A CATALOGUE OF THE THYSANOURA OF NORTH AMERICA

BY ALEX. D. MACGILLIVRAY, CORNELL UNIVERSITY.

There being no published list of the American species of Thysanoura, I have thought it advisable to bring my notes together in a connected form. The names adopted are based on a careful study of many specimens from all parts of the country, and the arrangement of families and genera is a combination of that of Tullberg, Lubbock, and Comstock. I have preceded the catalogue by a list of the more important papers containing descriptions of American species, and I have followed the names of all those species known to me by an exclamation point. The specimens upon which this study is based are deposited in the Entomological Museum of Cornell University. I desire to take this opportunity of thanking Mr. Nathan Banks, Washington, D. C.; Prof. H. E. Summers, Knoxville, Tenn.; Mr. A. P. Morse, Wellesley College, Mass., and Mr. Trevor Kincaid, Olympia, Washington State, for numerous new and interesting species.
