Lacrosse

Government encouragement for the game of lacrosse, out of the funds of the Militia Department, seems to be strictly in order. Lacrosse has been on the down grade in Canada for some years, having given place to such effeminate sports as "soccer" football and even cricket. But when it comes to hurling hand-grenades in the trenches—which is the original function of the British Grenadier, but which everyone supposed had become extinct—it is your lacrosse player who is the one best bet. Fortunately there were in the Canadian Contingent quite a number of survivors of the palmy days of the national Canadian sport, and their skill and dexterity with the "stick" are making a tremendous, not to say explosive, impression upon the Germans. It is abundantly evident that cricket and football players are not in it for a moment in the matter of throwing grenades; if you punted a grenade or swatted it with a bat the chances are that it would turn again and rend you.

At the same time, I confess a hope that the players of the newly-revived game of lacrosse will not take a leaf out of the war book and try to introduce the use of hand-grenades in place of balls in the game itself. There has always been a tendency among lacrosse players to assimilate their game to the operations of a Neuve Chapelle or a La Basse; but for myself I find it quite warlike enough without the introduction of explosives.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and an entire cessation of manifestations of internal trouble.

True piety elevates the spirit, enables the heart and strengthens the courage.

If a son doesn't take after his father it is usually because the old man left nothing to take.

Some wives spend a lot of time regretting the fact that they are so much better than their husbands.

FARM WISDOM.

There is no reason why the farm home should not be just as attractive as the city home. In arranging farmhouse plans those that are adapted to the city can easily be changed to suit farm needs. Make your wife's workshop as attractive and convenient as any to be found anywhere.

The inside of a modern dairy barn looks very different today from the inside of a dairy barn twenty years ago. We are beginning to realize that sunshine is a necessary part of dairy sanitation. In fact, it is the principal factor.

The time is rapidly approaching when dairy products, the same as all other commodities used for food, will be paid for according to quality.

The septic tank deserves a place on every farm. It is one means of bringing city conditions to the farm home.

RUNNING AN INCUBATOR.

Cooling and Turning the Eggs Should Be Regularly Performed.

Cooling and turning the eggs in the incubator is a part of the work that must be attended to promptly, regularly, writes W. C. Thompson in the Country Gentleman. The mother hen turns her eggs in the nest each day and leaves them to cool at about the same time each day if she has her way about it. After the third day of the hatch the eggs should be turned regularly each morning and evening. This may be done by removing a few and gently rolling the others about in the tray. The idea is to change the position of the developing germ within the shell and keep it free from the shell. Changing the position of the eggs on the tray is also of advantage, as there may be a slight variation of temperature in different parts of the egg chamber.

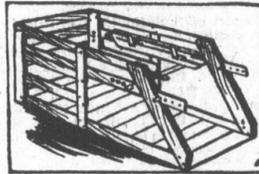

The eggs should be cooled once a day. Start on the third day, when the

eggs are first turned. It is necessary to cool them only the length of time that it takes to turn them. From the third day to the nineteenth day they should be cooled regularly. As the chicks develop they may be cooled longer each day until during the latter part of the hatch they may be cooled for almost an hour without any injury, and with great benefit.

On the nineteenth day the chamber should be closed, to remain closed until the chicks are hatched. On the fifteenth, seventeenth and nineteenth days the eggs should be sprayed with warm water to furnish sufficient moisture to aid the chicks in picking their way through the shell. If a sand tray is in the machine this spraying is unnecessary. The flame should be turned down slightly during these last two days, as an increased temperature results from the animal heat in the chicks' bodies. The chamber should be darkened if there is a glass front in the machine. This will tend to prevent the chicks from forcing their way toward the front of the machine. They are supposed to sleep for twelve hours after coming from the shell. If the chamber is light they will not do this.

Hog Breeding Crates.

The method of construction of the crate for breeding swine is shown plainly in the accompanying illustration, says National Stockman. The inner arrangement is the part hard to understand. The long pieces with the holes in them (see cut) can be raised up or let down as required by the

CRATE FOR BREEDING SWINE.

height of sow, using the gas pipe for the back end and an iron rod for the front. If the height cannot be properly estimated before the sow is driven in it can be quickly changed afterward. The shelves on each side of the sow for the fore feet of the boar can rest at the ends of gas pipe and rod.

In most cases the shelf on one side can be made stationary or the other made in two parts so it can be widened or made narrow. These can rest on the rods at the ends and can be put in place in a moment after the sow is put in the box.

Care of the Brood Sow.

The quality of your spring crop of pigs will be determined by the kind of care you are now giving your brood sows. Don't keep them on dry feed. They need mighty little corn, but lots of roughage. Alfalfa or even clover hay will be relished. Mangels or other roots could not have a better use. With this kind of feed the sows will have plenty of milk and they will not eat their pigs.

Build Up the Farm.

If you are living on a poor farm—that is, if the land is poor—the chances are it is your own fault. There is some land, but not very much, that can't be improved. By keeping the right kind of stock and by building up the soil through rotating the crops you are pretty sure to improve conditions on the home acres.

IT WAS A GOOD PORTRAIT.

And It Had a Sobering Effect Upon "Hollering Jones."

A well known illustrator who makes interesting western pictures once made the acquaintance of a noisy but good humored cowboy who rejoiced in the appellation of "Hollering Jones."

In physical appearance this man was typical of his kind, and the artist made several studies of him, both in repose and in his favorite diversion of "hollering." Some of the studies were sold by the artist to an eastern magazine. They showed Jones in his most violent state.

A year later the artist again visited the region. He was soon approached by Mr. Jones himself, bearing one of the pictures, which he had torn from the magazine in which it was printed. Pointing to it, he said:

"Is that me?"

"Well," replied the artist evasively, "I got the general idea from you, of course, but—"

"Oh, I ain't takin' no offense," Jones made haste to say. "It's all right; only if it's me say so."

"If you put it to me that way," said the artist, "I can only reply that it is a fairly good portrait of you."

"The men here on the ranch agree with you. So I look like that when I holler, do I?"

"I think you do."

"In that case," said Hollering Jones, "all I've got to say is that Hollering Jones has hollered his last holler. Hereafter, when I celebrates I does so with a tin horn. In my opinion no man has a right to look like that—not round white folks, anyhow."—Youth's Companion.

Every Man His Own Dictionary

The English language is not dead, just because it is embalmed and wrapped up in dictionaries like an Egyptian mummy in his sarcophagus. Every now and then some word comes to life, sits up, turns over, smashes a piece of the sarcophagus, tears a yard or so out of the winding-cloth, and goes to rest in an entirely new attitude. Take the word "Allies." There is not a dictionary of English anywhere that will not tell you to pronounce that word with a strong accent on the last syllable. English, Scottish, American, they are all agreed. But we, the English-speaking people who are amongst the "Allies" of this greatest of alliances in all history—we have changed all that. A word which has for generations reposed in dusty histories had been heard only in the stillnesses of dusty classrooms and lecture-halls, that word has suddenly become once again the property of all the people; and all the people have given it a new pronunciation. I do not care what Webster, Worcester, Stormonth, the New Encyclopaedic, the Oxford and Cambridge, or any dictionary says about it. We, the people, have remade that word, and henceforth the pronunciation has the accent on the first syllable—of course with the long I distinctly pronounced in the second. We leave it to the Germans to put the accent on the "lies."

It Rubs Pain Away.—There is no liniment so efficacious in overcoming pain as Dr. Thomas' Electric Oil. The hand that rubs it in rubs the pain away and on this account there is no preparation that stands so high in public esteem. There is no surer pain-killer procurable, as thousands can attest who have used it successfully in treating many ailments.

Tea-Table Chatter

Marriage may be a lottery, but a man can only buy one ticket at a time.

Memory is simply a quality that enables a man to forget judiciously.

Some people can never find anything when they want it, except faults.

It isn't a good plan to collide with a man who is riding his hobby.

It's all right to save time, but some people lose a lot figuring how they can save a little.

The mermaid is perhaps the only female creature in the world that has no kick coming.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, the best remedy of the kind that can be had.

Jack slowboy—May I er kiss you? The Girl—What do you want, written permission?—Boston Transcript.

When the clock stops do not throw it out or take it apart, but saturate a ball of cotton with kerosene, and place inside the clock. The fumes will open out the dirt and it will go on its endless tick.

Do not weep when you break a valuable vase, but mend it with powdered asbestos and waterglass. When nicely set heat paraffin and pour into place where the crack or break has been. When this hardens it may be used for flowers.

Nights of Agony come in the train of asthma. The victim cannot lie down and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

Liberal Conservative CONVENTION

A Convention of the Liberal Conservatives of the new riding of East Lambton, as constituted for Dominion purposes, will be held in the

MUSIC HALL, ALVINSTON

ON—
Wednesday, May 12th, 1915
AT 2.30 O'CLOCK

For the election of officers and the nomination of a candidate to represent the Riding in the House of Commons.

RICHARD BLAIN, M. P.,
J. E. ARMSTRONG, M. P.,

and other prominent Conservatives are to be present and will address the meeting.

A full representation is requested.

The basis of representation is two delegates for each sub-division, together with the Chairman and Secretary.

The Chairman of each polling sub-division is requested to call a meeting in his division at an early date as possible, to elect delegates.

Chairmen must send names of their officers and delegates to W. E. FITZGERALD, Cor-Secr of the Association, Watford P. O. One

W. E. FITZGERALD, W. R. DAWSON,
Cor-Secretary, President R.L.L.C.A.

Protect and Beautify your home with **LOW BROTHERS** HIGH STANDARD LIQUID PAINT.

THAT'S the way to improve your home and neighborhood. It is a great pleasure to know that your house is the best looking in the neighborhood. Besides this pleasure it is a satisfaction to know that your house is well protected from the destructive elements of weather—sun, frost and moisture. Talk over the Neighborhood Improvement Idea with your neighbors. Plan to make yours the neatest and most attractive neighborhood in this city. Paint and flowers will make the change.

"High Standard" Liquid Paint

is the result of 40 years of experience in paint making. This experience plus improved machinery—plus highest grade materials—plus expert labor—insures a paint quality that "Gives Best Results."

"High Standard" is thoroughly tested to meet the extremes of climatic conditions. It spreads farther than ordinary paints, covers better, wears longer and is more economical.

There is a Low Brothers Paint, Varnish, Enamel or Stain For Every Purpose
