that would not pay at once, himself, would have been looking. A book so inventive, so far ahead, that Literary Hack-Gee, but it's hard publishers praised it and would not invest in it, one would have imagined to be the one book of all others for which Alfred Nobel stood ready and waiting to put down his eight thousand pounds. But Mr. Nobel's eight thousand pounds did not go to the comparatively obscure, uncapitalized inventor, who had written a book to build a world with, or at least, a great preliminary design or sketch, towards a world. The Nobel prize trustees, instead of giving the eight thousand pounds to Allen Upward, looked carefully about through all the nations until their eyes fell on a certain Mr. Rudyard Kipling. And when they saw Mr. Rudyard Kipling, piled high with fame, and a pound a word, they came over quietly to where he was. and put softly down on him eight thousand pounds more."

> Mr. Lee admits that if the Nobel prize trustees had given the award to Upward "a howl would have gone up round the world that would not have quieted down yet, and it is this howl that Mr. Nobel intended the prize for, that he thought a man would need about eight thousand pounds to

meet. . . . He wanted to spend eight thousand pounds a year on providing for the world one more book which would give the ordinary man the personal feeling of being with a genius, of cold, lonely, cosmic genius, the sense of a chill wind of space outside blowing through," And here is Mr. Lee's summing up of the whole matter: "The Nobel prize acts twenty years too late; it falls into line with our usual ornamental D. D., LL.D., lent substitute for the expensive rub- habit, and has become, so far as literature is concerned, a mere colossal. kindly, doddering old age pension from a few gentlemen in Stockholm. It adds itself as one more futile effort of men of wealth, or world owners, to nate strips of rope and wood are then be creative and lively with moneyvery much on the premises with money, after they are dead."

A HINT TO WINSTON. [Montreal Herald.]

It would, however, be much more desirable that British statesmen should visit this country at a time when no grave question of imperial policy is before the country.

MERE FRITAFTY.
