## RAILWAY ENGINEERING

By **CECIL B. SMITH, Ma. E.**

Treats chiefly of location, construction and maintenance, thus enabling the young engineer to take a more intelligent interest in and general understanding of the general principles on which railways are surveyed, constructed and operated. Care is taken to give only what is fairly well tried and established. It gives each part its due importance, the combination of the whole subject technically considered as a ground work for future study.

A 200 Page Treatise, Fully Illustrated.

The Price is \$1.50.
