EXHILARATING !

NOURISHING !

VITALIZING !

COCALAC is a Combination of Coca and the Cereal Lacto-Phosphoids.

DOSE—One tablespoonful three times a day, or oftener, as indicated.

STIMULATION WITHOUT REACTION.

Physicians who use the genuine Coca in the form of Coccalac, are agreeably surprised to find that it is quite a different thing from the ordinary commercial Coca, which has generally lost its volatile properties, and is, besides, usually adulterated, and, hence, is almost worthless.

COCALAC improves the appetite, exhilarates the spirits and gives tone and vigor to the entire system. Every physician who has used it testifies that it is a pleasant tonic and stimulant, removing fatigue and languor. Its effect on the brain is to stimulate that organ to greater activity, and to relieve the mind of the depression incident to worry and anxiety.

Physicians and literary workers can exert themselves beyond the natural enduring power by using COCALAC. The activity of the mind, when under its influence, is greatly increased without the reaction following the use of alcoholic stimulants.

COCALAC is a scientific blending of the genuine Coca with the Lacto-Phosphoidal principle of wheat and oats; it is VERY NUTRITIOUS, being capable of sustaining life without any other food or drink; it is also the best form for the convalescing, dyspeptic, or nervous patient, as it is delicious to the taste and ACCEPTABLE to the stomach.
