The SPENCE "DAISY" Hot Water Heater

Is by far the Best on the Market

We make this statement without fear of contradiction

The "DAISY" is the product of many years experience in the manufacture of Boilers for Heating Purposes.

The "DAISY" is up to date—possessing all the latest improvements. 15,000 people who use them testify to their superiority.

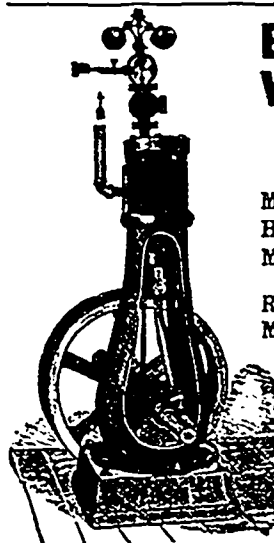

The "DAISY" possesses all the essential features of a first-class Heater
The largest possible effective heating surface exposed to the fire.
Each section is an independent heater.
The circulation of the water throughout the system ensues without friction
Every joint is machine-milled and perfectly true, thus avoiding leakages—a defect which exists in so many other heaters.

The "DAISY" heats on its own level. It requires very little attention.
So well known as the "DAISY" it has become a household word, and a dwelling heated by the "DAISY" will rent or sell to better advantage than if heated by an inferior boiler.

Full particulars furnished on application.

WARREN KING & SON, - Montreal

Toronto Branch: 110 Adelaide St. West
