

# Lyman's Confectionery.

---

We call the attention of the Drug trade to the special line of Confectionery made specially for ourselves, the quality of which is second to none. One advantage to Druggists handling this line of goods is, they will not be sold except to Retail Druggists, and they will not find their Grocer next door with the same line. We hope our friends will appreciate our efforts to give them a fine class of goods at a popular price, by trying at least a sample with their next order. Price, in less than ten bottles, 85c. ; 10 bottles and over, 80c. Our own bottles are returnable, with glass stopper complete and our label attached only, at 10c. each delivered in Toronto.

Our success in the sale of this article has made it necessary for us to import another shipment, so our stock at present is fresh. Those Druggists who have not tried this as a side line are making a mistake as many have found it very profitable.
